## Table of Contents

Preface .....	25
1. Introduction .....	27
1.1. Log Message Structure .....	27
1.2. Context Parameters .....	29
1.3. Statistics (usage) .....	33
1.4. Severity levels .....	34
2. Log Message Reference .....	36
2.1. ALG .....	37
2.1.1. alg_session_open (ID: 00200001) .....	37
2.1.2. alg_session_closed (ID: 00200002) .....	38
2.1.3. max_line_length_exceeded (ID: 00200003) .....	38
2.1.4. alg_session_allocation_failure (ID: 00200009) .....	38
2.1.5. invalid_client_http_header_received (ID: 00200100) .....	39
2.1.6. invalid_url_format (ID: 00200101) .....	39
2.1.7. unknown_client_data_received (ID: 00200105) .....	39
2.1.8. suspicious_data_received (ID: 00200106) .....	40
2.1.9. invalid_chunked_encoding (ID: 00200107) .....	40
2.1.10. invalid_server_http_header_received (ID: 00200108) .....	40
2.1.11. compressed_data_received (ID: 00200109) .....	41
2.1.12. max_http_sessions_reached (ID: 00200110) .....	41
2.1.13. failed_create_new_session (ID: 00200111) .....	42
2.1.14. failure_connect_http_server (ID: 00200112) .....	42
2.1.15. content_type_mismatch (ID: 00200113) .....	42
2.1.16. wcf_override_full (ID: 00200114) .....	43
2.1.17. content_filtering_disabled (ID: 00200115) .....	43
2.1.18. max_download_size_reached (ID: 00200116) .....	43
2.1.19. blocked_filetype (ID: 00200117) .....	44
2.1.20. out_of_memory (ID: 00200118) .....	44
2.1.21. wcf_servers_unreachable (ID: 00200119) .....	44
2.1.22. wcf_srv_connection_error (ID: 00200120) .....	45
2.1.23. wcf_server_unreachable (ID: 00200121) .....	45
2.1.24. wcf_connecting (ID: 00200122) .....	45
2.1.25. wcf_server_connected (ID: 00200123) .....	46
2.1.26. wcf_primary_fallback (ID: 00200124) .....	46
2.1.27. request_url (ID: 00200125) .....	46
2.1.28. request_url (ID: 00200126) .....	47
2.1.29. request_url (ID: 00200129) .....	47
2.1.30. out_of_memory (ID: 00200130) .....	48
2.1.31. restricted_site_notice (ID: 00200132) .....	48
2.1.32. url_reclassification_request (ID: 00200133) .....	48
2.1.33. max_smtp_sessions_reached (ID: 00200150) .....	49
2.1.34. maximum_email_per_minute_reached (ID: 00200151) .....	49
2.1.35. failed_create_new_session (ID: 00200152) .....	50
2.1.36. failed_connect_smtp_server (ID: 00200153) .....	50
2.1.37. invalid_server_response (ID: 00200155) .....	50
2.1.38. sender_email_id_mismatched (ID: 00200157) .....	50
2.1.39. sender_email_id_is_in_blacklist (ID: 00200158) .....	51
2.1.40. recipient_email_id_in_blacklist (ID: 00200159) .....	51
2.1.41. some_recipient_email_ids_are_in_blocklist (ID: 00200160) .....	52
2.1.42. base64_decode_failed (ID: 00200164) .....	52
2.1.43. base64_decode_failed (ID: 00200165) .....	52
2.1.44. blocked_filetype (ID: 00200166) .....	53
2.1.45. content_type_mismatch (ID: 00200167) .....	53
2.1.46. max_email_size_reached (ID: 00200170) .....	54
2.1.47. content_type_mismatch_mimecheck_disabled (ID: 00200171) .....	54
2.1.48. all_recipient_email_ids_are_in_blocklist (ID: 00200172) .....	54
2.1.49. out_of_memory (ID: 00200175) .....	55

---

2.1.50. invalid_end_of_mail (ID: 00200176) .....	55
2.1.51. dnsbl_init_error (ID: 00200177) .....	56
2.1.52. cmd_too_long (ID: 00200179) .....	56
2.1.53. cmd_empty (ID: 00200180) .....	56
2.1.54. failed_send_reply_code (ID: 00200181) .....	56
2.1.55. smtp_no_header (ID: 00200184) .....	57
2.1.56. unsupported_extension (ID: 00200185) .....	57
2.1.57. cmd_pipelined (ID: 00200186) .....	57

# Preface

## Audience

The target audience for this reference guide consists of:

- Administrators that are responsible for configuring and managing a CorePlus installation.
- Administrators that are responsible for troubleshooting a CorePlus installation.

This guide assumes that the reader is familiar with CorePlus and understands the fundamentals of IP network security.

## Notation

The following notation is used throughout this reference guide when specifying the parameters of a log message:

**Angle Brackets <name>** Used for specifying the *name* of a log message parameter.

**Square Brackets [name]** Used for specifying the *name of a conditional* log message parameter.

### Example 1. Log Message Parameters

**Log Message** New configuration activated by user <username>, and committed via <authsystem>

**Parameters** authsystem  
username

Both the *authsystem* and the *username* parameters will be included.

### Example 2. Conditional Log Message Parameters

**Log Message** Administrative user <username> logged in via <authsystem>. Access level: <access\_level>

**Parameters** authsystem  
username  
access\_level  
[userdb]  
[server\_ip]  
[server\_port]  
[client\_ip]  
[client\_port]

The *authsystem*, *username* and the *access\_level* parameters will be included. The other parameters of *userdb*, *server\_ip*, *server\_port*, *client\_ip* and *client\_port* may or may not be included, depending on the context of the log message.

## Abbreviations

The following abbreviations are used throughout this reference guide:

**Table 1. Abbreviations**

<b>Abbreviation</b>	<b>Full name</b>
ALG	Application Layer Gateway
ARP	Address Resolution Protocol
DHCP	Dynamic Host Configuration Protocol
DNS	Domain Name System
ESP	Encapsulating Security Payload
FTP	File Transfer Protocol
HA	High Availability
HTTP	Hyper Text Transfer Protocol
ICMP	Internet Control Message Protocol
IDS	Intrusion Detection System
IP	Internet Protocol
IPSec	Internet Protocol Security
L2TP	Layer 2 Tunneling Protocol
NAT	Network Address Translation
OSPF	Open Shortest Path First
PPP	Point to Point Protocol
PPPoE	Point to Point Protocol over Ethernet
RADIUS	Remote Authentication Dial In User Service
SAT	Static Address Translation
SMTP	Simple Mail Transfer Protocol
SNMP	Simple Network Management Protocol
SSL	Secure Socket Layer
TCP	Transport Control Protocol
TLS	Transport Layer Security
UDP	User Datagram Protocol
URL	Uniform Resource Locator
UTF	Unicode Transformation Format
VLAN	Virtual Local Area Network
VPN	Virtual Private Network

---

# Chapter 1. Introduction

- Log Message Structure, page 27
- Context Parameters, page 29
- Statistics (usage), page 33
- Severity levels, page 34

This guide is a reference for all log messages generated by CorePlus. It is designed to be a valuable information source for both management and troubleshooting.

## 1.1. Log Message Structure

All log messages have a common design with attributes that include category, severity and recommended actions. These attributes enable the easy filtering of log messages, either within CorePlus prior to sending them to a log receiver, or as part of analysis that takes place after the logging and storage of messages on an external log server.

The following information is provided for each specific log message:

**Name** The name of the log message, which is a short string, 1-6 words separated by `_`. Please note that the name *cannot* be used as a unique identification of the log message, as several log messages might share the same name.

**ID** The ID is a number made up of a string of 8 digits which uniquely identifies the log message. The first 3 digits identify the category to which the log message belongs.

### **Note**

*In this guide, the Name and the ID of the log message form the title of the section describing the log message.*

**Category** Log messages are grouped into categories, where each category maps to a specific subsystem in CorePlus. For instance, the IPSEC category includes some hundreds of log messages, all related to IPsec VPN activities. Other examples of categories include ARP, DHCP, IGMP and USERAUTH.

In this guide, categories are listed as sections in Chapter 2, *Log Message Reference*.

As previously mentioned, the category is identified by the first 3 digits in the message ID. All messages in a particular category have the same first 3 digits in their ID.

**Default Severity** The default severity level for this log message. For a list of severity levels, please see section Section 1.4, “Severity levels”.

**Log Message** A brief explanation of the event that took place. This explanation often features references to parameters, enclosed in angle brackets. Example:

*Administrative user <username> logged in via <authsystem>. Access level: <access\_level>*

**Note**

*This string is only included in log messages sent to Clavister Log Receivers.*

<b>Explanation</b>	<p>A detailed explanation of the event.</p> <p>Note that this information is only featured in this reference guide, and is never actually included in the log message.</p>
<b>Gateway Action</b>	<p>A short string, 1-3 words separated by _, of what action CorePlus will take. If the log message is purely informative, this is set to "None".</p>
<b>Recommended Action</b>	<p>A detailed recommendation of what the administrator should do if this log message is received. If the log message is purely informative, this is set to "None".</p> <p>Note that this information is only featured in this reference guide, and is never actually included in the log message.</p>
<b>Revision</b>	<p>The current revision of the log message. This is increased each time a log message is changed between two releases.</p>

**Additional Information**

Depending on the log message, the following information may also be included:

<b>Parameters</b>	<p>The name of the parameters that are included in this log message. If a parameter is specified within square brackets (for example [username]), then the parameter is optional and may or may not be included in the log message.</p>
<b>Context Parameters</b>	<p>The name of the context parameters that are included in this log message. Please see Section 1.2, "Context Parameters" for a description of all available context parameters.</p>

## 1.2. Context Parameters

In many cases, information regarding a certain object is featured in the log message. This can be information about, for example, a connection. In this case, the log message should, besides all the normal log message attributes, also include information about which protocol is used, source and destination IP addresses and ports (if applicable), and so on.

As the same information will be included in many log messages, these are referenced as a *Context Parameter*. So whenever a log message includes information about a connection, it will feature the CONN parameter in the Context Parameter list. This means that additional information about the connection will also be included in the log message.

A description of all available context parameters follows with an explanation of all the additional parameters. The names of the additional parameters are specified using the Syslog format.

### Note

*The additional parameters are formatted differently in the EFWLog format, giving them a more user friendly presentation.*

## ALG Module Name

An ALG is always of a certain type, for example FTP, H323 or HTTP. This parameter specifies the name of the ALG sub-module, in order to quickly distinguish which type of ALG this is.

**algmod**                    The name of the ALG sub-module.

## ALG Session ID

Each ALG session has its own session ID, which uniquely identifies an ALG session. This is useful, for example, when matching the opening of an ALG session with the closure of the same ALG session.

**algsesid**                    The session ID of an ALG session.

## Packet Buffer

Information about the packet buffer, which in turn contains a large number of additional objects. Certain parameters may or may not be included, depending on the type of packet buffer. For example, the TCP flags are only included if the buffer contains a TCP protocol, and the ICMP-specific parameters are only included if the buffer contains a ICMP protocol.

**recvif**                    The name of the receiving interface.

**[hwsender]**                    The sender hardware address. Valid if the protocol is ARP.

**[hwdest]**                    The destination hardware address. Valid if the protocol is ARP.

**[arp]**                        The ARP state. Valid if the protocol is ARP. Possible values: *request/reply*.

**[srcip]**                    The source IP Address. Valid if the protocol is not ARP.

**[destip]**                    The destination IP Address. Valid if the protocol is not ARP.

**iphdrlen**                    The IP header length.

**[fragoffs]**                    Fragmentation offset. Valid if the IP packet is fragmented.

**[fragid]**                    Fragmentation ID. Valid if the IP packet is fragmented.

---

<b>ipproto</b>	The IP Protocol.
<b>ipdatalen</b>	The IP data length.
<b>[srcport]</b>	The source port. Valid if the protocol is TCP or UDP.
<b>[destport]</b>	The destination port. Valid if the protocol is TCP or UDP.
<b>[tcphdrln]</b>	The TCP header length. Valid if the protocol is TCP.
<b>[udptotlen]</b>	The total UDP data length. Valid if the protocol is UDP.
<b>[[tcpflag]=1]</b>	The specific TCP flag is set. Valid if the protocol is TCP. Possible values for tcpflag: <i>syn, rst, ack, psh, fin, urg, ece, cwr</i> and <i>ns</i> .
<b>[icmptype]</b>	The ICMP sub-protocol name. Valid if the protocol is ICMP.
<b>[echoid]</b>	The ICMP echo ID. Valid if the protocol is ICMP and sub-protocol is echo.
<b>[echoseq]</b>	The ICMP echo sequence number. Valid if the protocol is ICMP and sub-protocol is echo.
<b>[unreach]</b>	The ICMP destination unreachable code. Valid if the protocol is ICMP and sub-protocol is destination unreachable.
<b>[redirect]</b>	The ICMP redirect code. Valid if the protocol is ICMP and sub-protocol is redirect.
<b>[icmrcode]</b>	The ICMP sub-protocol code. Valid if the protocol is ICMP and sub-protocol is not echo, destination unreachable or redirect.

## Connection

Additional information about a connection. Certain parameters may or may not be included depending on the type and status of the connection. For example, the number of bytes sent by the originator and terminator is only included if the connection is closed.

<b>conn</b>	The status of the connection. Possible values: <i>open, close, closing</i> and <i>unknown</i> .
<b>connipproto</b>	The IP protocol used in this connection.
<b>connrecvif</b>	The name of the receive interface.
<b>connsrcip</b>	The source IP address.
<b>[connsrcport]</b>	The source port. Valid if the protocol is TCP or UDP.
<b>[connsrcidt]</b>	The source ID. Valid if the protocol is not TCP or UDP.
<b>conndestif</b>	The name of the destination interface.
<b>conndestip</b>	The destination IP address.
<b>[conndestport]</b>	The destination port. Valid if the protocol is TCP or UDP.
<b>[conndestidt]</b>	The destination ID. Valid if the protocol is not TCP or UDP.
<b>[origsent]</b>	The number of bytes sent by the originator in this connection. Valid if the connection is closing or closed.
<b>[termsent]</b>	The number of bytes sent by the terminator in this connection. Valid if the connection is closing or closed.

---

## Deep Inspection

Specifies the name and a description of the signature that triggered this event.

### *Note*

*For Deep Inspection log messages an additional log receiver, an SMTP log receiver, can be configured. This information is only sent to log receives of that kind, and not included in the Syslog or EFWLog format*

## Dropped Fragments

Specifies detailed information about dropped fragments in a packet.

### *Note*

*This information is only sent in the EFWLog format*

## Rule Name

Specifies the name of the rule that was used when this event was triggered.

**rule**                    The name of the rule.

## Rule Information

Additional information about the rule that was used when this event was triggered. Certain parameters may or may not be included, depending on the type of rule. For example, the name of an authenticated user is only included if this rule contains network objects that has user authentication information in them.

**rule**                    The name of the rule.

**[satsrcrule]**            The name of the SAT source rule. Valid if the rule action is SAT.

**[satdestrule]**           The name of the SAT destination rule. Valid if the rule action is SAT.

**[srcusername]**         The name of the authenticated user in the source network object. Valid if the source network object has user authentication information.

**[destusername]**        The name of the authenticated user in the destination network object. Valid if the destination network object has user authentication information.

## User Authentication

Additional information about a user authentication event.

**authrule**              The name of the user authentication rule.

**authagent**            The name of the user authentication agent.

**authevent**            The user authentication event that occurred. Possible values: *login*, *logout*, *timeout*, *disallowed\_login*, *accounting* and *unknown*.

**username**             The name of the user that triggered this event.

**srcip**                 The source IP address of the user that triggered this event.

## OSPF

Additional information about OSPF.

<b>logsection</b>	The OSPF section Possible values: <i>packet, hello, ddesc, exchange, lsa, spf, route</i> and <i>unknown</i> .
<b>loglevel</b>	The log level value.

## OSPF LSA

Additional information about OSPF LSA.

<b>lsatype</b>	The LSA type Possible values: <i>Router, network, IP summary, ASBR summary</i> and <i>AS external</i> .
<b>lsaid</b>	The LSA identifier.
<b>lsaadvtr</b>	The originating router for the LSA.

## Dynamic Route

Additional information about events regarding a dynamic route.

<b>event</b>	The dynamic routing event that occurred. Possible values: <i>add, remove, modify, export, unexport</i> and <i>unknown</i> .
<b>from</b>	Originating router process.
<b>to</b>	Destination router process.

## Route

Additional information about a route.

<b>route</b>	Route network.
<b>routeiface</b>	Route destination interface.
<b>routegw</b>	Route gateway.
<b>routemetric</b>	Route metric (cost).

## 1.3. Statistics (usage)

CorePlus periodically sends information about open connections and network load to its log recipients. This is sent once every hour per default.

The category for these log messages is *USAGE*, the severity level is *NOTICE*, and the log message string is *usage*. The log message looks like this in Syslog format:

<b>conns</b>	Number of active connections.
<b>if&lt;number&gt;</b>	The interface name, where <i>number</i> is incremented for each interface.
<b>ip&lt;number&gt;</b>	The IP address of the interface, where <i>number</i> is incremented for each interface.
<b>tp&lt;number&gt;</b>	Throughput of the interface (in Mbps - megabits per second), where <i>number</i> is incremented for each interface.

The EFWLog format includes more detailed information. The following statistics about connections is available in the EFWLog format:

- Connections opened/closed.
- Maximum/minimum number of connections.
- Current number of active connections.

The following statistics is available per interface:

- Bits in/out per second.
- Packets in/out per second.
- Packets dropped per second.

**Note**

*This log messages can not be customized.*

## 1.4. Severity levels

An event has a default severity level, based on how serious the event is. The following eight severity levels are possible, as defined by the Syslog protocol:

<b>0 - Emergency</b>	Emergency conditions, which most likely led to the system being unusable.
<b>1 - Alert</b>	Alert conditions, which affected the functionality of the unit. Needs attention immediately.
<b>2 - Critical</b>	Critical conditions, which affected the functionality of the unit. Action should be taken as soon as possible.
<b>3 - Error</b>	Error conditions, which probably affected the functionality of the unit.
<b>4 - Warning</b>	Warning conditions, which could affect the functionality of the unit.
<b>5 - Notice</b>	Normal, but significant, conditions.
<b>6 - Informational</b>	Informational conditions.
<b>7 - Debug</b>	Debug level events.

### Priority in Syslog Messages

In Syslog messages the priority is indicated by the parameter **prio=*nn***.

### Excluding Logged Messages

CorePlus allows the exclusion from logging of entire categories of log messages or just specific log messages. It is also possible to change the severity level of log messages so that a specific category or a specific message has the severity reset to a particular level when it is sent by CorePlus. These features are documented further in the CorePlus Administrators Guide.

### **Sort Order**

*All log messages are sorted by their category and then by their ID number.*

## **2.1. ALG**

These log messages refer to the **ALG (Events from Application Layer Gateways)** category.

### **2.1.1. alg\_session\_open (ID: 00200001)**

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	ALG session opened
<b>Explanation</b>	A new ALG session has been opened.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name ALG Session ID

Connection

## 2.1.2. alg\_session\_closed (ID: 00200002)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	ALG session closed
<b>Explanation</b>	An ALG session has been closed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.3. max\_line\_length\_exceeded (ID: 00200003)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Maximum line length <max> exceeded, got <len> characters. Closing connection
<b>Explanation</b>	The maximum length of an entered line was exceeded, and the connection will be closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	If the maximum line length is configured too low, increase it.
<b>Revision</b>	1
<b>Parameters</b>	len max
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.4. alg\_session\_allocation\_failure (ID: 00200009)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Failed to allocate ALG session
<b>Explanation</b>	The system failed to allocate an ALG session. The reason for this is either that the total number of concurrent ALG sessions has been reached or that the system has run out of memory.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Increase the number of ALG sessions on services configured with ALGs or try to free up some RAM depending on the situation.
<b>Revision</b>	1

## 2.1.5. invalid\_client\_http\_header\_received (ID: 00200100)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	HTTPALG: Invalid HTTP header was received from the client. Closing Connection. ALG name: <alname>.
<b>Explanation</b>	An invalid HTTP header was received from the client.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Research the source of this and try to find out why the client is sending an invalid header.
<b>Revision</b>	1
<b>Parameters</b>	alname
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.6. invalid\_url\_format (ID: 00200101)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	HTTPALG: Failed to parse the URL requested by the client: <reason>. ALG name: <alname>.
<b>Explanation</b>	The unit failed parsing the requested URL. The reason for this is probably because the requested URL has an invalid format, or it contains invalid UTF8 formatted characters.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Make sure that the requested URL is formatted correctly.
<b>Revision</b>	1
<b>Parameters</b>	reason alname
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.7. unknown\_client\_data\_received (ID: 00200105)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	HTTPALG: Invalid client request - unexpected data received after the client request header. Closing connection. ALG name: <alname>.
<b>Explanation</b>	Data was received after the client request header, although the header specified that no such data should be sent.
<b>Gateway Action</b>	closing_conneccion
<b>Recommended Action</b>	Research the source of this, and try to find out why the client is

---

	sending an invalid request.
<b>Revision</b>	1
<b>Parameters</b>	alname
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.8. suspicious\_data\_received (ID: 00200106)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	HTTPALG: Too much suspicious data has been received from the server. Closing the connection. ALG name: <alname>.
<b>Explanation</b>	The unit is configured to do content blocking, but the data from the server contains too much suspicious data. The unit can not properly determin if this data is a valid or if it should be blocked.
<b>Gateway Action</b>	closing_conneccion
<b>Recommended Action</b>	Research the source of this, and try to find out why the server is sending such large amounts of suspicious data.
<b>Revision</b>	1
<b>Parameters</b>	alname
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.9. invalid\_chunked\_encoding (ID: 00200107)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	HTTPALG: The server sent invalid chunked encoding. Closing connection. ALG name: <alname>.
<b>Explanation</b>	The data received from the server was sent in chunked mode, but it was not properly formatted.
<b>Gateway Action</b>	closing_conneccion
<b>Recommended Action</b>	Research the source of this, and try to find out why the server is sending invalid formatted chunked data.
<b>Revision</b>	1
<b>Parameters</b>	alname
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.10. invalid\_server\_http\_header\_received (ID: 00200108)

<b>Default Severity</b>	WARNING
-------------------------	---------

---

---

<b>Log Message</b>	HTTPALG: An invalid HTTP header was received from the server. Closing connection. ALG name: <alname>.
<b>Explanation</b>	An invalid HTTP header was received from the server.
<b>Gateway Action</b>	closing_concecion
<b>Recommended Action</b>	Research the source of this and try to find out why the server is sending an invalid header.
<b>Revision</b>	1
<b>Parameters</b>	alname
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.11. compressed\_data\_received (ID: 00200109)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	HTTPALG: Compressed data was received from the server, although uncompressed was requested. Closing connection. ALG name: <alname>.
<b>Explanation</b>	The unit requested that no compressed data should be used, but the server ignored this and sent compressed data anyway. As content processing will not work if the data is compressed, the connection will be closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Research the source of this, and try to find out why the server is sending compressed data.
<b>Revision</b>	1
<b>Parameters</b>	alname
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.12. max\_http\_sessions\_reached (ID: 00200110)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	HTTPALG: Maximum number of HTTP sessions (<max_sessions>) for service reached. Closing connection
<b>Explanation</b>	The maximum number of concurrent HTTP sessions has been reached for this service. No more sessions can be opened before old sessions have been released.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	If the maximum number of HTTP sessions is too low, increase it.
<b>Revision</b>	1

---

<b>Parameters</b>	max_sessions
<b>Context Parameters</b>	ALG Module Name

### 2.1.13. failed\_create\_new\_session (ID: 00200111)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	HTTPALG: Failed to create new HTTPALG session (out of memory)
<b>Explanation</b>	An attempt to create a new HTTPALG session failed, because the unit is out of memory.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Decrease the maximum allowed HTTPALG sessions, or try to free some of the RAM used.
<b>Revision</b>	2
<b>Context Parameters</b>	ALG Module Name

### 2.1.14. failure\_connect\_http\_server (ID: 00200112)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	HTTPALG: Failed to connect to the HTTP Server. Closing connection. ALG name: <alname>.
<b>Explanation</b>	The unit failed to connect to the HTTP Server, resulting in that the ALG session could not be successfully opened.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Verify that there is a listening HTTP Server on the specified address.
<b>Revision</b>	1
<b>Parameters</b>	alname
<b>Context Parameters</b>	ALG Module Name ALG Session ID

### 2.1.15. content\_type\_mismatch (ID: 00200113)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	HTTPALG: Content type mismatch in file <filename>. Identified filetype <filetype>
<b>Explanation</b>	The filetype of the file does not match the actual content type. As there is a content type mismatch, data is discarded.
<b>Gateway Action</b>	block_data
<b>Recommended Action</b>	None.

---

---

<b>Revision</b>	1
<b>Parameters</b>	filename filetype contenttype
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.16. wcf\_override\_full (ID: 00200114)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	HTTPALG: WCF override cache full
<b>Explanation</b>	The WCF override hash is full. The oldest least used value will be replaced.
<b>Gateway Action</b>	replace
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name

## 2.1.17. content\_filtering\_disabled (ID: 00200115)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	HTTPALG: Web Content Filtering disabled
<b>Explanation</b>	Web Content Filtering has been disabled due to license restriction.
<b>Gateway Action</b>	no_valid_license
<b>Recommended Action</b>	Extend valid time for Content Filtering.
<b>Revision</b>	2
<b>Context Parameters</b>	ALG Module Name

## 2.1.18. max\_download\_size\_reached (ID: 00200116)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	HTTPALG: The file <filename> with file size <filesize>kB exceeds the maximum allowed download size <max_download_size>kB. Closing connection
<b>Explanation</b>	The data received from the server exceeds the maximum allowed download file size, the request is rejected and the connection is closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	If the configurable maximum download size is too low, increase it.

---

<b>Revision</b>	2
<b>Parameters</b>	filename filesize max_download_size
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.19. blocked\_filetype (ID: 00200117)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	HTTPALG: Requested file:<filename> is blocked as this file is identified as type <filetype>, which is in block list.
<b>Explanation</b>	The file is present in the block list. It will be blocked as per configuration.
<b>Gateway Action</b>	block
<b>Recommended Action</b>	If this file should be allowed, update the ALLOW/BLOCK list.
<b>Revision</b>	2
<b>Parameters</b>	filename filetype
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.20. out\_of\_memory (ID: 00200118)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	HTTPALG: Failed to allocate memory
<b>Explanation</b>	The unit does not have enough available RAM. WCF could not allocate memory for override functionality.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	Try to free up some RAM by changing configuration parameters.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name

## 2.1.21. wcf\_servers\_unreachable (ID: 00200119)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	HTTPALG: Failed to connect to web content servers
<b>Explanation</b>	Web Content Filtering was unable to connect to the Web Content Filtering servers. Verify that the unit has been configured with Internet access.

---

<b>Gateway Action</b>	none
<b>Recommended Action</b>	Check_configuration.
<b>Revision</b>	2
<b>Context Parameters</b>	ALG Module Name

## 2.1.22. wcf\_srv\_connection\_error (ID: 00200120)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	HTTPALG: HTTP request not validated by Web Content Filter and allowed.
<b>Explanation</b>	The Web Content Filtering servers could not be contacted. The request has been allowed since fail-mode parameter is in allow mode.
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	Investigate why the Web Content Filtering servers cannot be reached.
<b>Revision</b>	1
<b>Parameters</b>	alname
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.23. wcf\_server\_unreachable (ID: 00200121)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	HTTPALG: Failed to connect to web content server <failedserver>
<b>Explanation</b>	Web Content Filtering was unable to connect to the Web Content Filtering server. The system will try to contact one of the backup servers.
<b>Gateway Action</b>	switching_server
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	failedserver
<b>Context Parameters</b>	ALG Module Name

## 2.1.24. wcf\_connecting (ID: 00200122)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	HTTPALG:Connecting to web content server <server>
<b>Explanation</b>	Connecting to Web Content Filtering server.

---

<b>Gateway Action</b>	connecting
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	server
<b>Context Parameters</b>	ALG Module Name

## 2.1.25. wcf\_server\_connected (ID: 00200123)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	HTTPALG: Web content server <server> connected
<b>Explanation</b>	The connection with the Web Content server has been established.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	server
<b>Context Parameters</b>	ALG Module Name

## 2.1.26. wcf\_primary\_fallback (ID: 00200124)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	HTTPALG: Falling back from secondary servers to primary server
<b>Explanation</b>	Web Content Filtering falls back to primary server after 60 minutes or when a better server has been detected.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name

## 2.1.27. request\_url (ID: 00200125)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	HTTPALG: Requesting URL <url>. Categories: <categories>. Audit: <audit>. Override: <override>. ALG name: <alname>.
<b>Explanation</b>	The URL has been requested.
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	None.

<b>Parameters</b>	categories audit override url alname
<b>Context Parameters</b>	Connection Connection ALG Module Name ALG Session ID

## 2.1.28. request\_url (ID: 00200126)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	HTTPALG: Requesting URL <url>. Categories: <categories>. Audit: <audit>. Override: <override>. ALG name: <alname>.
<b>Explanation</b>	The URL has been requested.
<b>Gateway Action</b>	block
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	categories audit override url alname
<b>Context Parameters</b>	Connection Connection ALG Module Name ALG Session ID

## 2.1.29. request\_url (ID: 00200129)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	HTTPALG: Requesting URL <url>. Categories: <categories>. Audit: <audit>. Override: <override>. ALG name: <alname>.
<b>Explanation</b>	The URL has been requested.
<b>Gateway Action</b>	allow_audit_mode
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	categories audit override url alname

<b>Context Parameters</b>	Connection Connection ALG Module Name ALG Session ID
---------------------------	---

## 2.1.30. out\_of\_memory (ID: 00200130)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	HTTPALG: Failed to allocate memory
<b>Explanation</b>	The unit does not have enough available RAM.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	Try to free up some RAM by changing configuration parameters.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name

## 2.1.31. restricted\_site\_notice (ID: 00200132)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	HTTPALG: User requests the forbidden URL <url>, eventhough Restricted Site Notice was applied. ALG name: <alname>.
<b>Explanation</b>	The URL has been requested and the categories are forbidden. Restricted Site Notice was applied.
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	Disable the RESTRICTED_SITE_NOTICE mode of parameter CATEGORIES for this ALG.
<b>Revision</b>	2
<b>Parameters</b>	url alname
<b>Context Parameters</b>	Connection Connection ALG Module Name ALG Session ID

## 2.1.32. url\_reclassification\_request (ID: 00200133)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	HTTPALG: Reclassification request for URL <url>. New Category <newcat>. ALG name: <alname>.
<b>Explanation</b>	The user has requested a category reclassification for the URL.
<b>Gateway Action</b>	allow

<b>Recommended Action</b>	Disable the ALLOW_RECLASSIFICATION mode of parameter CATEGORIES for this ALG.
<b>Revision</b>	2
<b>Parameters</b>	newcat url algnam
<b>Context Parameters</b>	Connection Connection ALG Module Name ALG Session ID

### 2.1.33. max\_smtp\_sessions\_reached (ID: 00200150)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTPALG: Maximum number of SMTP sessions (<max_sessions>) for service reached. Closing connection
<b>Explanation</b>	The maximum number of concurrent SMTP sessions has been reached for this service. No more sessions can be opened before old sessions have been released.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	If the maximum number of SMTP sessions is too low, increase it.
<b>Revision</b>	1
<b>Parameters</b>	max_sessions
<b>Context Parameters</b>	ALG Module Name

### 2.1.34. maximum\_email\_per\_minute\_reached (ID: 00200151)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTPALG: Maximum number of emails per client and minute reached.
<b>Explanation</b>	Client is trying to send emails at a rate higher than the configured value.
<b>Gateway Action</b>	session_rejected
<b>Recommended Action</b>	This can be a possible DOS attack.
<b>Revision</b>	2
<b>Parameters</b>	sender_email_address
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.35. failed\_create\_new\_session (ID: 00200152)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	SMTPALG: Failed to create new SMTPALG session (out of memory)
<b>Explanation</b>	An attempt to create a new SMTPALG session failed. The unit has run out of memory.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Decrease the maximum allowed SMTPALG sessions, or try to free some of the RAM used.
<b>Revision</b>	2
<b>Context Parameters</b>	ALG Module Name

## 2.1.36. failed\_connect\_smtp\_server (ID: 00200153)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	SMTPALG: Failed to connect to the SMTP Server. Closing the connection.
<b>Explanation</b>	The SMTP ALG could not connect to the receiving SMTP server, resulting in that the ALG session could not be successfully opened.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	3
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.37. invalid\_server\_response (ID: 00200155)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	SMTPALG: Could not parse server response code
<b>Explanation</b>	The SMTP ALG failed to parse the SMTP response code from server.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	If possible, verify response codes sent from server.
<b>Revision</b>	3
<b>Context Parameters</b>	Connection ALG Module Name ALG Session ID

## 2.1.38. sender\_email\_id\_mismatched (ID: 00200157)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTPALG: Mismatching sender address
<b>Explanation</b>	The SMTP "MAIL FROM:" command does not match the "From:" header. The transaction will be denied.
<b>Gateway Action</b>	reject
<b>Recommended Action</b>	Disable the Verify E-Mail Sender ID setting if you experience that valid e-mails are being wrongly blocked.
<b>Revision</b>	3
<b>Parameters</b>	sender_email_address recipient_email_addresses data_sender_address
<b>Context Parameters</b>	ALG Module Name ALG Session ID

### 2.1.39. sender\_email\_id\_is\_in\_blacklist (ID: 00200158)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTPALG: Sender e-mail address is in Black List
<b>Explanation</b>	Since "MAIL FROM:" Email Id is in Black List, SMTP ALG rejected the Client request.
<b>Gateway Action</b>	reject
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	sender_email_address
<b>Context Parameters</b>	ALG Module Name ALG Session ID

### 2.1.40. recipient\_email\_id\_in\_blacklist (ID: 00200159)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTPALG: Recipient e-mail address is in Black List
<b>Explanation</b>	Since "RCPT TO:" e-mail address is in Black List, SMTP ALG rejected the client request.
<b>Gateway Action</b>	reject
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	sender_email_address recipient_email_addresses

**Context Parameters**      ALG Module Name  
                                 ALG Session ID

## 2.1.41. some\_recipient\_email\_ids\_are\_in\_blocklist (ID: 00200160)

**Default Severity**      WARNING

**Log Message**            SMTPALG: Some recipients email id are in Black List

**Explanation**            Since some "RCPT TO:" Email ids are in Black List, SMTP ALG has blocked mail to those recipients.

**Gateway Action**        reject

**Recommended Action**    Emails can be forwarded only to the Non-Black List users.

**Revision**                1

**Parameters**             sender\_email\_address  
                             recipient\_email\_addresses

**Context Parameters**      ALG Module Name  
                                 ALG Session ID

## 2.1.42. base64\_decode\_failed (ID: 00200164)

**Default Severity**      ERROR

**Log Message**            SMTPALG: Base 64 decode failed. Attachment blocked

**Explanation**            The base64 encoded attachment could not be decoded. This can occur if the email sender sends incorrectly formatted data. The attachment has been blocked.

**Gateway Action**        block\_allow

**Recommended Action**    Research how the sender is encoding the data.

**Revision**                2

**Parameters**             filename  
                             filetype  
                             sender\_email\_address  
                             recipient\_email\_addresses

**Context Parameters**      ALG Module Name  
                                 ALG Session ID

## 2.1.43. base64\_decode\_failed (ID: 00200165)

**Default Severity**      ERROR

**Log Message**            SMTPALG: Base 64 decode failed. Attachment is allowed

**Explanation**            The data sent to Base64 decoding failed. This can occur if the email

---

	sender sends incorrectly formatted data. Fail-mode is set to allow so data will be forwarded.
<b>Gateway Action</b>	allow_block
<b>Recommended Action</b>	Research how the sender is encoding the data.
<b>Revision</b>	2
<b>Parameters</b>	filename filetype sender_email_address recipient_email_addresses
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.44. blocked\_filetype (ID: 00200166)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	SMTPALG: Requested file:<filename> is blocked as this file is identified as type <filetype>, which is in block list.
<b>Explanation</b>	The file is present in the block list. It will be blocked as per configuration.
<b>Gateway Action</b>	block
<b>Recommended Action</b>	If this file should be allowed, update the ALLOW/BLOCK list.
<b>Revision</b>	2
<b>Parameters</b>	filename filetype sender_email_address recipient_email_addresses
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.45. content\_type\_mismatch (ID: 00200167)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTPALG: Content type mismatch in file <filename>. Identified filetype <filetype>
<b>Explanation</b>	The filetype of the file does not match the actual content type. As there is a content type mismatch, data is discarded.
<b>Gateway Action</b>	block_data
<b>Recommended Action</b>	None.
<b>Revision</b>	4
<b>Parameters</b>	filename filetype

	sender_email_address recipient_email_addresses
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.46. max\_email\_size\_reached (ID: 00200170)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTPALG: Maximum email size limit <max_email_size>kb reached
<b>Explanation</b>	Email body and all attachments size of email has crossed the limitation.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	sender_email_address recipient_email_addresses max_email_size
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.47. content\_type\_mismatch\_mimecheck\_disabled (ID: 00200171)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	SMTPALG: Content type mismatch found for the file <filename>. It is identified as type <filetype> file
<b>Explanation</b>	Received type of data in the packet and its actual type do not match. As there is a mismatch and mime type check is disabled, the data will be allowed.
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	Content type should be matched.
<b>Revision</b>	3
<b>Parameters</b>	filename filetype sender_email_address recipient_email_addresses
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.48. all\_recipient\_email\_ids\_are\_in\_blocklist (ID: 00200172)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTPALG: All recipients e-mail addresses are in Black List
<b>Explanation</b>	Since "RCPT TO:" email ids are in Black List, SMTP ALG rejected the client request.
<b>Gateway Action</b>	reject
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	sender_email_address recipient_email_addresses
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.49. out\_of\_memory (ID: 00200175)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	SMTPALG: Failed to allocate memory (out of memory)
<b>Explanation</b>	An attempt to allocate memory failed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Try to free up unwanted memory.
<b>Revision</b>	3
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.50. invalid\_end\_of\_mail (ID: 00200176)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTPALG: Invalid end of mail "\\n.\\n" received.
<b>Explanation</b>	The client is sending invalid end of mail. Transaction will be terminated.
<b>Gateway Action</b>	block
<b>Recommended Action</b>	Research how the client is sending invalid end of mail.
<b>Revision</b>	1
<b>Parameters</b>	sender_email_address recipient_email_addresses
<b>Context Parameters</b>	ALG Module Name ALG Session ID

**2.1.51. dnsbl\_init\_error (ID: 00200177)**

<b>Default Severity</b>	ERROR
<b>Log Message</b>	DNSbl internal error
<b>Explanation</b>	The email could not be checked for spam. Email will be processed without spam checks.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Context Parameters</b>	ALG Module Name ALG Session ID

**2.1.52. cmd\_too\_long (ID: 00200179)**

<b>Default Severity</b>	ERROR
<b>Log Message</b>	SMTPALG: Command line too long
<b>Explanation</b>	The SMTP Command line exceeds the maximum command length of 712 characters. (RFC 2821 Ch. 4.5.3.1 says 512).
<b>Gateway Action</b>	reject
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Context Parameters</b>	ALG Module Name ALG Session ID

**2.1.53. cmd\_empty (ID: 00200180)**

<b>Default Severity</b>	DEBUG
<b>Log Message</b>	SMTPALG: Received empty command.
<b>Explanation</b>	The SMTP command line was empty. Ignoring command.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name ALG Session ID

**2.1.54. failed\_send\_reply\_code (ID: 00200181)**

<b>Default Severity</b>	ERROR
-------------------------	-------

<b>Log Message</b>	SMTPALG: Could not send error code to client
<b>Explanation</b>	The SMTP ALG failed to send an error response code to the client.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.55. smtp\_no\_header (ID: 00200184)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTPALG: Email without SMTP headers received
<b>Explanation</b>	The SMTP ALG received an email without headers.
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.56. unsupported\_extension (ID: 00200185)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	SMTPALG: Removed capability <capa> from EHLO response
<b>Explanation</b>	The SMTP ALG removed the [capa] capability from the EHLO response since the ALG does not support the specified extension.
<b>Gateway Action</b>	capability_removed
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	capa
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.57. cmd\_pipelined (ID: 00200186)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	SMTPALG: Received pipelined request.
<b>Explanation</b>	The SMTP ALG does not support pipelined requests. The appearance

of this log message indicates that the client used PIPELINING even though it was removed from capability list.

<b>Gateway Action</b>	reject
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.58. smtp\_state\_violation (ID: 00200190)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTPALG: State violation: <violation>.
<b>Explanation</b>	The client sent an invalid sequence of commands. The protocol violation is explained by the [violation] parameter.
<b>Gateway Action</b>	reject
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	violation
<b>Context Parameters</b>	Connection ALG Module Name ALG Session ID

## 2.1.59. sender\_email\_dnsbl\_spam\_mark\_removed\_by\_whitelist (ID: 00200195)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTPALG: Whitelist override DNSBL result for Email.
<b>Explanation</b>	Email was marked as SPAM by DNSBL. As Email Id was matched in whitelist, this mark is removed.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	sender_email_address
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.60. illegal\_data\_direction (ID: 00200202)

---

<b>Default Severity</b>	ERROR
<b>Log Message</b>	FTPALG: TCP data from <peer> not allowed in this direction. Closing connection
<b>Explanation</b>	TCP Data was sent in an invalid direction, and the connection will be closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	peer
<b>Context Parameters</b>	ALG Module Name ALG Session ID Rule Information Connection

### 2.1.61. hybrid\_data (ID: 00200206)

## 2.1.81. illegal\_reply (ID: 00200230)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	FTPALG: Illegal multiline response (<reply>) from <peer>. String=<string>. Closing connection.
<b>Explanation</b>	An illegal multiline response was received from server, and the connection will be closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	peer reply string
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.1.82. illegal\_reply (ID: 00200231)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	FTPALG: Unsolicited 227 (passive mode) response from <peer>. String=<string>. Closing connection.
<b>Explanation</b>	An illegal response was received from the server, and the connection is closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1

<b>Parameters</b>	peer string
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.1.83. illegal\_reply (ID: 00200232)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	FTPALG: Reply 229 (extended passive mode) from <peer> is not allowed. String=<string>. Closing connection.
<b>Explanation</b>	An illegal response was received from the server, and the connection is closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	peer string
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.1.84. bad\_port (ID: 00200233)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	FTPALG: Bad port <port> from <peer>, should be within the range (<range>). String=<string>. Closing connection.
<b>Explanation</b>	An illegal "PORT" command was received from the server. It requests that the client should connect to a port which is out of range. This is not allowed, and the connection will be closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	The FTP server could be compromised, and should not be trusted.
<b>Revision</b>	1
<b>Parameters</b>	peer port range string
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.1.85. bad\_ip (ID: 00200234)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	FTPALG: Invalid IP <ip4addr>, Server IP is <ip4addr_server>. String=<string>. Closing connection.
<b>Explanation</b>	The FTP Server requests that the client should connect to another IP that it's own. This is not allowed, and the connection will be closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	The FTP server could be compromised, and should not be trusted.
<b>Revision</b>	1
<b>Parameters</b>	peer ip4addr ip4addr_server string
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.1.86. failed\_to\_create\_connection2 (ID: 00200235)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	FTPALG: Failed to create connection(2) Peer=<peer> Connection=<connection>. String=<string>.
<b>Explanation</b>	An error occurred when creating a data connection from the client to server. This could possibly be a result of lack of memory.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	peer connection string
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.1.87. failed\_to\_create\_server\_data\_connection (ID: 00200236)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	FTPALG: Failed to create server data connection. Peer=<peer> Connection=<connection>
<b>Explanation</b>	An error occurred when creating server data connection.

---

---

<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	peer connection
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.1.88. failed\_to\_send\_port (ID: 00200237)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	FTPALG: Failed to send port. Peer=<peer>
<b>Explanation</b>	An error occurred when trying to send the "PORT" command to the server.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	peer
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.1.89. failed\_to\_register\_rawconn (ID: 00200238)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	FTPALG: Internal Error - failed to register eventhandler. Closing connection
<b>Explanation</b>	An internal error occurred when registering an eventhandler, and the connection will be closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Contact the support.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name

## 2.1.90. failed\_to\_merge\_conns (ID: 00200239)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	FTPALG: Internal Error - failed to merge conns. Closing connection

---

<b>Explanation</b>	An internal error occurred when two connections were being merged into one, and the connection will be closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Contact the support.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name

## 2.1.91. max\_ftp\_sessions\_reached (ID: 00200241)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	FTPALG: Maximum number of FTP sessions (<max_sessions>) for service reached. Closing connection
<b>Explanation</b>	The maximum number of concurrent FTP sessions has been reached for this service. No more sessions can be opened before old sessions have been released.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	If the maximum number of FTP sessions is too low, increase it.
<b>Revision</b>	1
<b>Parameters</b>	max_sessions
<b>Context Parameters</b>	ALG Module Name

## 2.1.92. failed\_create\_new\_session (ID: 00200242)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	FTPALG: Failed to create new FTPALG session (out of memory)
<b>Explanation</b>	An attempt to create a new FTPALG session failed, because the unit is out of memory.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Decrease the maximum allowed FTPALG sessions, or try to free some of the RAM used.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name

## 2.1.93. failure\_connect\_ftp\_server (ID: 00200243)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	FTPALG: Failed to connect to the FTP Server. Closing connection
<b>Explanation</b>	The unit failed to connect to the FTP Server, resulting in that the ALG

---

	session could not be successfully opened.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Verify that there is a listening FTP Server on the specified address.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.94. content\_type\_mismatch (ID: 00200250)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	FTPALG: Content type mismatch in file <filename>. Identified filetype <filetype>
<b>Explanation</b>	The filetype of the file does not match the actual content type. As there is a content type mismatch, data is discarded.
<b>Gateway Action</b>	data_blocked_control_and_data_channel_closed
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	filename filetype
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.95. failed\_to\_send\_command (ID: 00200251)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	FTPALG:Failed to send the command.
<b>Explanation</b>	The command sent by the ALG to the server could not be sent.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name

## 2.1.96. resumed\_compressed\_file\_transfer (ID: 00200252)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	FTPALG: The file <filename> (File type: <filetype> ) cannot be sent to antivirus scan engine.
<b>Explanation</b>	The data cannot be sent to AVSE for scanning since file transfer

---

	begins from within the middle of the file. The scanning process will fail for compressed files.
<b>Gateway Action</b>	data_blocked_control_and_data_channel_closed
<b>Recommended Action</b>	Change fail mode setting to allow, if resumed file transfers of compressed files should be allowed.
<b>Revision</b>	2
<b>Parameters</b>	filename filetype
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.97. blocked\_filetype (ID: 00200253)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	FTPALG: Requested file:<filename> is blocked as this file is identified as type <filetype>, which is in block list.
<b>Explanation</b>	The file is present in the block list. It will be blocked as per configuration.
<b>Gateway Action</b>	data_blocked_control_and_data_channel_closed
<b>Recommended Action</b>	If this file should be allowed, update the ALLOW/BLOCK list.
<b>Revision</b>	2
<b>Parameters</b>	filename filetype
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.98. resumed\_compressed\_file\_transfer (ID: 00200254)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	FTPALG: The file <filename> (File type: <filetype> ) cannot be sent to antivirus scan engine.
<b>Explanation</b>	Decompression module cannot decompress a file that has been resumed. The file is allowed without any further scanning since Fail Mode is Allow.
<b>Gateway Action</b>	allow_data_without_scan
<b>Recommended Action</b>	Update Fail-Mode parameter if the file should be blocked.
<b>Revision</b>	2
<b>Parameters</b>	filename filetype
<b>Context Parameters</b>	ALG Module Name

---

ALG Session ID

## 2.1.99. failed\_to\_send\_response\_code (ID: 00200255)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	FTPALG:Failed to send the response code.
<b>Explanation</b>	The FTP ALG could not send the correct response code to the client.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name

## 2.1.100. illegal\_command (ID: 00200267)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	FTPALG: REST from <peer> not allowed, rejecting command
<b>Explanation</b>	The client tried to issue a "REST" command, which is not valid since the client is not allowed to do this. The command will be rejected.
<b>Gateway Action</b>	rejecting_command
<b>Recommended Action</b>	If the client should be allowed to do issue "REST" commands, modify the FTPALG configuration.
<b>Revision</b>	1
<b>Parameters</b>	filename peer
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.1.101. unknown\_state (ID: 00200300)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	H323ALG: H.225 parser is in unknown state
<b>Explanation</b>	The H.225 parser failed to parse the H.225 message. The ALG session will be closed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	peer

### 2.1.127. unknown\_option\_blocked (ID: 00200359)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TFTPALG: Request contained unknown option <option>
<b>Explanation</b>	Request contained unknown option.Closing connection.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	If connection should be allowed modify the TFTP Alg configuration .
<b>Revision</b>	1
<b>Parameters</b>	option
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

### 2.1.128. option\_not\_sent (ID: 00200360)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TFTPALG: The received option <option> was not sent
<b>Explanation</b>	The received option was not sent.Closing connection.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	option
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

### 2.1.129. option\_value\_invalid (ID: 00200361)

---

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TFTPALG: Option <option> contained invalid value <value> or option not sent
<b>Explanation</b>	Option contained invalid value or option not sent.Closing connection.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	option value
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

### 2.1.130. option\_value\_invalid (ID: 00200362)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TFTPALG: Option <option> contained no readable value
<b>Explanation</b>	Option contained no readable value.Closing connection.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	option
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

### 2.1.131. blksize\_out\_of\_range (ID: 00200363)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TFTPALG: Option blksize value <old_blksize> exceeding allowed value. Rewriting to <new_blksize>
<b>Explanation</b>	Option blksize value exceeding allowed value.Rewriting value.
<b>Gateway Action</b>	rewrite
<b>Recommended Action</b>	If the value should be allowed modify the TFTP Alg configuration.
<b>Revision</b>	1
<b>Parameters</b>	old_blksize new_blksize

<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection
---------------------------	---

## 2.1.132. max\_tftp\_sessions\_reached (ID: 00200364)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TFTPALG: Maximum number of TFTP sessions (<max_sessions>) for service reached. Closing connection
<b>Explanation</b>	The maximum number of concurrent TFTP sessions has been reached for this service. No more sessions can be opened before old sessions have been released.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	If the maximum number of TFTP sessions is too low, increase it.
<b>Revision</b>	1
<b>Parameters</b>	max_sessions
<b>Context Parameters</b>	ALG Module Name

## 2.1.133. failed\_create\_new\_session (ID: 00200365)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	TFTPALG: Failed to create new TFTPALG session (out of memory)
<b>Explanation</b>	An attempt to create a new TFTPALG session failed, because the unit is out of memory.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Decrease the maximum allowed TFTPALG sessions, or try to free some of the RAM used.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name

## 2.1.134. invalid\_packet\_received (ID: 00200366)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TFTPALG: Received invalid packet Opcode <opcode> Packet length <packet_length>
<b>Explanation</b>	Received invalid packet.Closing connection.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1

---

<b>Parameters</b>	opcode packet_length
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.1.135. failed\_create\_connection (ID: 00200367)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	TFTPALG: Failed to create listening connection,internal error(<error_code>). Closing session
<b>Explanation</b>	The unit failed to create listening connection, resulting in that the ALG session could not be successfully opened.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	error_code
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.136. invalid\_packet\_received\_reopen (ID: 00200368)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TFTPALG: Received invalid packet Opcode <opcode> Packet length <packet_length>
<b>Explanation</b>	Received invalid packet.Closing listening connection and opening new instead.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	opcode packet_length
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.1.137. packet\_out\_of\_sequence (ID: 00200369)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TFTPALG: Received packet out of sequence opcode <opcode> packet length <packet_length>

---

---

<b>Explanation</b>	Received packet out of sequence.Closing connection.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	opcode packet_length
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

### 2.1.138. transfer\_size\_exceeded (ID: 00200370)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TFTPALG: Received bytes <received> exceeding allowed max value <maxvalue>
<b>Explanation</b>	Transferred bytes exceeding allowed value.Closing connection.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	If connection should be allowed modify the filetransfersize option of the TFTP Alg configuration .
<b>Revision</b>	1
<b>Parameters</b>	received maxvalue
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

### 2.1.139. options\_removed (ID: 00200371)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TFTPALG: Options not allowed. Stripping options from packet
<b>Explanation</b>	Options not allowed. Stripping options from packet.
<b>Gateway Action</b>	rewrite
<b>Recommended Action</b>	If options should be allowed modify the TFTP Alg configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

### 2.1.140. failed\_strip\_option (ID: 00200372)

---

<b>Default Severity</b>	ERROR
<b>Log Message</b>	TFTPALG: Failed to strip options , (internal error)
<b>Explanation</b>	An attempt to send request packet without options failed because of an internal error.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name

### 2.1.141. failed\_create\_connection (ID: 00200373)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	TFTPALG: Failed to create listening connection,internal error(<error_code>). Closing session
<b>Explanation</b>	The unit failed to create listening connection, resulting in that the ALG session could not be successfully opened.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	error_code
<b>Context Parameters</b>	ALG Module Name

### 2.1.142. invalid\_error\_message\_received (ID: 00200374)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TFTPALG: Received invalid error message Opcode <opcode> Packet length <packet_length>
<b>Explanation</b>	Received invalid error message.Closing connection.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	opcode packet_length
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.1.143. max\_pop3\_sessions\_reached (ID: 00200380)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	POP3ALG: Maximum number of POP3 sessions (<max_sessions>) for service reached. Closing connection
<b>Explanation</b>	The maximum number of concurrent POP3 sessions has been reached for this service. No more sessions can be opened before old sessions have been released.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	If the maximum number of POP3 sessions is too low, increase it.
<b>Revision</b>	1
<b>Parameters</b>	max_sessions
<b>Context Parameters</b>	ALG Module Name

## 2.1.144. failed\_create\_new\_session (ID: 00200381)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	POP3ALG: Failed to create new POP3ALG session (out of memory)
<b>Explanation</b>	An attempt to create a new POP3ALG session failed, because the unit is out of memory.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Decrease the maximum allowed POP3ALG sessions, or try to free some of the RAM used.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name

## 2.1.145. failed\_connect\_pop3\_server (ID: 00200382)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	POP3ALG: Failed to connect to the POP3 Server. Closing the connection.
<b>Explanation</b>	The unit failed to connect to the remote POP3 Server, resulting in that the ALG session could not be successfully opened.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Verify that there is a listening POP3 Server on the specified address.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name ALG Session ID

**2.1.146. out\_of\_memory (ID: 00200383)**

<b>Default Severity</b>	ERROR
<b>Log Message</b>	POP3ALG: Failed to allocate memory (out of memory)
<b>Explanation</b>	An attempt to allocate memory failed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Try to free up unwanted memory.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name ALG Session ID

**2.1.147. blocked\_filetype (ID: 00200384)**

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	POP3ALG: Requested file:<filename> is blocked as this file is identified as type <filetype>, which is in block list.
<b>Explanation</b>	The file is present in the block list. It will be blocked as per configuration.
<b>Gateway Action</b>	block
<b>Recommended Action</b>	If this file should be allowed, update the ALLOW/BLOCK list.
<b>Revision</b>	1
<b>Parameters</b>	filename filetype sender_email_address
<b>Context Parameters</b>	ALG Module Name ALG Session ID

**2.1.148. response\_blocked\_unknown (ID: 00200385)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	POP3ALG: Response blocked.Invalid response=<response>
<b>Explanation</b>	The server is sending unknown response. The response will be blocked.
<b>Gateway Action</b>	block
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	command" response

---

<b>Context Parameters</b>	ALG Module Name ALG Session ID
---------------------------	-----------------------------------

## 2.1.149. base64\_decode\_failed (ID: 00200386)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	POP3ALG: Base 64 decode failed. Attachment blocked
<b>Explanation</b>	The data sent to Base64 decoding failed. This can occur if the email sender sends incorrectly formatted data. The attachment has been blocked.
<b>Gateway Action</b>	block_data
<b>Recommended Action</b>	Research how the sender is encoding the data.
<b>Revision</b>	1
<b>Parameters</b>	filename filetype sender_email_address
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.150. possible\_invalid\_mail\_end (ID: 00200387)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	POP3ALG: Possible invalid end of mail "\\n.\\n" received.
<b>Explanation</b>	The client is sending possible invalid end of mail.
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	Research how the client is sending possible invalid end of mail.
<b>Revision</b>	1
<b>Parameters</b>	sender_email_address
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.151. command\_blocked\_invalid\_len (ID: 00200388)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	POP3ALG: Command line blocked,line begins with linebegin. Invalid line length <len>
<b>Explanation</b>	The client is sending command with invalid command length. The command will be blocked.
<b>Gateway Action</b>	block

---

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	len linebegin"
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.152. response\_blocked\_invalid\_len (ID: 00200389)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	POP3ALG: Response blocked.Invalid response length <len>
<b>Explanation</b>	The server is sending response with invalid response length. The response will be blocked.
<b>Gateway Action</b>	block
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	command" len
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.153. content\_type\_mismatch (ID: 00200390)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	POP3ALG: Content type mismatch in file <filename>. Identified filetype <filetype>
<b>Explanation</b>	The filetype of the file does not match the actual content type. As there is a content type mismatch, data is discarded.
<b>Gateway Action</b>	block_data
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	filename filetype sender_email_address
<b>Context Parameters</b>	ALG Module Name

## 2.1.154. content\_type\_mismatch\_mimecheck\_disabled (ID: 00200391)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	POP3ALG: Content type mismatch found for the file <filename>. It is identified as type <filetype> file
<b>Explanation</b>	Received type of data in the packet and its actual type do not match. As there is a mismatch and mime type check is disabled, the data will be allowed.
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	Content type should be matched.
<b>Revision</b>	2
<b>Parameters</b>	filename filetype sender_email_address
<b>Context Parameters</b>	ALG Module Name

### 2.1.155. command\_blocked\_invalid\_argument (ID: 00200392)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	POP3ALG: Command blocked.Invalid argument <argument> given
<b>Explanation</b>	The client is sending command with invalid argument. The command will be blocked.
<b>Gateway Action</b>	block
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	command" argument
<b>Context Parameters</b>	ALG Module Name ALG Session ID

### 2.1.156. command\_blocked (ID: 00200393)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	POP3ALG: Command <command> blocked.
<b>Explanation</b>	The client is sending command that are not allowed. The command will be blocked.
<b>Gateway Action</b>	block
<b>Recommended Action</b>	If the command are to be allowed change the Alg configuration.Note: The STLS command is allways blocked!.
<b>Revision</b>	1

<b>Parameters</b>	command
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.157. unknown\_command\_blocked (ID: 00200394)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	POP3ALG: Unknown command blocked.
<b>Explanation</b>	The client is sending unknown command. The command will be blocked.
<b>Gateway Action</b>	block
<b>Recommended Action</b>	If the command are to be allowed change the Alg configuration.
<b>Revision</b>	1
<b>Parameters</b>	command"
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.158. unexpected\_mail\_end (ID: 00200396)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	POP3ALG: Unexpected end of mail received while parsing mail content.
<b>Explanation</b>	Unexpected end of mail received while parsing mail content..
<b>Gateway Action</b>	block
<b>Recommended Action</b>	Research if mail is not complete.
<b>Revision</b>	1
<b>Parameters</b>	sender_email_address len retrigs
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.159. invalid\_line\_endings (ID: 00200397)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	POP3ALG: Mail contains invalid line endings.
<b>Explanation</b>	Mail contains invalid line endings.
<b>Gateway Action</b>	block

<b>Recommended Action</b>	Research why mail contains invalid line endings.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.160. top\_mail\_end\_blocked (ID: 00200398)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	POP3ALG: The last part of mail retrieved with TOP command blocked.
<b>Explanation</b>	Only part of mail retrieved using TOP command was received. The last part was therefore blocked by the Security Gateway.
<b>Gateway Action</b>	block
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	len retrigs
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.1.161. sdp\_message\_parsing\_failed (ID: 00200501)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	SIPALG: SDP message parsing failed
<b>Explanation</b>	SDP part of message failed parsing due to malformed message. Reason: [reason].

## 2.2. ANTISPAM

These log messages refer to the **ANTISPAM (Anti-spam related events)** category.

### 2.2.1. recipient\_email\_changed\_to\_drop\_address (ID: 05900196)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	SMTPALG: Recipient e-mail address is changed to DNSBL Drop address
<b>Explanation</b>	"RCPT TO:" e-mail address is changed to the Drop address configured in DNS Blacklist.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	sender_email_address drop_address
<b>Context Parameters</b>	ALG Module Name ALG Session ID

### 2.2.2. dnsbl\_allocate\_error (ID: 05900800)

<b>Default Severity</b>	EMERGENCY
<b>Log Message</b>	Could not allocate memory
<b>Explanation</b>	Could not allocate memory.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	Check memory.
<b>Revision</b>	1
<b>Parameters</b>	type

### 2.2.3. dnsbl\_ipcache\_add (ID: 05900810)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	IP <ipaddr> added to IP Cache for <alname>
<b>Explanation</b>	An IP address was added to the IP Cache.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1

---

<b>Parameters</b>	type alname ipaddr
-------------------	--------------------------

## 2.2.4. dnsbl\_ipcache\_remove (ID: 05900811)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	IP <ipaddr> removed from IP Cache for <alname> due to timeout
<b>Explanation</b>	An IP address was removed from the IP Cache due to timeout.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	type alname ipaddr

## 2.2.5. dnsbl\_session\_add (ID: 05900812)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Session created for IP <ipaddr> for <alname>
<b>Explanation</b>	Session created and awaiting processing.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	type alname ipaddr

## 2.2.6. dnsbl\_session\_error (ID: 05900813)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Error creating Session for IP <ipaddr> for <alname>
<b>Explanation</b>	Error creating new Session.
<b>Gateway Action</b>	dnsbl will not process mail
<b>Recommended Action</b>	Check configuration and dns settings.
<b>Revision</b>	1
<b>Parameters</b>	type alname ipaddr

---

## 2.2.7. dnsbl\_ipcache\_add (ID: 05900814)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Session for IP <ipaddr> for <alname> is done with result <result>
<b>Explanation</b>	An IP address was added to the IP Cache.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	type alname ipaddr result

## 2.2.8. dnsbl\_disabled (ID: 05900815)

<b>Default Severity</b>	EMERGENCY
<b>Log Message</b>	DNSBL for <alname> has been disabled
<b>Explanation</b>	The DNSBL has been disabled due to few active BlackLists.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	Check configuration of DNSBL.
<b>Revision</b>	1
<b>Parameters</b>	type alname

## 2.2.9. dnsbl\_active (ID: 05900816)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	DNSBL for <alname> has been activated
<b>Explanation</b>	The DNSBL has changed status from disabled to active as contact with BlackLists have been restored.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	type alname

## 2.2.10. dnsbl\_query\_add (ID: 05900817)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Query created for IP <ipaddr> to BlackList <blacklist> for <alname>
<b>Explanation</b>	A DNS Query was created.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	type alname ipaddr blacklist query

## 2.2.11. dnsbl\_blacklist\_disable (ID: 05900818)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	BlackList <blacklist> for <alname> has been disabled
<b>Explanation</b>	BlackList was disable as it failed to respond to the query.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	Check configuration if keeps begin disabled.
<b>Revision</b>	1
<b>Parameters</b>	type alname blacklist

## 2.2.12. dnsbl\_txtrecord\_truncated (ID: 05900819)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TXT records does not fit buffer for Session with IP <ipaddr> for <alname>
<b>Explanation</b>	TXT records will not fit the string buffer and will be truncated.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	type alname ipaddr

## 2.2.13. dnsbl\_record\_truncated (ID: 05900820)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	DNSBL name not fit buffer for Session with IP <ipaddr> for <alname>
<b>Explanation</b>	DNSBL name will not fit the string buffer and will be truncated.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	type alname ipaddr

## 2.3. ANTIVIRUS

These log messages refer to the **ANTIVIRUS (Anti-virus related events)** category.

### 2.3.1. virus\_found (ID: 05800001)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Virus found in file <filename>. Virus Name: <virusname>. Signature: <virussig>. Advisory ID: <advisoryid>.
<b>Explanation</b>	A virus has been detected in a data stream. Since anti-virus is running in protect mode, the data transfer will be aborted in order to protect the receiver.
<b>Gateway Action</b>	block_data
<b>Recommended Action</b>	If the infected file is local, run anti-virus program to clean the file.
<b>Revision</b>	1
<b>Parameters</b>	filename virusname virussig advisoryid [layer7_srcinfo] [layer7_dstinfo]
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

### 2.3.2. virus\_found (ID: 05800002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Virus found in file <filename>. Virus Name: <virusname>. Signature: <virussig>. Advisory ID: <advisoryid>.
<b>Explanation</b>	A virus has been detected in a data stream. Since anti-virus is running in audit mode, the data transfer will be allowed to continue.
<b>Gateway Action</b>	allow_data
<b>Recommended Action</b>	If the infected file is local, run anti-virus program to clean the file.
<b>Revision</b>	1
<b>Parameters</b>	filename virusname virussig advisoryid [layer7_srcinfo] [layer7_dstinfo]
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

### 2.3.3. excluded\_file (ID: 05800003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	File <filename> is excluded from scanning. Identified filetype: <filetype>.
<b>Explanation</b>	The named file will be excluded from anti-virus scanning. The filetype is present in the anti-virus scan exclusion list.
<b>Gateway Action</b>	allow_data_without_scan
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	filename filetype [layer7_srcinfo] [layer7_dstinfo]
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

### 2.3.4. decompression\_failed (ID: 05800004)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Decompression error for file <filename>
<b>Explanation</b>	The file could not be scanned by the anti-virus module since the decompression of the compressed file failed. Since anti-virus is running in protect mode, the data transfer will be aborted in order to protect the receiver.
<b>Gateway Action</b>	block_data
<b>Recommended Action</b>	Change Fail Mode parameter to allow if files that fail decompression should be allowed without scanning.
<b>Revision</b>	1
<b>Parameters</b>	filename [layer7_srcinfo] [layer7_dstinfo]
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

### 2.3.5. decompression\_failed (ID: 05800005)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Decompression error for file <filename>

---

<b>Explanation</b>	The file could not be scanned by the anti-virus module since the decompression of the compressed file failed. Since anti-virus is running in audit mode, the data transfer will be allowed to continue.
<b>Gateway Action</b>	allow_data
<b>Recommended Action</b>	Change Fail Mode parameter to deny if files that fail decompression should be blocked.
<b>Revision</b>	1
<b>Parameters</b>	filename [layer7_srcinfo] [layer7_dstinfo]
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.3.6. compression\_ratio\_violation (ID: 05800006)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Compression ratio violation for file <filename>. Compression ratio threshold: <comp_ratio>
<b>Explanation</b>	Anti-virus has scanned a compressed file with a compression ratio higher than the specified value. Action is set to continue scan.
<b>Gateway Action</b>	continue_scan
<b>Recommended Action</b>	Files with too high compression ratio can consume large amount of resources. This can be a DOS attack.
<b>Revision</b>	1
<b>Parameters</b>	filename comp_ratio [layer7_srcinfo] [layer7_dstinfo]
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.3.7. compression\_ratio\_violation (ID: 05800007)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Compression ratio violation for file <filename>. Compression ratio threshold: <comp_ratio>
<b>Explanation</b>	Anti-virus has scanned a compressed file with a compression ratio higher than the specified value. Action is set to continue scan.
<b>Gateway Action</b>	abort_scan
<b>Recommended Action</b>	Files with too high compression ratio can consume large amount of resources. This can be a DOS attack.

---

<b>Revision</b>	1
<b>Parameters</b>	filename comp_ratio [layer7_srcinfo] [layer7_dstinfo]
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.3.8. compression\_ratio\_violation (ID: 05800008)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Compression ratio violation for file <filename>. Compression ratio threshold: <comp_ratio>
<b>Explanation</b>	Anti-virus has scanned a compressed file with a compression ratio higher than the specified value. Action is set to continue scan.
<b>Gateway Action</b>	block_data
<b>Recommended Action</b>	Files with too high compression ratio can consume large amount of resources. This can be a DOS attack.
<b>Revision</b>	1
<b>Parameters</b>	filename comp_ratio [layer7_srcinfo] [layer7_dstinfo]
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.3.9. out\_of\_memory (ID: 05800009)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Out of memory
<b>Explanation</b>	Memory allocation failed. Since anti-virus is running in audit mode, the data transfer will be allowed to continue.
<b>Gateway Action</b>	allow_data
<b>Recommended Action</b>	Try to free some memory by changing configuration parameters.
<b>Revision</b>	1
<b>Parameters</b>	filename filetype [layer7_srcinfo] [layer7_dstinfo]
<b>Context Parameters</b>	ALG Module Name ALG Session ID

---

---

Connection

## 2.3.10. out\_of\_memory (ID: 05800010)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Out of memory
<b>Explanation</b>	Memory allocation failed. Since anti-virus is running in protect mode, the data transfer will be aborted in order to protect the receiver.
<b>Gateway Action</b>	block_data
<b>Recommended Action</b>	Try to free some memory by changing configuration parameters.
<b>Revision</b>	1
<b>Parameters</b>	filename filetype [layer7_srcinfo] [layer7_dstinfo]
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.3.11. virus\_scan\_failure (ID: 05800011)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Anti-virus scan engine failed for the file: <filename>
<b>Explanation</b>	An error occurred in the anti-virus scan engine. Since anti-virus is running in protect mode, the data transfer will be aborted in order to protect the receiver.
<b>Gateway Action</b>	block_data
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	filename [layer7_srcinfo] [layer7_dstinfo]
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

## 2.3.12. virus\_scan\_failure (ID: 05800012)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Anti-virus scan engine failed for the file: <filename>
<b>Explanation</b>	An error occurred in the anti-virus scan engine. Since anti-virus is

---

	running in audit mode, the data transfer will be allowed to continue.
<b>Gateway Action</b>	allow_data
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	filename [layer7_srcinfo] [layer7_dstinfo]
<b>Context Parameters</b>	ALG Module Name ALG Session ID Connection

### 2.3.13. failed\_to\_allocate\_memory (ID: 05800014)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	AVSE: Memory usage for virus scanning subsystem is exceeding the limit(out of memory)
<b>Explanation</b>	An attempt to allocate memory failed, because the subsystem is exceeding the allocated memory limit.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Try to free some of the memory used.
<b>Revision</b>	1

### 2.3.14. no\_valid\_license (ID: 05800015)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	AVSE: Virus scanning aborted. No valid license present.
<b>Explanation</b>	Anti-virus scanning is aborted since there is no valid license present.
<b>Gateway Action</b>	av_scanning_aborted
<b>Recommended Action</b>	If anti-virus scanning is wanted, you must get a valid license with anti-virus capabilities. Anti-virus scanning can be turned off in order to avoid future postings of this log message.
<b>Revision</b>	2
<b>Context Parameters</b>	ALG Session ID

### 2.3.15. no\_signature\_database (ID: 05800016)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	AVSE: Virus scanning aborted. No virus signatures present.
<b>Explanation</b>	Anti-virus scanning is aborted since there is no local anti-virus

	signature database.
<b>Gateway Action</b>	av_scanning_denied
<b>Recommended Action</b>	Connect your gateway to the Internet and download the anti-virus database or configure automatic updates of anti-virus.
<b>Revision</b>	2
<b>Context Parameters</b>	ALG Session ID

### 2.3.16. general\_engine\_error (ID: 05800017)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	AVSE: Virus scanning aborted. General error occurred during initialization.
<b>Explanation</b>	Anti-virus scanning is aborted since the scan engine returned a general error during initialization.
<b>Gateway Action</b>	av_scanning_aborted
<b>Recommended Action</b>	Try to restart the unit in order to solve this issue.
<b>Revision</b>	2
<b>Context Parameters</b>	ALG Session ID

### 2.3.17. out\_of\_memory (ID: 05800018)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	AVSE: Virus scanning aborted. Out of memory during initialization.
<b>Explanation</b>	Anti-virus scanning is aborted since the scan engine run out of memory during initialization.
<b>Gateway Action</b>	av_scanning_denied
<b>Recommended Action</b>	Review your configuration in order to free up more RAM.
<b>Revision</b>	2
<b>Context Parameters</b>	ALG Session ID

### 2.3.18. unknown\_encoding (ID: 05800182)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTPALG: Content transfer encoding is unknown or not present
<b>Explanation</b>	Antivirus module cannot scan the attachment since the transfer encoding is missing or unknown. Fail Mode is deny so data is blocked.
<b>Gateway Action</b>	block_data

---

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	filename unknown_content_transfer_encoding sender_email_address recipient_email_addresses:
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.3.19. unknown\_encoding (ID: 05800183)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTPALG: Content transfer encoding is unknown or not present.
<b>Explanation</b>	Antivirus module cannot scan the attachment since the transfer encoding is missing or unknown. Fail Mode is allow so data is allowed without scanning.
<b>Gateway Action</b>	allow_data_without_scan
<b>Recommended Action</b>	Research the Content Transfer Encoding format.
<b>Revision</b>	1
<b>Parameters</b>	filename unknown_content_transfer_encoding sender_email_address recipient_email_addresses
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.3.20. unknown\_encoding (ID: 05800184)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	POP3ALG: Content transfer encoding is unknown or not present
<b>Explanation</b>	Antivirus module cannot scan the attachment since the transfer encoding is missing or unknown. Fail Mode is deny so data is blocked.
<b>Gateway Action</b>	block_data
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	filename unknown_content_transfer_encoding sender_email_address
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.3.21. unknown\_encoding (ID: 05800185)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	POP3ALG: Content transfer encoding is unknown or not present.
<b>Explanation</b>	Antivirus module cannot scan the attachment since the transfer encoding is missing or unknown. Fail Mode is allow so data is allowed without scanning.
<b>Gateway Action</b>	allow_data_without_scan
<b>Recommended Action</b>	Research the Content Transfer Encoding format.
<b>Revision</b>	1
<b>Parameters</b>	filename unknown_content_transfer_encoding sender_email_address
<b>Context Parameters</b>	ALG Module Name ALG Session ID

## 2.4. ARP

These log messages refer to the **ARP (ARP events)** category.

### 2.4.1. already\_exists (ID: 00300001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	An entry for this IP address already exists
<b>Explanation</b>	The entry was not added as a previous entry for this IP address already exists in the ARP table.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.4.2. no\_sender\_ip (ID: 00300002)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	ARP query sender IP is 0.0.0.0
<b>Explanation</b>	The source IP-address of an ARP query is 0.0.0.0. Allowing.
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	If this is not the desired behaviour, modify the configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.4.3. no\_sender\_ip (ID: 00300003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	ARP query sender IP is 0.0.0.0. Dropping
<b>Explanation</b>	The source IP-address of an ARP query is 0.0.0.0. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If this is not the desired behaviour, modify the configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.4.4. arp\_response\_broadcast (ID: 00300004)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	ARP response is a broadcast address
<b>Explanation</b>	The ARP response has a sender address which is a broadcast address. Allowing.
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	If this is not the desired behaviour, modify the configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.4.5. arp\_response\_multicast (ID: 00300005)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	ARP response is a multicast address
<b>Explanation</b>	The ARP response has a sender address which is a multicast address. This might be the case if there are load balancing network equipment in the network. Allowing.
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	If this is not the desired behaviour, modify the configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.4.6. mismatching\_hwaddrs (ID: 00300006)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	ARP hw sender does not match Ethernet hw sender
<b>Explanation</b>	The hardware sender address specified in the ARP data does not match the Ethernet hardware sender address. Allowing.
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	If this is not the desired behaviour, modify the configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.4.7. mismatching\_hwaddrs\_drop (ID: 00300007)

---

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	ARP hw sender does not match Ethernet hw sender. Dropping
<b>Explanation</b>	The hardware sender address specified in the ARP data does not match the Ethernet hardware sender address. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If this is not the desired behaviour, modify the configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.4.8. hwaddr\_change (ID: 00300008)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	<knownip> has a different address <newhw> compared to the known hardware address <knownhw>. Allow packet for further processing.
<b>Explanation</b>	A known dynamic ARP entry has a different hardware address than the one in the ARP packet. Allowing packet for further processing.
<b>Gateway Action</b>	allow_processing
<b>Recommended Action</b>	If this is not the desired behaviour, modify the configuration.
<b>Revision</b>	1
<b>Parameters</b>	knownip knownhw newhw
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.4.9. arp\_cache\_size\_limit\_reached (ID: 00300030)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	ARP cache size limit reached
<b>Explanation</b>	The ARP cache size limit has been reached. Current license limit is [limit].
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Update your license to allow a greater amount of concurrent ARP entries.
<b>Revision</b>	1
<b>Parameters</b>	limit

## 2.4.10. invalid\_arp\_sender\_ip\_address (ID: 00300049)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Failed to verify ARP sender IP address. Dropping
<b>Explanation</b>	The ARP sender IP address could not be verified according to the "access" section, and the packet is dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If all ARP sender IP addresses should be accepted without validation, modify the configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.4.11. arp\_access\_allowed\_expect (ID: 00300050)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Allowed by expect rule in access section
<b>Explanation</b>	The ARP sender IP address is verified by an expect rule in the access section.
<b>Gateway Action</b>	access_allow
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.4.12. impossible\_hw\_address (ID: 00300051)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Impossible hardware address 0000:0000:0000 in ARP response. Dropping
<b>Explanation</b>	The ARP response has sender hardware address 0000:0000:0000, which is illegal. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Verify that no fault network equipment exists.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.4.13. arp\_response\_broadcast\_drop (ID: 00300052)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	ARP response is a broadcast address. Dropping
<b>Explanation</b>	The ARP response has a sender address which is a broadcast address. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If this is not the desired behaviour, modify the configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.4.14. arp\_response\_multicast\_drop (ID: 00300053)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	ARP response is a multicast address. Dropping
<b>Explanation</b>	The ARP response has a sender address which is a multicast address. This might be the case if there are load balancing network equipment in the network. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If this is not the desired behaviour, modify the configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.4.15. arp\_collides\_with\_static (ID: 00300054)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Known entry is <knowntype> <knownip>=<knownhw>. Dropping
<b>Explanation</b>	The hardware sender address does not match the static entry in the ARP table. Static ARP changes are not allowed. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If this is not the desired behaviour, modify the configuration.
<b>Revision</b>	1
<b>Parameters</b>	reason knowntype knownip knownhw
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.4.16. hwaddr\_change\_drop (ID: 00300055)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	<knownip> has a different address <newhw> compared to the known hardware address <knownhw>. Dropping packet.
<b>Explanation</b>	A known dynamic ARP entry has a different hardware address than the one in the ARP packet. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If this is not the desired behaviour, modify the configuration.
<b>Revision</b>	1
<b>Parameters</b>	knownip knownhw newhw
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.5. AVUPDATE

These log messages refer to the **AVUPDATE (Antivirus Signature update)** category.

### 2.5.1. av\_db\_update\_failure (ID: 05000001)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Update of the Antivirus database failed, because of <reason>
<b>Explanation</b>	The unit tried to update the Antivirus database, but failed. The reason for this is specified in the "reason" parameter.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason

### 2.5.2. av\_database\_downloaded (ID: 05000002)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	New Antivirus database downloaded
<b>Explanation</b>	An updated version of the Antivirus database has been downloaded, which will now be used.
<b>Gateway Action</b>	using_new_database
<b>Recommended Action</b>	None.
<b>Revision</b>	2

### 2.5.3. av\_db\_already\_up\_to\_date (ID: 05000003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Antivirus database is up-to-date
<b>Explanation</b>	The current Antivirus database is up-to-date, and does not need to be updated.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.5.4. av\_db\_update\_denied (ID: 05000004)

<b>Default Severity</b>	NOTICE
-------------------------	--------

<b>Log Message</b>	Antivirus database could not be updated, as no valid subscription exist
<b>Explanation</b>	The current license does not allow the Antivirus database to be updated.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Check the system's time and/or purchase a subscription.
<b>Revision</b>	1

### 2.5.5. av\_detects\_invalid\_system\_time (ID: 05000005)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	System clock is not properly set. Invalid date (<date>) in antivirus signature file. Antivirus Disabled
<b>Explanation</b>	The system clock is not up to date. The system clock must be set correctly in order to use the antivirus features. Antivirus features remains disabled until clock is correct and a manual antivirus update has been performed.
<b>Gateway Action</b>	antivirus_disabled
<b>Recommended Action</b>	Check and set the system time correct and perform a manual antivirus update.
<b>Revision</b>	1
<b>Parameters</b>	date

### 2.5.6. downloading\_new\_database (ID: 05000007)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Downloading new antivirus database
<b>Explanation</b>	A new antivirus database is available. The database is being downloaded.
<b>Gateway Action</b>	downloading_new_database
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.5.7. unsynced\_databases (ID: 05000008)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unsynchronized hardware and software databases detected
<b>Explanation</b>	The anti-virus hardware and software databases are not synchronized. A full update is automatically initiated.
<b>Gateway Action</b>	downloading_new_database

<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.6. BLACKLIST

These log messages refer to the **BLACKLIST (Blacklist events)** category.

### 2.6.1. failed\_to\_write\_list\_of\_blocked\_hosts\_to\_media (ID: 04600001)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Failed to write list of blocked hosts to media
<b>Explanation</b>	Failed to write list of blocked hosts to media. The media might be corrupted.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	Verify that the media is intact.
<b>Revision</b>	1

### 2.6.2. unable\_to\_allocate\_static\_entry (ID: 04600002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unable to allocate static entry for <host>
<b>Explanation</b>	Unable to allocate static entry. Unit is low on memory.
<b>Gateway Action</b>	no_block
<b>Recommended Action</b>	Review the configuration in order to free more RAM.
<b>Revision</b>	1
<b>Parameters</b>	host

### 2.6.3. unable\_to\_allocate\_host\_entry (ID: 04600003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unable to allocate dynamic entry for <host>
<b>Explanation</b>	Unable to allocate dynamic entry. Unit is low on memory.
<b>Gateway Action</b>	no_block
<b>Recommended Action</b>	Review the configuration in order to free more RAM.
<b>Revision</b>	1
<b>Parameters</b>	host

### 2.6.4. connection\_blacklisted (ID: 04600004)

---

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Found <blacklisted_host> in blacklist. Triggered rule <rule>, description: <description>. Protocol: <proto>, IP: <ip>, Port: <port>.
<b>Explanation</b>	A blacklist entry was added which matched the IP address of this connection. Thus it was closed accordingly.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Investigate threshold or IntrusionDetection rules that could have triggered dynamic blacklisting.
<b>Revision</b>	1
<b>Parameters</b>	blacklisted_host rule description ip proto port

## 2.6.5. packet\_blacklisted (ID: 04600005)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Found <blacklisted_host> in blacklist. Triggered rule <rule>, description: <description>. Protocol: <proto>, IP: <ip>, Port: <port>.
<b>Explanation</b>	A blacklist entry was added which matched the IP address of this packet. Thus it was dropped accordingly.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Investigate threshold or IntrusionDetection rules that could have triggered dynamic blacklisting.
<b>Revision</b>	1
<b>Parameters</b>	blacklisted_host rule description ip proto port

## 2.6.6. packet\_blacklisted (ID: 04600006)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Found source in blacklist. Triggered rule <rule>, description: <description>. Protocol: <proto>, IP: <ip>, Port: <port>.
<b>Explanation</b>	A blacklist entry was added which matched the IP address of this packet. Thus it was dropped accordingly.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Investigate threshold or IntrusionDetection rules that could have

---

triggered dynamic blacklisting.

**Revision**

**Parameters**

rule  
description  
proto  
ip  
port

## 2.7. BUFFERS

These log messages refer to the **BUFFERS (Events regarding buffer usage)** category.

### 2.7.1. buffers\_flooded (ID: 00500001)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The buffers were flooded for <duration> seconds. Current usage is <buf_usage> percent
<b>Explanation</b>	The unit was temporarily out of buffers for a period of time. This could be a result of a period of heavy network traffic load.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	If this is a reoccurring event, try increasing the number of HighBuffers.
<b>Revision</b>	1
<b>Parameters</b>	duration buf_usage

## 2.8. CONN

These log messages refer to the **CONN (State engine events, e.g. open/close connections)** category.

### 2.8.1. conn\_open (ID: 00600001)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Connection opened
<b>Explanation</b>	A connection has been opened.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Information Connection Packet Buffer

### 2.8.2. conn\_close (ID: 00600002)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Connection closed
<b>Explanation</b>	A connection has been closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Information Connection

### 2.8.3. connection\_table\_full (ID: 00600003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Closing (replacing) this connection; connection table full
<b>Explanation</b>	The connection table is currently full, and the unit needs to open a new connection. This specific connection is closed, and replaced with the new connection.
<b>Gateway Action</b>	replacing_conn
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

---

Connection

## 2.8.4. conn\_open\_natsat (ID: 00600004)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Connection opened
<b>Explanation</b>	A connection has been opened.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Information Connection Packet Buffer

## 2.8.5. conn\_close\_natsat (ID: 00600005)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Connection closed
<b>Explanation</b>	A connection has been closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Information Connection

## 2.8.6. out\_of\_connections (ID: 00600010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Out of connections. Rejecting connection attempt
<b>Explanation</b>	The connection table is currently full, and this new connection attempt will be rejected.
<b>Gateway Action</b>	reject
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.8.7. out\_of\_connections (ID: 00600011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Out of connections. Dropping connection attempt
<b>Explanation</b>	The connection table is currently full, and this new connection attempt will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.8.8. no\_new\_conn\_for\_this\_packet (ID: 00600012)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	State inspector would not open a new connection for this TCP packet, rejecting
<b>Explanation</b>	State inspector would not open a new connection for this TCP packet since the combination of TCP flags is wrong. Only packets with the SYN TCP-flag set as the only TCP flag are allowed to open a new TCP connection.
<b>Gateway Action</b>	reject
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	protocol
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.8.9. no\_new\_conn\_for\_this\_packet (ID: 00600013)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	State inspector would not open a new connection for this ICMP packet, dropping packet
<b>Explanation</b>	State inspector would not open a new connection for this ICMP packet since it is not an ICMP Echo Request. Only Echo Requests are allowed to open a new ICMP connection.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1

<b>Parameters</b>	protocol
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.8.10. no\_return\_route (ID: 00600014)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Failed to open a new connection since a return route to the sender address cant be found. Dropping packet
<b>Explanation</b>	There was no return route found to the sender address of the packet. Therefore, a new connection could not be opened and the packet is dropped.
<b>Gateway Action</b>	reject
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Connection Packet Buffer

## 2.8.11. reverse\_connect\_attempt (ID: 00600015)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Disallowed reverse connect attempt from peer. Dropping
<b>Explanation</b>	State inspector does not allow this packet in reverse direction on the already opened connection. This type of packet is only allowed to be sent by the originator of a connection. Dropping the packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Connection Packet Buffer

## 2.8.12. port\_0\_illegal (ID: 00600020)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TCP/UDP destination port or TCP source port was set to 0. Dropping
<b>Explanation</b>	The TCP/UDP destination or TCP source port was set to 0, which is not allowed. Dropping packet.
<b>Gateway Action</b>	drop

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.8.13. udp\_src\_port\_0\_illegal (ID: 00600021)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	UDP source port is set to 0. Dropping
<b>Explanation</b>	The UDP source port was set to 0. This can be used by UDP streams not expecting return traffic. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If the packet is wanted, change the UDP source port 0 setting.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.8.14. udp\_src\_port\_0\_forwarded (ID: 00600022)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	UDP source port is set to 0. Forwards packet
<b>Explanation</b>	The UDP source port was set to 0. This can be used by UDP streams not expecting return traffic. Forwarding packet.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.8.15. conn\_usage (ID: 00600023)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Connection used to forward a packet.
<b>Explanation</b>	A packet has passed through the connection.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

Context Parameters	Packet Buffer
--------------------	---------------

## 2.8.16. active\_data (ID: 00600100)

Default Severity	INFORMATIONAL
Log Message	FTPALG: Incoming active data channel
Explanation	An active data channel connection has been established.
Gateway Action	None
Recommended Action	None.
Revision	1
Context Parameters	ALG Module Name ALG Session ID Rule Information Connection

## 2.8.17. passive\_data (ID: 00600101)

Default Severity	INFORMATIONAL
Log Message	FTPALG: Incoming passive data channel
Explanation	A passive data channel connection has been established.
Gateway Action	None
Recommended Action	None.
Revision	1
Context Parameters	ALG Module Name ALG Session ID Rule Information Connection

## 2.8.18. active\_data (ID: 00600102)

Default Severity	INFORMATIONAL
Log Message	FTPALG: Active data channel closed
Explanation	An active data channel was closed.
Gateway Action	None
Recommended Action	None.
Revision	1
Context Parameters	ALG Module Name ALG Session ID Rule Information

Connection

**2.8.19. passive\_data (ID: 00600103)**

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	FTPALG: Passive data channel closed
<b>Explanation</b>	A passive data channel was closed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	ALG Module Name ALG Session ID Rule Information Connection

## 2.9. DEVICEMONITOR

These log messages refer to the **DEVICEMONITOR (Device monitor events)** category.

### Note

The log message IDs in this category are assigned dynamically based on the device monitor configuration. The variable part of the ID (indicated by *x* below) corresponds to the assigned ID of the device monitor rule that triggered, e.g. assigned ID 1 results in log message ID 05400001 and assigned ID 12 becomes log message ID 05400012.

### 2.9.1. value\_above\_high\_threshold (ID: 054xxxxx)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Security Gateway Monitoring. Current uptime: <uptime>. The value of: <name> is above the high threshold High threshold: <threshold> Current mean of <numbersamples>: <currentvalue>.
<b>Explanation</b>	High threshold passed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	uptime name threshold numbersamples currentvalue

### 2.9.2. value\_below\_low\_threshold (ID: 054xxxxx)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Security Gateway Monitoring. Current uptime: <uptime>. The value of: <name> is below the low threshold Low threshold: <threshold> Current mean of <numbersamples>: <currentvalue>.
<b>Explanation</b>	Low threshold passed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	uptime name threshold numbersamples currentvalue

### 2.9.3. value\_below\_high\_threshold (ID: 054xxxxx)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Security Gateway Monitoring. Current uptime: <uptime>. The value of: <name> is now bellow the high threshold Low threshold: <threshold> Current mean of <numbersamples>: <currentvalue>.
<b>Explanation</b>	Low threshold passed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	uptime name threshold numbersamples currentvalue

## 2.9.4. value\_above\_low\_threshold (ID: 054xxxxx)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Security Gateway Monitoring. Current uptime: <uptime>. The value of: <name> is above the low threshold Low threshold: <threshold> Current mean of <numbersamples>: <currentvalue>.
<b>Explanation</b>	Low threshold passed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	uptime name threshold numbersamples currentvalue

## 2.10. DHCP

These log messages refer to the **DHCP (DHCP client events)** category.

### 2.10.1. offered\_ip\_occupied (ID: 00700001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Interface <iface> received a lease with an offered IP that appear to be occupied (<ip4addr>)
<b>Explanation</b>	Received a DHCP lease which appears to be in use by someone else.
<b>Gateway Action</b>	restart
<b>Recommended Action</b>	Check network for statically configured hosts or incorrectly proxy ARPed routes.
<b>Revision</b>	1
<b>Parameters</b>	iface ip4addr

### 2.10.2. lease\_changed (ID: 00700002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Some vital parameter(s) in the lease on interface <iface> have changed, restarting DHCP-process
<b>Explanation</b>	The DHCP server have updated some information considered vital. This will result in the DHCP process being restarted.
<b>Gateway Action</b>	restart
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface
<b>Context Parameters</b>	Packet Buffer

### 2.10.3. lease\_acquired (ID: 00700003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Interface <iface> have successfully acquired a lease
<b>Explanation</b>	An interface have successfully acquired a lease.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

<b>Parameters</b>	iface ip netmask bcast gw
<b>Context Parameters</b>	Packet Buffer

## 2.10.4. renewed\_lease (ID: 00700004)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Interface <iface> have renewed its lease. The new lease is valid for <valid_seconds> seconds
<b>Explanation</b>	An interface have successfully renewed its lease.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface valid_seconds
<b>Context Parameters</b>	Packet Buffer

## 2.10.5. lease\_expired (ID: 00700005)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Interface <iface> lease expired
<b>Explanation</b>	A lease have expired and the ip data for this interface are no longer valid.
<b>Gateway Action</b>	restart
<b>Recommended Action</b>	Check connection and DHCP server reachability.
<b>Revision</b>	1
<b>Parameters</b>	iface

## 2.10.6. invalid\_lease\_time (ID: 00700007)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Interface <iface> received a lease with a leasetime (<lease_time>) which is lower then the minimum allowed (<minimum_lease_time>)
<b>Explanation</b>	An interface received a lease with a leasetime which is lower then the configured minimum.
<b>Gateway Action</b>	drop

<b>Recommended Action</b>	Check the DHCP server configuration or adjust the minimum leasetime limit.
<b>Revision</b>	1
<b>Parameters</b>	iface lease_time minimum_lease_time
<b>Context Parameters</b>	Packet Buffer

## 2.10.7. invalid\_server\_id (ID: 00700008)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Interface <iface> received a lease with an invalid server ID (<server_id>)
<b>Explanation</b>	An interface received a lease with an invalid server ID parameter.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check DHCP server configuration.
<b>Revision</b>	1
<b>Parameters</b>	iface server_id
<b>Context Parameters</b>	Packet Buffer

## 2.10.8. invalid\_netmask (ID: 00700009)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Interface <iface> received a lease with an invalid netmask (<netmask>)
<b>Explanation</b>	An interface received a lease with an invalid netmask.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check DHCP server configuration.
<b>Revision</b>	1
<b>Parameters</b>	iface netmask
<b>Context Parameters</b>	Packet Buffer

## 2.10.9. invalid\_broadcast (ID: 00700010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Interface <iface> received a lease with an invalid broadcast address (<broadcast>)

---

<b>Explanation</b>	An interface received a lease with an invalid broadcast address.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check DHCP server configuration.
<b>Revision</b>	1
<b>Parameters</b>	iface broadcast
<b>Context Parameters</b>	Packet Buffer

## 2.10.10. invalid\_offered\_ip (ID: 00700011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Interface <iface> received a lease with an invalid offered IP (<offered_ip>)
<b>Explanation</b>	An interface received a lease with an invalid offered IP address.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check DHCP server configuration.
<b>Revision</b>	1
<b>Parameters</b>	iface offered_ip
<b>Context Parameters</b>	Packet Buffer

## 2.10.11. invalid\_gateway (ID: 00700012)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Interface <iface> received a lease with an invalid gateway (<gateway>)
<b>Explanation</b>	An interface received a lease with an invalid gateway address.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check DHCP server configuration.
<b>Revision</b>	1
<b>Parameters</b>	iface gateway
<b>Context Parameters</b>	Packet Buffer

## 2.10.12. offered\_broadcast\_equals\_gateway (ID: 00700013)

<b>Default Severity</b>	WARNING
-------------------------	---------

---

<b>Log Message</b>	Interface <iface> received a lease where the offered broadcast equals the offered gateway
<b>Explanation</b>	An interface received a lease where the offered broadcast address is equal with the offered gateway address.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check DHCP server configuration.
<b>Revision</b>	1
<b>Parameters</b>	iface
<b>Context Parameters</b>	Packet Buffer

### 2.10.13. ip\_collision (ID: 00700014)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Interface <iface> received a lease which if used will cause an IP collision (DHCP IP: <dhcp_ip> collides with configured route: <configured_route>)
<b>Explanation</b>	An interface received a lease which if used will cause an IP collision with a configured route.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check DHCP server configuration and the SG interface configuration.
<b>Revision</b>	1
<b>Parameters</b>	iface dhcp_ip configured_route
<b>Context Parameters</b>	Packet Buffer

### 2.10.14. route\_collision (ID: 00700015)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Interface <iface> received a lease which if used will cause a route collision (DHCP route: <dhcp_route> collides with configured route <configured_route>)
<b>Explanation</b>	An interface received a lease which if used will cause a route collision with a configured route.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check DHCP server configuration and SG interface configuration.
<b>Revision</b>	1
<b>Parameters</b>	iface dhcp_route configured_route

**Context Parameters**

Packet Buffer

## 2.11. DHCPRELAY

These log messages refer to the **DHCPRELAY (DHCP relay events)** category.

### 2.11.1. unable\_to\_save\_dhcp\_relay\_list (ID: 00800001)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unable to auto save the DHCP relay list to disk
<b>Explanation</b>	Unable to autosave the DHCP relay list to disk.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Check disk usage and health.
<b>Revision</b>	1

### 2.11.2. dhcp\_relay\_list\_saved (ID: 00800002)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	DHCP relay list was successfully auto saved to disk
<b>Explanation</b>	The DHCP relay list was successfully written to disk.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.11.3. dhcp\_pkt\_too\_small (ID: 00800003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Received DHCP packet which is smaller then the minimum allowed 300 bytes.
<b>Explanation</b>	Received a DHCP packet which is smaller then the minimum allowed 300 bytes.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Investigate what client implementation is being used.
<b>Revision</b>	1
<b>Context Parameters</b>	Packet Buffer

### 2.11.4. incorrect\_bootp\_dhcp\_cookie (ID: 00800004)

<b>Default Severity</b>	WARNING
-------------------------	---------

<b>Log Message</b>	Incorrect BOOTP/DHCP cookie. Dropping
<b>Explanation</b>	Received a packet with an incorrect BOOTP/DHCP cookie.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Investigate what client implementation is being used.
<b>Revision</b>	1
<b>Context Parameters</b>	Packet Buffer

## 2.11.5. maximum\_ppm\_for\_relayer\_reached (ID: 00800005)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The maximum packets-per-minute limit have been reached. Requests will be denied for a period of time
<b>Explanation</b>	The maximum DHCP packets-per-minute limit for the relayer have been reached.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify packets-per-minute limit.
<b>Revision</b>	1
<b>Context Parameters</b>	Packet Buffer

## 2.11.6. relayer\_resuming (ID: 00800006)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The relayer is now resuming, <packets_dropped> packets were dropped while the relayer was inactive
<b>Explanation</b>	The relayer is now resuming its duties since being temporary halted by the packets-per-minute limit.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	packets_dropped
<b>Context Parameters</b>	Packet Buffer

## 2.11.7. hop\_limit\_exceeded (ID: 00800007)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Hop limit exceeded. Dropping
<b>Explanation</b>	The maximum hop limit for the DHCP packet have been reached.

---

<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify maximum-hop-limit setting.
<b>Revision</b>	1
<b>Context Parameters</b>	Packet Buffer

### 2.11.8. client\_release (ID: 00800008)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Client <client_ip> requested release. Relay canceled
<b>Explanation</b>	A client requested that lease should be canceled.
<b>Gateway Action</b>	relay_canceled
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_ip
<b>Context Parameters</b>	Packet Buffer

### 2.11.9. got\_reply\_without\_transaction\_state (ID: 00800009)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Got server reply without transaction state for client <client_hw>. Dropping
<b>Explanation</b>	Received a server reply without a matching transaction state.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check the network environment for errors.
<b>Revision</b>	1
<b>Parameters</b>	client_hw
<b>Context Parameters</b>	Packet Buffer

### 2.11.10. maximum\_dhcp\_client\_relay\_routes\_reached (ID: 00800010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The limit for DHCP relay routes have been reached. Dropping
<b>Explanation</b>	The DHCP relay routes limit have been reached.
<b>Gateway Action</b>	drop

<b>Recommended Action</b>	Verify max-relay-routes-limit.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

## 2.11.11. unable\_to\_add\_relay\_route\_since\_out\_of\_memory (ID: 00800011)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Internal Error: Out of memory: Can't add DHCP relay route. Dropping
<b>Explanation</b>	Unable to add DHCP relay route since out of memory.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check firewall memory consumption.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

## 2.11.12. ignored\_relay\_request (ID: 00800012)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Request ignored according to the ruleset
<b>Explanation</b>	A DHCP relay request was ignored according to the rules.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.11.13. no\_message\_type (ID: 00800013)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	No message type. Dropping
<b>Explanation</b>	Received DHCP packet without the required message type parameter.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Investigate what client implementation is being used.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.11.14. bad\_inform\_pkt\_with\_mismatching\_source\_ip\_and\_client\_ip (ID: 00800014)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	INFORM packet did not pass through a relay but the packet source ip and the client ip doesnt match. Dropping
<b>Explanation</b>	Received non relayed INFORM DHCP packet with illegally mismatching source and client IP.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Investigate what client implementation is being used.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.11.15. received\_relayed\_inform\_packet\_without\_client\_ip (ID: 00800015)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	INFORM packet passed a relay but the client ip isnt set. Dropping
<b>Explanation</b>	Received relayed INFORM DHCP packet with illegally missing client IP.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Investigate what client implementation is being used.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.11.16. maximum\_current\_dhcp\_relays\_for\_iface (ID: 00800016)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The maximum number <max_relays> of current DHCP relays for this interface have been reached. Dropping
<b>Explanation</b>	The maximum number of DHCP relayed through a specified interface have been reached.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Verify max-relay-per-interface setting.
<b>Revision</b>	1

<b>Parameters</b>	max_relays
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.11.17. dhcp\_server\_is\_unroutable (ID: 00800017)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	BOOTP/DHCP-server at <dest_ip> is unroutable. Dropping
<b>Explanation</b>	Unable to find route to specified DHCP server.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Update routing table with a route to the DHCP server.
<b>Revision</b>	1
<b>Parameters</b>	dest_ip
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.11.18. unable\_to\_get\_free\_transaction\_state (ID: 00800018)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unable to get free transaction state for client <client_hw>. Dropping
<b>Explanation</b>	Unable to get a free transaction state to handle client request.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Verify max-transaction-count setting.
<b>Revision</b>	1
<b>Parameters</b>	client_hw
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.11.19. invalid\_gateway (ID: 00800019)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received request with invalid gateway (<gateway_ip>). Dropping
<b>Explanation</b>	Received DHCP request with an invalid gateway.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Investigate what client implementation is being used.

---

<b>Revision</b>	1
<b>Parameters</b>	gateway_ip
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.11.20. relayed\_request (ID: 00800020)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Relayed DHCP-request <type> from client <client_hw> to <dest_ip>
<b>Explanation</b>	Relayed a DHCP request.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	type client_hw dest_ip
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.11.21. relayed\_request (ID: 00800021)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Relayed BOOTP-request from client <client_hw> to <dest_ip>
<b>Explanation</b>	Relayed a BOOTP request.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_hw dest_ip
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.11.22. got\_reply\_on\_a\_non\_security\_equivalent\_interface (ID: 00800022)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received reply for client <client_hw> on a non security equivalent interface. Dropping

---

<b>Explanation</b>	Received a reply for a client on a non security equivalent interface.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Verify security-equivalent-interface setting.
<b>Revision</b>	1
<b>Parameters</b>	client_hw
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.11.23. assigned\_ip\_not\_allowed (ID: 00800023)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	DHCP/BOOTP-Server <server_ip> gave out an IP <ip> which isn't accepted. Dropping
<b>Explanation</b>	Received a lease with an IP which is not accepted according to the rules.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Verify allowed-lease-addresses setting.
<b>Revision</b>	1
<b>Parameters</b>	iface server_ip ip
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.11.24. illegal\_client\_ip\_assignment (ID: 00800024)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	DHCP/BOOTP-Server <server_ip> tried to assign a client with an illegal IP <ip>. Dropping
<b>Explanation</b>	Received a lease with an illegal client assignment IP.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check DHCP server configuration.
<b>Revision</b>	1
<b>Parameters</b>	server_ip ip
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.11.25. ambiguous\_host\_route (ID: 00800025)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	A host route for <dest_ip> already exists which points to another interface. Dropping
<b>Explanation</b>	An ambiguous host route indicating another interface was detected trying to setup a dynamic hostroute for a client.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Review previous configured host route for client.
<b>Revision</b>	1
<b>Parameters</b>	dest_ip
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.11.26. relayed\_dhcp\_reply (ID: 00800026)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Relayed DHCP-reply <type> to client <client_hw>
<b>Explanation</b>	Relayed DHCP reply to client.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	type client_hw
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.11.27. relayed\_bootp\_reply (ID: 00800027)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Relayed BOOTP-reply to client <client_hw>
<b>Explanation</b>	Relayed BOOTP reply to client.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_hw
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.11.28. relayed\_dhcp\_reply (ID: 00800028)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Relayed DHCP-reply <type> to gateway <gateway_ip>
<b>Explanation</b>	Relayed DHCP reply to a gateway.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	type gateway_ip
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.11.29. relayed\_bootp\_reply (ID: 00800029)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Relayed BOOTP-reply to gateway <gateway_ip>
<b>Explanation</b>	Relayed BOOTP reply to a gateway.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	gateway_ip
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.12. DHCPSEVER

These log messages refer to the **DHCPSEVER (DHCP server events)** category.

### 2.12.1. unable\_to\_send\_response (ID: 00900001)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Failed to get buffer for sending. Unable to reply
<b>Explanation</b>	Unable to get a buffer for sending.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Check buffer consumption.
<b>Revision</b>	1

### 2.12.2. option\_section\_is\_too\_big\_unable\_to\_reply (ID: 00900002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The option section is too big, unable to reply. Dropping
<b>Explanation</b>	Unable to send reply since the DHCP option section is too big.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Reduce the number of used DHCP options.
<b>Revision</b>	1

### 2.12.3. unable\_to\_save\_lease\_db (ID: 00900003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unable to auto save the lease database to disk
<b>Explanation</b>	Some sort of error occurred saving the lease database to disk.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Make sure that there is sufficient disk space available.
<b>Revision</b>	1

### 2.12.4. lease\_db\_successfully\_saved (ID: 00900004)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Lease database was successfully auto saved to disk
<b>Explanation</b>	The lease database was successfully saved to disk.

<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.12.5. dhcp\_packet\_too\_small (ID: 00900005)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received DHCP packet which is smaller then the minimum allowed 300 bytes. Dropping
<b>Explanation</b>	Received a DHCP packet which is smaller then the minimum allowed 300 bytes.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Investigate what client implementation is being used.
<b>Revision</b>	1
<b>Context Parameters</b>	Packet Buffer

## 2.12.6. request\_for\_ip\_from\_non\_bound\_client\_without\_state (ID: 00900006)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received a request from client(not in bound) <client> for IP <client_ip> without state. Rejecting
<b>Explanation</b>	Received a request from a non bound client without state.
<b>Gateway Action</b>	reject
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client client_ip
<b>Context Parameters</b>	Packet Buffer

## 2.12.7. request\_for\_ip\_from\_bound\_client\_without\_state (ID: 00900007)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received a request from client(in bound) <client> for IP <client_ip> without state. Rejecting
<b>Explanation</b>	Received a request from a bound client without state.

<b>Gateway Action</b>	reject
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client client_ip
<b>Context Parameters</b>	Packet Buffer

## 2.12.8. request\_for\_ip\_from\_non\_bound\_client\_without\_state (ID: 00900008)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received a request from client(not in bound) <client> for IP <client_ip> without state. Ignoring
<b>Explanation</b>	Received a request from an unbound client without state.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client client_ip
<b>Context Parameters</b>	Packet Buffer

## 2.12.9. all\_ip\_pools\_depleted (ID: 00900010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	All IP pools are depleted. Unable to handle request. Ignoring
<b>Explanation</b>	All IP pools have been depleted.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Extend the pools to support more clients.
<b>Revision</b>	1
<b>Context Parameters</b>	Packet Buffer

## 2.12.10. request\_with\_bad\_udp\_checksum (ID: 00900011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received request with bad UDP checksum. Dropping
<b>Explanation</b>	Received request with bad UDP checksum.

<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check network equipment for errors.
<b>Revision</b>	1
<b>Context Parameters</b>	Packet Buffer

## 2.12.11. lease\_timeout (ID: 00900012)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Lease for IP <client_ip> timed out. Was bound to client <client_hw>
<b>Explanation</b>	A client lease wasn't renewed and timed out.
<b>Gateway Action</b>	lease_inactive
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_ip client_hw
<b>Context Parameters</b>	Rule Name

## 2.12.12. lease\_timeout (ID: 00900013)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Offer for IP <client_ip> timed out. Was offered to client <client_hw>
<b>Explanation</b>	An offer to a client was never accepted and timed out.
<b>Gateway Action</b>	lease_inactive
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_ip client_hw
<b>Context Parameters</b>	Rule Name

## 2.12.13. pool\_depleted (ID: 00900014)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	All IPs in the pool are in use. Request cannot be fulfilled
<b>Explanation</b>	A request cannot be fulfilled since all pools are in use.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Extend the pools to support more clients.

<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.12.14. sending\_offer (ID: 00900015)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Received DISCOVER from client <client_hw>. Sending IP offer <offer_ip>
<b>Explanation</b>	Received discover (initial IP query) from a client.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_hw offer_ip
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.12.15. pool\_depleted (ID: 00900016)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	All IPs in the pool are now in use
<b>Explanation</b>	All IPs the the pool have been consumed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Extend the pool to support more clients.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.12.16. request\_for\_non\_offered\_ip (ID: 00900017)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Client <client_hw> requested non offered IP. Rejecting
<b>Explanation</b>	Client sent a request for a non offered IP.
<b>Gateway Action</b>	nak
<b>Recommended Action</b>	None.
<b>Revision</b>	1

<b>Parameters</b>	client_hw client_wanted client_offered
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.12.17. request\_for\_non\_bound\_ip (ID: 00900018)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Client <client_hw> requested non bound IP. Rejecting
<b>Explanation</b>	Client requested a non bound IP.
<b>Gateway Action</b>	reject
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_hw client_wanted bound
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.12.18. client\_bound (ID: 00900019)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Client <client_hw> accepted IP <client_ip>. Client is now bound
<b>Explanation</b>	Client accepted the IP address and are now bound.
<b>Gateway Action</b>	new_lease
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_hw client_ip
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.12.19. client\_renewed (ID: 00900020)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Client <client_hw> renewed IP <client_ip>
<b>Explanation</b>	Client successfully renewed its lease.
<b>Gateway Action</b>	renew

---

---

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_hw client_ip
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.12.20. got\_inform\_request (ID: 00900021)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Got INFORM request from client <client_hw>. Acknowledging
<b>Explanation</b>	Got an inform (client already got an IP and asks for configuration parameters) request from a client.
<b>Gateway Action</b>	acknowledging
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_hw client_ip
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.12.21. decline\_for\_ip\_on\_wrong\_iface (ID: 00900022)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Got decline for ip <client_ip> on wrong interface (recv: <recv_if>, lease: <client_if>). Decline is ignored
<b>Explanation</b>	Got decline from a client on the wrong interface.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Check network for inconsistent routes.
<b>Revision</b>	1
<b>Parameters</b>	client_hw client_ip recv_if client_if
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.12.22. decline\_for\_non\_offered\_ip (ID: 00900023)

<b>Default Severity</b>	NOTICE
-------------------------	--------

---

---

<b>Log Message</b>	Client <client_hw> declined non offered IP. Decline is ignored
<b>Explanation</b>	Client rejected non a offered IP.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_hw
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.12.23. declined\_by\_client (ID: 00900024)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Client <client_hw> declined IP <client_ip>. IP blacklisted
<b>Explanation</b>	A client declined (indicated that the IP is already in use someone else) offered IP.
<b>Gateway Action</b>	blacklist
<b>Recommended Action</b>	Check network for statically configured hosts or incorrectly proxy ARPed routes.
<b>Revision</b>	1
<b>Parameters</b>	client_hw client_ip
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.12.24. request\_for\_ip\_from\_bound\_client\_without\_state (ID: 00900025)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received a request from client(bound) <client> for IP <client_ip> without state. Ignoring
<b>Explanation</b>	Received a request from a bound client without state.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client client_ip
<b>Context Parameters</b>	Packet Buffer

## 2.12.25. release\_for\_ip\_on\_wrong\_iface (ID: 00900026)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Got release for ip <client_ip> on wrong interface (recv: <recv_if>, lease: <client_if>). Decline is ignored
<b>Explanation</b>	Got release from a client on the wrong interface.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Check network for inconsistent routes.
<b>Revision</b>	1
<b>Parameters</b>	client_hw client_ip recv_if client_if
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.12.26. released\_by\_client (ID: 00900027)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Client <client_hw> released IP <client_ip>.
<b>Explanation</b>	A client released (prematurely ended) its lease.
<b>Gateway Action</b>	lease_released
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_hw client_ip
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.13. DYNROUTING

These log messages refer to the **DYNROUTING (Dynamic routing)** category.

### 2.13.1. failed\_to\_export\_route\_to\_ospf\_process\_failed\_to\_alloc (ID: 01100001)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Failed to export route to OSPF process (unable to alloc export node)
<b>Explanation</b>	Unable to export route to a OSPF process since out of memory.
<b>Gateway Action</b>	alert
<b>Recommended Action</b>	Check memory consumption.
<b>Revision</b>	1
<b>Context Parameters</b>	Dynamic Route Rule Name Route

### 2.13.2. route\_exported\_to\_ospf\_as (ID: 01100002)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Route exported to OSPF AS
<b>Explanation</b>	A route was just exported to a OSPF AS.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Dynamic Route Rule Name Route

### 2.13.3. route\_unexported\_from\_ospf\_as (ID: 01100003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Route unexported from OSPF AS
<b>Explanation</b>	A route was just unexported from a OSPF AS.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Dynamic Route

Rule Name  
Route

## 2.13.4. failed\_to\_add\_route\_unable\_to\_alloc (ID: 01100004)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Failed to add route (unable to alloc route)
<b>Explanation</b>	Failed to create a route since out of memory.
<b>Gateway Action</b>	alert
<b>Recommended Action</b>	Check memory consumption.
<b>Revision</b>	1
<b>Context Parameters</b>	Dynamic Route Rule Name Route

## 2.13.5. route\_added (ID: 01100005)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Route added
<b>Explanation</b>	A route was just added.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Dynamic Route Rule Name Route

## 2.13.6. route\_removed (ID: 01100006)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Route removed
<b>Explanation</b>	A route was just removed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Dynamic Route Rule Name Route

## 2.14. FRAG

These log messages refer to the **FRAG (Fragmentation events)** category.

### 2.14.1. individual\_frag\_timeout (ID: 02000001)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Individual fragment timed out.
<b>Explanation</b>	A fragment of an IP packet timed out, and is dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.14.2. fragact\_contains\_frags (ID: 02000002)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Internal Error: A failed active fragment contained fragments. Dropping
<b>Explanation</b>	An Internal Error occurred when freeing an active fragment. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Dropped Fragments Rule Name

### 2.14.3. fail\_suspect\_out\_of\_resources (ID: 02000003)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Out of reassembly resources for suspect. Frags: <frags>. <srcip>-<destip> <ipproto> FragID: <fragid>, State: <fragact>
<b>Explanation</b>	Out of fragmentation-reassembly resources when processing the IP packet, which may contain illegal fragments. Dropping packet and freeing resources.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	srcip

	destip ipproto fragid fragact frags
<b>Context Parameters</b>	Dropped Fragments Rule Name

## 2.14.4. fail\_out\_of\_resources (ID: 02000004)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Out of reassembly resources. Frags: <frags>. <srcip>-<destip> <ipproto> FragID: <fragid>, State: <fragact>
<b>Explanation</b>	Out of fragmentation-reassembly resources when processing the IP packet. Dropping packet and freeing resources.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	srcip destip ipproto fragid fragact frags
<b>Context Parameters</b>	Dropped Fragments Rule Name

## 2.14.5. fail\_suspect\_timeout (ID: 02000005)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Time out reassembling suspect. Frags: <frags>. <srcip>-<destip> <ipproto> FragID: <fragid>, State: <fragact>
<b>Explanation</b>	Timed out when reassembling a fragmented IP packet, which may contain illegal fragments. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	srcip destip ipproto fragid fragact frags
<b>Context Parameters</b>	Dropped Fragments

---

Rule Name

## 2.14.6. fail\_timeout (ID: 02000006)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Time out reassembling. Frags: <frags>. <srcip>-<destip> <ipproto> FragID: <fragid>, State: <fragact>
<b>Explanation</b>	Timed out when reassembling a fragmented IP packet. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	srcip destip ipproto fragid fragact frags
<b>Context Parameters</b>	Dropped Fragments Rule Name

## 2.14.7. disallowed\_suspect (ID: 02000007)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Dropping stored fragments of disallowed suspect packet. Frags: <frags>. <srcip>-<destip> <ipproto> FragID: <fragid>, State: <fragact>
<b>Explanation</b>	The fragments of a disallowed IP packet, which may contain illegal fragments, were dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	srcip destip ipproto fragid fragact frags
<b>Context Parameters</b>	Dropped Fragments Rule Name

## 2.14.8. drop\_frags\_of\_disallowed\_packet (ID: 02000008)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Dropping stored fragments of disallowed packet. Frags: <frags>. <srcip>-<destip> <ipproto> FragID: <fragid>, State: <fragact>
<b>Explanation</b>	The fragments of a disallowed IP packet were dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	srcip destip ipproto fragid fragact frags
<b>Context Parameters</b>	Dropped Fragments Rule Name

### 2.14.9. drop\_frags\_of\_illegal\_packet (ID: 02000009)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Dropping fragments of illegal packet. Frags: <frags>. <srcip>-<destip> <ipproto> FragID: <fragid>, State: <fragact>
<b>Explanation</b>	The fragments of an illegal IP packet were dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	srcip destip ipproto fragid fragact frags
<b>Context Parameters</b>	Dropped Fragments Rule Name

### 2.14.10. drop\_extraneous\_frags\_of\_completed\_packet (ID: 02000010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Dropping extraneous fragments of completed packet. Frags: <frags>. <srcip>-<destip> <ipproto> FragID: <fragid>, State: <fragact>
<b>Explanation</b>	A completed reassembled IP packet contains extraneous fragments,

	which are dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	srcip destip ipproto fragid fragact frags
<b>Context Parameters</b>	Dropped Fragments Rule Name

### 2.14.11. learn\_state (ID: 02000011)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Internal Error: Invalid state <state>
<b>Explanation</b>	Internal Error, the fragmented IP packet has an invalid state.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	state
<b>Context Parameters</b>	Dropped Fragments Rule Name

### 2.14.12. drop\_duplicate\_frag\_suspect\_packet (ID: 02000012)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Dropping duplicate fragment of suspect packet
<b>Explanation</b>	A duplicate fragment of an IP packet, which may contain illegal fragments, was received. Dropping the duplicate fragment.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.14.13. drop\_duplicate\_frag (ID: 02000013)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Dropping duplicate fragment
<b>Explanation</b>	A duplicate fragment of an IP packet was received. Dropping the duplicate fragment.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.14.14. frag\_offset\_plus\_length\_not\_in\_range (ID: 02000014)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Fragment offset+length not in range <minipdatalen>-<maxipdatalen>
<b>Explanation</b>	The fragment offset and length would be outside of the allowed IP size range. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	minipdatalen maxipdatalen
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.14.15. no\_available\_fragacts (ID: 02000015)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Internal Error: No available resources (out of memory?).
<b>Explanation</b>	An Internal Error occurred. Failed to create necessary fragmentation reassembly resources. This could be a result of the unit being out of memory.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.14.16. bad\_ipdatalen (ID: 02000016)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Bad IPDataLen=<ipdatalen>
<b>Explanation</b>	The partly reassembled IP packet has an invalid IP data length. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipdatalen
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.14.17. bad\_ipdatalen (ID: 02000017)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Fragment offset+length is greater than the configured maximum <maxipdatalen>
<b>Explanation</b>	The fragment offset plus length would result in a greater length than the configured maximum length of an IP packet. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	maxipdatalen
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.14.18. overlapping\_frag (ID: 02000018)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Overlapping fragment
<b>Explanation</b>	This fragment would overlap the next fragment offset. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.14.19. bad\_offs (ID: 02000019)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Bad fragment offset
<b>Explanation</b>	The fragment has an invalid offset. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.14.20. duplicate\_frag\_with\_different\_length (ID: 02000020)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Duplicate fragment with different length received
<b>Explanation</b>	The fragment is a duplicate of an already received fragment, but the fragment lengths differ. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.14.21. duplicate\_frag\_with\_different\_data (ID: 02000021)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Duplicate fragment with different data received
<b>Explanation</b>	The fragment is a duplicate of an already received fragment, but the fragment data differs. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.14.22. partial\_overlap (ID: 02000022)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Fragments partially overlap
<b>Explanation</b>	Two fragments partially overlap. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.14.23. drop\_frag\_disallowed\_suspect\_packet (ID: 02000023)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Dropping fragment of disallowed suspect packet
<b>Explanation</b>	A fragment of a disallowed IP packet, which may contain illegal fragments, is dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.14.24. drop\_frag\_disallowed\_packet (ID: 02000024)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Dropping fragment of disallowed packet
<b>Explanation</b>	A fragment of a disallowed IP packet is dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.14.25. already\_completed (ID: 02000025)

<b>Default Severity</b>	ERROR
-------------------------	-------

<b>Log Message</b>	Dropping extraneous fragment of completed packet
<b>Explanation</b>	A completed reassembled IP packet contains a extraneous fragment, which is dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.14.26. drop\_frag\_failed\_suspect\_packet (ID: 02000026)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Dropping fragment of failed suspect packet
<b>Explanation</b>	A fragment of a failed IP packet, which may contain illegal fragments, is dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.14.27. drop\_frag\_failed\_packet (ID: 02000027)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Dropping fragment of failed packet
<b>Explanation</b>	A fragment of a failed IP packet is dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.14.28. drop\_frag\_illegal\_packet (ID: 02000028)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Dropping fragment of illegal packet
<b>Explanation</b>	A fragment of an illegal IP packet is dropped.

<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.14.29. fragments\_available\_freeing (ID: 02000100)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Internal Error: Contains fragments even when freeing. Dropping
<b>Explanation</b>	An Internal Error occured when freeing an active fragment. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Dropped Fragments Rule Name

## 2.15. GRE

These log messages refer to the **GRE (GRE events)** category.

### 2.15.1. failed\_to\_setup\_gre\_tunnel (ID: 02200001)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Failed to setup open tunnel from <local_ip> to <remote_ip>
<b>Explanation</b>	Unable to setup GRE tunnel with endpoint.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check CONN usage and local routing.
<b>Revision</b>	1
<b>Parameters</b>	local_ip remote_ip

### 2.15.2. gre\_bad\_flags (ID: 02200002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	GRE packet with bad flag(s). Packet dropped
<b>Explanation</b>	Received GRE packet with a bad flag combination.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check GRE endpoint configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	Packet Buffer

### 2.15.3. gre\_bad\_version (ID: 02200003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	GRE packet with bad version (not 0). Packet dropped
<b>Explanation</b>	Received GRE packet with bad version.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check GRE endpoint configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	Packet Buffer

### 2.15.4. gre\_checksum\_error (ID: 02200004)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	GRE packet with checksum error. Packet dropped
<b>Explanation</b>	Received GRE packet with checksum errors.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check network equipment for errors.
<b>Revision</b>	1
<b>Context Parameters</b>	Packet Buffer

### 2.15.5. gre\_length\_error (ID: 02200005)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	GRE packet length error. Packet dropped
<b>Explanation</b>	Received GRE packet with length error.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check GRE endpoint configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	Packet Buffer

### 2.15.6. gre\_send\_routing\_loop\_detected (ID: 02200006)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Routing loop detected. GRE packet send failed
<b>Explanation</b>	Routing loop to the GRE endpoint detected.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check local routing.
<b>Revision</b>	1
<b>Context Parameters</b>	Packet Buffer

### 2.15.7. unmatched\_session\_key (ID: 02200007)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received GRE packet with unmatched session key. Packet dropped
<b>Explanation</b>	Received GRE packet with unmatched session key.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check GRE session key settings on the remote gateway.

<b>Revision</b>	1
<b>Parameters</b>	session_key
<b>Context Parameters</b>	Packet Buffer

## 2.15.8. gre\_routing\_flag\_set (ID: 02200008)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received GRE packet with routing flag set. Packet dropped
<b>Explanation</b>	Received GRE packet with unsupported routing option enabled.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check GRE configuration on remote gateway.
<b>Revision</b>	1
<b>Context Parameters</b>	Packet Buffer

## 2.16. HA

These log messages refer to the **HA (High Availability events)** category.

### 2.16.1. peer\_gone (ID: 01200001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Peer firewall disappeared. Going active
<b>Explanation</b>	The peer gateway (which was active) is not available anymore. This gateway will now go active instead.
<b>Gateway Action</b>	activate
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.16.2. peer\_gone (ID: 01200002)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Peer firewall disappeared.
<b>Explanation</b>	The peer gateway (which was inactive) is not available anymore. This gateway will continue to stay active.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.16.3. conflict\_both\_peers\_active (ID: 01200003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Conflict: Both peers are active! Resolving...
<b>Explanation</b>	A conflict occurred as both peers are active at the same time. The conflict will automatically be resolved.
<b>Gateway Action</b>	resolving
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.16.4. peer\_has\_higher\_local\_load (ID: 01200004)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Both active, peer has higher local load; staying active

<b>Explanation</b>	Both memebtrs are active, but the peer has higher local load. This gateway will stay active.
<b>Gateway Action</b>	stay_active
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.16.5. peer\_has\_lower\_local\_load (ID: 01200005)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Both active, peer has lower local load; deactivating
<b>Explanation</b>	Both members are active, but the peer has lower local load. This gateway will de-activate.
<b>Gateway Action</b>	deactivate
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.16.6. peer\_has\_more\_connections (ID: 01200006)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Both active, peer has more connections; deactivating
<b>Explanation</b>	Both members are active, but the peer has more connections. This gateway will de-activate.
<b>Gateway Action</b>	deactivate
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.16.7. peer\_has\_fewer\_connections (ID: 01200007)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Both active, peer has fewer connections; staying active
<b>Explanation</b>	Both members are active, but the peer has fewer connections. This gateway will stay active.
<b>Gateway Action</b>	stay_active
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.16.8. conflict\_both\_peers\_inactive (ID: 01200008)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Conflict: Both peers are inactive! Resolving...
<b>Explanation</b>	A conflict occurred as both peers are inactive at the same time. The conflict will automatically be resolved.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.16.9. peer\_has\_more\_connections (ID: 01200009)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Both inactive, peer has more connections; staying inactive...
<b>Explanation</b>	Both members are inactive, but the peer has more connections. This gateway will stay inactive.
<b>Gateway Action</b>	stay_deactivated
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.16.10. peer\_has\_fewer\_connections (ID: 01200010)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Both inactive, peer has fewer connections; going active...
<b>Explanation</b>	Both members are inactive, but the peer has fewer connections. This gateway will go active.
<b>Gateway Action</b>	activate
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.16.11. peer\_alive (ID: 01200011)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Peer firewall is alive
<b>Explanation</b>	The peer gateway is alive.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.16.12. heartbeat\_from\_unknown (ID: 01200043)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received HA heartbeat from unknown IP. Dropping
<b>Explanation</b>	The received HA heartbeat packet was originating from an unknown IP. The packet will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.16.13. should\_have\_arrived\_on\_sync\_iface (ID: 01200044)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	This packet should have arrived on the sync iface. Dropping
<b>Explanation</b>	The HA packet did not arrive on the sync interface. The packet will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.16.14. activate\_failed (ID: 01200050)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Failed to activate the configuration merged from HA partner
<b>Explanation</b>	The gateway failed to activate the merged configuration that was received from the peer.
<b>Gateway Action</b>	ha_activate_conf
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.16.15. merge\_failed (ID: 01200051)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Failed to merge configuration from HA partner
<b>Explanation</b>	The gateway failed to merge the configuration that was received from the peer.
<b>Gateway Action</b>	ha_merge_conf
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.16.16. ha\_commit\_error (ID: 01200052)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The merged HA configuration contains errors
<b>Explanation</b>	The merged HA configuration contains errors, and can not be committed.
<b>Gateway Action</b>	ha_commitchanges
<b>Recommended Action</b>	Resolve the errors and commit the changes again.
<b>Revision</b>	1

## 2.16.17. ha\_write\_failed (ID: 01200053)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Could not write HA configuration to disk
<b>Explanation</b>	The HA configuration could not be written to the storate media.
<b>Gateway Action</b>	ha_commitchanges
<b>Recommended Action</b>	Verify that the storage media is not write protected or damaged.
<b>Revision</b>	1

## 2.16.18. ha\_commit\_unknown\_error (ID: 01200054)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	An unknown error occured while saving the HA configuration
<b>Explanation</b>	An unknown error occured when the HA configuration was to be saved. It has not been committed.
<b>Gateway Action</b>	ha_commitchanges
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.16.19. linkmon\_triggered\_failover (ID: 01200055)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	HA node going inactive. <reason>
<b>Explanation</b>	Linkmon requested the node to go inactive.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason

## 2.16.20. resync\_conns\_to\_peer (ID: 01200100)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Initiating complete resynchronization of <numconns> connections to peer firewall
<b>Explanation</b>	All current connections will be re-synchronized to peer, as the peer has been restarted. Initializing re-synchronization process.
<b>Gateway Action</b>	resync_conns_init
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason numconns

## 2.16.21. hasync\_connection\_established (ID: 01200200)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	HASync connection to peer firewall established
<b>Explanation</b>	HA synchronization connection to peer has been established. Supported events will now be synchronized between the members of the HA cluster.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.16.22. hasync\_connection\_disconnected\_lifetime\_expired (ID: 01200201)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	HASync connection lifetime expired. Reconnecting...
<b>Explanation</b>	The HA synchronization connection lifetime has expired. A new connection will be established by reconnecting to the peer.
<b>Gateway Action</b>	reconnect
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.16.23. hasync\_connection\_failed\_timeout (ID: 01200202)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	HASync connection to peer firewall failed. Reconnecting...
<b>Explanation</b>	The HA synchronization connection attempt failed. Reconnecting to peer.
<b>Gateway Action</b>	reconnect
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.16.24. resync\_conns\_to\_peer\_complete (ID: 01200300)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Connection resynchronization to peer complete
<b>Explanation</b>	The connection resynchronization process to peer is complete. All connections has been synchronized.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.16.25. disallowed\_on\_sync\_iface (ID: 01200400)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received non-HA traffic on sync iface. Dropping
<b>Explanation</b>	A packet which is not a HA-related packet was received on the sync interface. This should not happend, and the packet will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1

<b>Context Parameters</b>	Rule Name Packet Buffer
---------------------------	----------------------------

## 2.16.26. sync\_packet\_on\_nonsync\_iface (ID: 01200410)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received state sync packet on non-sync iface. Dropping
<b>Explanation</b>	A HA state sync packet was recieved on a non-sync interface. This should never happend, and the packet will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.16.27. ttl\_too\_low (ID: 01200411)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received HA heartbeat with too low TTL. Dropping
<b>Explanation</b>	The received HA heartbeat packet had a TTL (Time-To-Live) field which is too low. The packet will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.16.28. heartbeat\_from\_myself (ID: 01200412)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received HA heartbeat from the gateway itself. Dropping
<b>Explanation</b>	The received HA heartbeat packet was originating from the gateway itself. The packet will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

**2.16.29. config\_sync\_failure (ID: 01200500)**

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Tried to synchronize configuration to peer 3 times without success. Giving up.
<b>Explanation</b>	The gateway tried to synchronize the configuration to peer three times, but failed. It will now give up trying to do so.
<b>Gateway Action</b>	give_up_synching
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	numretries

**2.16.30. action=deactivate reason=requested (ID: 01200616)**

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Both active, deactivation in progress.
<b>Explanation</b>	Both active, deactivation in progress.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

**2.16.31. action=activate reason=requested (ID: 01200617)**

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Both not active, activation in progress.
<b>Explanation</b>	Both not active, activation in progress.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

**2.16.32. action=going\_online (ID: 01200618)**

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Ha unit going online.
<b>Explanation</b>	Ha unit going online.

<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	previous_shutdown=

## 2.17. HWM

These log messages refer to the **HWM (Hardware monitor events)** category.

### 2.17.1. temperature\_alarm (ID: 04000011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Temperature monitor <index> (<name>) is outside the specified limit. Current value is <current_temp> <unit>, lower limit is <min_limit>, upper limit is <max_limit>
<b>Explanation</b>	The unit may be overheating, this may be because the cooling is failing or to hot enviroment.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	Shutdown the unit and determine the problem.
<b>Revision</b>	1
<b>Parameters</b>	index name unit current_temp min_limit max_limit

### 2.17.2. temperature\_normal (ID: 04000012)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Temperature monitor <index> (<name>) is outside the specified limit. Current value is <current_temp> <unit>, lower limit is <min_limit>, upper limit is <max_limit>
<b>Explanation</b>	The sensor reports that the temperature value is back in the normal range.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	index name unit current_temp min_limit max_limit

### 2.17.3. voltage\_alarm (ID: 04000021)

<b>Default Severity</b>	WARNING
-------------------------	---------

<b>Log Message</b>	Voltage monitor <index> (<name>) is outside the specified limit. Current value is <current_voltage> <unit>, lower limit is <min_limit>, upper limit is <max_limit>
<b>Explanation</b>	The powersupply of this unit may be failing.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	Change powersupply unit.
<b>Revision</b>	1
<b>Parameters</b>	index name unit current_voltage min_limit max_limit

## 2.17.4. voltage\_normal (ID: 04000022)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Voltage monitor <index> (<name>) is outside the specified limit. Current value is <current_voltage> <unit>, lower limit is <min_limit>, upper limit is <max_limit>
<b>Explanation</b>	The sensor reports that the voltage value is back in the normal range.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	index name unit current_voltage min_limit max_limit

## 2.17.5. fanrpm\_alarm (ID: 04000031)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Fan RPM monitor <index> (<name>) is outside the specified limit. Current value is <current_fanrpm> <unit>, value is <current_fanrpm> <unit>, lower limit is <min_limit>, upper limit is <max_limit>
<b>Explanation</b>	The fan is behaving strange, this may because it is failing or blocked.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	Unblock or change the corresponding fan.
<b>Revision</b>	1
<b>Parameters</b>	index

name  
unit  
current\_fanrpm  
min\_limit  
max\_limit

## 2.17.6. fanrpm\_normal (ID: 04000032)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Fan RPM monitor <index> (<name>) is outside the specified limit. Current value is <current_fanrpm> <unit>, lower limit is <min_limit>, upper limit is <max_limit>
<b>Explanation</b>	The sensor reports that the fan rpm value is back in the normal range.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	index name unit current_fanrpm min_limit max_limit

## 2.17.7. gpio\_alarm (ID: 04000041)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	GPIO monitor <index> (<name>) is outside the specified limit. Current value is <current_gpio> <unit>, value is <current_gpio> <unit>, lower limit is <min_limit>, upper limit is <max_limit>
<b>Explanation</b>	This varies depending on hardware model and what the GPIO is connected to.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	Depends on what the GPIO is connected to.
<b>Revision</b>	1
<b>Parameters</b>	index name unit current_gpio min_limit max_limit

## 2.17.8. gpio\_normal (ID: 04000042)

<b>Default Severity</b>	WARNING
-------------------------	---------

---

<b>Log Message</b>	Temperature monitor <index> (<name>) is outside the specified limit. Current value is <current_gpio> <unit>, lower limit is <min_limit>, upper limit is <max_limit>
<b>Explanation</b>	The sensor reports that the GPIO value is back into the normal range.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	index name unit current_gpio min_limit max_limit

## 2.17.9. free\_memory\_warning\_level (ID: 04000101)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Free memory has fallen below the specified limit of <limit_percentage> percent, limit classified is <severity>, free <free_mem> MB of total <total_mem> MB, percentage free <free_percentage>
<b>Explanation</b>	The amount of free memory is getting low.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Review the configuration and disable or lower settings to reduce memory consumption.
<b>Revision</b>	1
<b>Parameters</b>	limit_percentage total_mem free_mem free_percentage severity

## 2.17.10. free\_memory\_warning\_level (ID: 04000102)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Free memory has fallen below the specified limit of <limit_megabyte> megabyte, limit classified is <severity>, free <free_mem> MB of total <total_mem> MB, percentage free <free_percentage>
<b>Explanation</b>	The amount of free memory is getting low.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Review the configuration and disable or lower settings to reduce memory consumption.
<b>Revision</b>	1

---

<b>Parameters</b>	limit_megabyte total_mem free_mem free_percentage severity
-------------------	--

## 2.17.11. free\_memory\_normal\_level (ID: 04000103)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The amount of free memory is in the normal range, free <free_mem> MB of total <total_mem> MB, percentage free <free_percentage>
<b>Explanation</b>	The memory usage is in the normal range.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	total_mem free_mem free_percentage

## 2.18. IDP

These log messages refer to the **IDP (Intrusion Detection & Prevention events)** category.

### 2.18.1. scan\_detected (ID: 01300001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Scan detected: <description>, Signature ID=<signatureid>. ID Rule: <idrule>. Protocol: <ipproto>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>. Closing connection.
<b>Explanation</b>	A scan signature mapped to the "protect" action matched the traffic, closing connection.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Research the advisory (searchable by the unique ID), if you suspect an attack.
<b>Revision</b>	1
<b>Parameters</b>	description signatureid idrule ipproto srcip srcport destip destport
<b>Context Parameters</b>	Rule Name Deep Inspection

### 2.18.2. idp\_notice (ID: 01300002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IDP Notice: <description>, Signature ID=<signatureid>. ID Rule: <idrule>. Protocol: <ipproto>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>. Closing connection.
<b>Explanation</b>	A notice signature mapped to the "protect" action matched the traffic, closing connection.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	This is probably not an attack, but you may research the advisory (searchable by the unique ID).
<b>Revision</b>	1
<b>Parameters</b>	description signatureid idrule ipproto srcip

	srcport destip destport
<b>Context Parameters</b>	Rule Name Deep Inspection

### 2.18.3. intrusion\_detected (ID: 01300003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Intrusion detected: <description>, Signature ID=<signatureid>. ID Rule: <idrule>. Protocol: <ipproto>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>. Closing connection.
<b>Explanation</b>	An attack signature mapped to the "protect" action matched the traffic.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Research the advisory (searchable by the unique ID).
<b>Revision</b>	1
<b>Parameters</b>	description signatureid idrule ipproto srcip srcport destip destport
<b>Context Parameters</b>	Rule Name Deep Inspection

### 2.18.4. virus\_detected (ID: 01300004)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Virus/worm detected: <description>, Signature ID=<signatureid>. ID Rule: <idrule>. Protocol: <ipproto>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>. Closing connection.
<b>Explanation</b>	A virus signature mapped to the "protect" action matched the traffic.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Research the advisory (searchable by the unique ID).
<b>Revision</b>	1
<b>Parameters</b>	description signatureid idrule ipproto srcip srcport

	destip destport
<b>Context Parameters</b>	Rule Name Deep Inspection

## 2.18.5. scan\_detected (ID: 01300005)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Scan detected: <description>, Signature ID=<signatureid>. ID Rule: <idrule>. Protocol: <ipproto>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>.
<b>Explanation</b>	A scan signature matched the traffic.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Research the advisory (searchable by the unique ID).
<b>Revision</b>	1
<b>Parameters</b>	description signatureid idrule ipproto srcip srcport destip destport
<b>Context Parameters</b>	Rule Name Deep Inspection

## 2.18.6. idp\_notice (ID: 01300006)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	IDP Notice: <description>, Signature ID=<signatureid>. ID Rule: <idrule>. Protocol: <ipproto>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>.
<b>Explanation</b>	A notice signature matched the traffic.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	This is probably not an attack, but you may research the advisory (searchable by the unique ID).
<b>Revision</b>	1
<b>Parameters</b>	description signatureid idrule ipproto srcip srcport destip destport

---

<b>Context Parameters</b>	Rule Name Deep Inspection
---------------------------	------------------------------

## 2.18.7. intrusion\_detected (ID: 01300007)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Intrusion detected: <description>, Signature ID=<signatureid>. ID Rule: <idrule>. Protocol: <ipproto>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>.
<b>Explanation</b>	An attack signature matched the traffic.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Research the advisory (searchable by the unique ID).
<b>Revision</b>	1
<b>Parameters</b>	description signatureid idrule ipproto srcip srcport destip destport
<b>Context Parameters</b>	Rule Name Deep Inspection

## 2.18.8. virus\_detected (ID: 01300008)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Virus/Worm detected: <description>, Signature ID=<signatureid>. ID Rule: <idrule>. Protocol: <ipproto>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>.
<b>Explanation</b>	A virus signature matched the traffic.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Research the advisory (searchable by the unique ID).
<b>Revision</b>	1
<b>Parameters</b>	description signatureid idrule ipproto srcip srcport destip destport
<b>Context Parameters</b>	Rule Name Deep Inspection

---

## 2.18.9. invalid\_url\_format (ID: 01300009)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to parse the HTTP URL. ID Rule: <idrule>. URL: <url>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>. Closing connection.
<b>Explanation</b>	The unit failed parsing an URL. The reason for this is probably because the URL has an invalid format, or it contains invalid UTF8 formatted characters.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Make sure that the URL is formatted correctly.
<b>Revision</b>	1
<b>Parameters</b>	idrule url srcip srcport destip destport
<b>Context Parameters</b>	Rule Name

## 2.18.10. invalid\_url\_format (ID: 01300010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Failed to parse the HTTP URL. ID Rule: <idrule>. URL: <url>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>. Ignoring the URL.
<b>Explanation</b>	The unit failed parsing an URL. The reason for this is probably because the URL has an invalid format, or it contains invalid UTF8 formatted characters.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	Make sure that the URL is formatted correctly.
<b>Revision</b>	1
<b>Parameters</b>	idrule url srcip srcport destip destport
<b>Context Parameters</b>	Rule Name

## 2.18.11. idp\_evasion (ID: 01300011)

<b>Default Severity</b>	ERROR
-------------------------	-------

<b>Log Message</b>	Failed to reassemble data. ID Rule: <idrule>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>. Closing connection.
<b>Explanation</b>	The unit failed to reassemble data. The reason for this is probably due to an IDP engine evasion attack.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	idrule srcip srcport destip destport
<b>Context Parameters</b>	Rule Name

## 2.18.12. idp\_evasion (ID: 01300012)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to reassemble data. ID Rule: <idrule>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>.
<b>Explanation</b>	The unit failed to reassemble data. The reason for this is probably due to an IDP engine evasion attack.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	idrule srcip srcport destip destport
<b>Context Parameters</b>	Rule Name

## 2.18.13. idp\_outofmem (ID: 01300013)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to scan data. ID Rule: <idrule>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>. Closing connection.
<b>Explanation</b>	The unit failed to scan data. The reason for this is due to low amount of memory.
<b>Gateway Action</b>	close

<b>Recommended Action</b>	Review your configuration.
<b>Revision</b>	1
<b>Parameters</b>	idrule srcip srcport destip destport
<b>Context Parameters</b>	Rule Name

## 2.18.14. idp\_outofmem (ID: 01300014)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to scan data. ID Rule: <idrule>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>.
<b>Explanation</b>	The unit failed to scan data. The reason for this is due to low amount of memory.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	Review your configuration.
<b>Revision</b>	1
<b>Parameters</b>	idrule srcip srcport destip destport
<b>Context Parameters</b>	Rule Name

## 2.18.15. idp\_failscan (ID: 01300015)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to scan data. ID Rule: <idrule>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>. Reason: reason>. Closing connection.
<b>Explanation</b>	The unit failed to scan data.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	idrule srcip srcport destip destport reason

**Context Parameters**      Rule Name

## 2.18.16. idp\_failscan (ID: 01300016)

**Default Severity**      ERROR

**Log Message**      Failed to scan data. ID Rule: <idrule>. Source IP: <srcip>. Source Port: <srcport>. Destination IP: <destip>. Destination Port: <destport>. Reason: <reason>.

**Explanation**      The unit failed to scan data.

**Gateway Action**      ignore

**Recommended Action**      None.

**Revision**      1

**Parameters**      idrule  
srcip  
srcport  
destip  
destport  
reason

**Context Parameters**      Rule Name

## 2.19. IDPUPDATE

These log messages refer to the **IDPUPDATE (Intrusion Detection & Prevention Database update)** category.

### 2.19.1. idp\_db\_update\_failure (ID: 01400001)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Update of the Intrusion Detection & Prevention database failed, because of <reason>
<b>Explanation</b>	The unit tried to update the Intrusion Detection & Prevention database, but failed. The reason for this is specified in the "reason" parameter.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason

### 2.19.2. idp\_database\_downloaded (ID: 01400002)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	New Intrusion Detection & Prevention database downloaded
<b>Explanation</b>	An updated version of the Intrusion Detection & Prevention database has been downloaded, which will now be used.
<b>Gateway Action</b>	using_new_database
<b>Recommended Action</b>	None.
<b>Revision</b>	2

### 2.19.3. idp\_db\_already\_up\_to\_date (ID: 01400003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Intrusion Detection & Prevention database is up-to-date
<b>Explanation</b>	The current Intrusion Detection & Prevention database is up-to-date, and does not need to be updated.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.19.4. idp\_db\_update\_denied (ID: 01400004)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Intrusion Detection & Prevention database could not be updated, as no valid subscription exist
<b>Explanation</b>	The current license does not allow Intrusion Detection & Prevention database to be updated.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Check the system's time and/or purchase a subscription.
<b>Revision</b>	1

## 2.19.5. idp\_detects\_invalid\_system\_time (ID: 01400005)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	System clock is not properly set. Invalid date (<date>) in IDP signature file. IDP disabled
<b>Explanation</b>	The system clock is not up to date. The system clock must be set correctly in order to use the IDP features. IDP features remains disabled until clock is correct and a manual IDP update has been performed.
<b>Gateway Action</b>	idp_disabled
<b>Recommended Action</b>	Check and set the system time correct and perform a manual IDP update.
<b>Revision</b>	1
<b>Parameters</b>	date

## 2.19.6. downloading\_new\_database (ID: 01400007)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Downloading new IDP database
<b>Explanation</b>	A new IDP database is available. The database is being downloaded.
<b>Gateway Action</b>	downloading_new_database
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.19.7. unsynced\_databases (ID: 01400009)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unsynchronized hardware and software databases detected
<b>Explanation</b>	The IDP hardware and software databases are not synchronized. A full

	update is automatically initiated.
<b>Gateway Action</b>	downloading_new_database
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.20. IFACEMON

These log messages refer to the **IFACEMON (Interface monitor events)** category.

### 2.20.1. ifacemon\_status\_bad\_rereport (ID: 03900001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	IfaceMon reset interface <iface> 10 seconds ago. Link status: <linkspeed> Mbps <duplex> duplex
<b>Explanation</b>	The Interface Monitor reset the interface 10 seconds ago.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	delay iface [linkspeed] [duplex]

### 2.20.2. ifacemon\_status\_bad (ID: 03900003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IfaceMon reports interface problems on <iface>. Resetting interface. Link status: <linkspeed> Mbps <duplex> duplex
<b>Explanation</b>	The Interface Monitor has discovered problems on an interface, and will reset it.
<b>Gateway Action</b>	nic_reset
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface linkspeed duplex

### 2.20.3. ifacemon\_status\_bad (ID: 03900004)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IfaceMon reports interface problems on <iface> Resetting interface
<b>Explanation</b>	The Interface Monitor has discovered problems on an interface, and will reset it.
<b>Gateway Action</b>	nic_reset
<b>Recommended Action</b>	None.

<b>Revision</b>	1
<b>Parameters</b>	iface [linkspeed] [duplex]

## 2.21. IGMP

These log messages refer to the **IGMP (IGMP events)** category.

### 2.21.1. querier\_election\_won (ID: 04200001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Taking on the role of Querier at interface <iface>.
<b>Explanation</b>	This router is now the IGMP Querier at the specified interface.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface

### 2.21.2. querier\_election\_lost (ID: 04200002)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Lost Querier election to <dest> at interface <iface>.
<b>Explanation</b>	"I" am no longer the IMGP Querier at the specified interface.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	dest iface

### 2.21.3. invalid\_dest\_ip\_address (ID: 04200003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Rejected IGMP message directed to unicast IP <ip_dest> at interface <recv_if>.
<b>Explanation</b>	Rejected IGMP message directed to a unicast IP. Possible IGMP DoS attack. Note that sending IGMP messages to a unicast IP is legal with IGMPv1 and IGMPv2, but not recommended.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Identify the offending application, upgrade if possible.
<b>Revision</b>	1
<b>Parameters</b>	recv_if ip_dest

Context Parameters      Packet Buffer

## 2.21.4. invalid\_destination\_ethernet\_address (ID: 04200004)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Rejected IGMP message with inconsistent IP/ethernet addresses (<ipdest>/<edest>) at interface <recv_if>.
<b>Explanation</b>	Rejected IGMP message directed to a unicast ethernet. Known IGMP DoS attack.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Identify the offending application or user, isolate or upgrade if possible.
<b>Revision</b>	1
<b>Parameters</b>	recv_if ipdest edest
<b>Context Parameters</b>	Packet Buffer

## 2.21.5. failed\_restarting\_igmp\_conn (ID: 04200006)

<b>Default Severity</b>	EMERG
<b>Log Message</b>	Could not restart the IGMP listening conn. Reason: Out of memory
<b>Explanation</b>	Could not restart the IGMP listening conn. The IGMP system is no longer functional since it cannot handle IGMP requests.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Reboot the system.
<b>Revision</b>	1

## 2.21.6. invalid\_size\_query\_packet (ID: 04200007)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Broken IGMP Query at interface <recv_if> (payload exceeds packet size).
<b>Explanation</b>	Harmful condition that potentially could give an attacker full access to the system. May indicate faulty hardware, an attack or experimental software.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None, but keep an eye open for malfunctional software/hardware somewhere on the network.

---

<b>Revision</b>	1
<b>Parameters</b>	recv_if
<b>Context Parameters</b>	Packet Buffer

## 2.21.7. invalid\_query\_group\_address (ID: 04200008)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	IGMP group specific query at interface <recv_if> about group <grp> (<grp_sat> after being SAT'ed) includes unicast ip address.
<b>Explanation</b>	Unicast IP address found inside group specific query. This is most likely a faulty SAT config.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check your IGMP ruleset to see if a muticast group somehow might be translated into a unicast address.
<b>Revision</b>	1
<b>Parameters</b>	recv_if grp grp_sat
<b>Context Parameters</b>	Packet Buffer

## 2.21.8. igmp\_query\_dropped (ID: 04200009)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Rule <name> dropped IGMP Query about group <grp> and source <src> at interface <if> from router <rip>.
<b>Explanation</b>	Dropped IGMP Query.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	if rip igmpver grp src name

## 2.21.9. igmp\_query\_received (ID: 04200010)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Rule <name> <action> IGMP Query about group <grp> and source <src> at interface <if> from router <rip>. Group <grp> is translated

---

	into <sgrp> and source <src> into <ssrc>.
<b>Explanation</b>	Got IGMP Query.
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	if rip igmpver grp src sgrp ssrc name action

## 2.21.10. bad\_src (ID: 04200011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Rule <name> drops multicast sender <src> (SAT'ed into <sats>) in group <grp> (SAT'ed into <satg>) specific IGMP Query at interface <iface>.
<b>Explanation</b>	This is most likely a faulty IGMP configuration, but may also indicate faulty software on the network. Under special circumstances this could be an active attempt to scan the network for information.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Specifically check your IGMP ruleset for incorrect SAT information (IGMP support requires at least one "REPORT" (Member Report) rule and one matching "QUERY" rule). Make sure both multicast groups and source addresses map one-to-one between Member Reports and Queries. Finally check the network for for other anomalies that could indicate broken equipment or installed "spyware".
<b>Revision</b>	1
<b>Parameters</b>	name src grp sats satg iface

## 2.21.11. igmp\_report\_received (ID: 04200012)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Rule <name> <action> IGMP Member Report concerning group <grp> and source <src> at interface <if> from host <hip>. Group <grp> is translated into <sgrp> and source <src> into <ssrc>
<b>Explanation</b>	Got IGMP Report.

---

---

<b>Gateway Action</b>	allow
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	if hip igmpver grp src sgrp ssrc name action

## 2.21.12. packet\_includes\_aux\_data (ID: 04200013)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IGMP Group record <grp> from interface <recv_if> contains auxilliary data.
<b>Explanation</b>	This software support IGMPv1, IGMPv2 and IGMPv3 and none of them support the feature known as "Auxilliary Data". This is a broken packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If this is a legal situation and the administrator have no reason to suspect an attack, upgrading this software may solve the problem.
<b>Revision</b>	1
<b>Parameters</b>	recv_if grp
<b>Context Parameters</b>	Packet Buffer

## 2.21.13. invalid\_size\_report\_packet (ID: 04200014)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Broken IGMP Member Report at interface <recv_if>. Group record <grp> makes payload larger than IGMP packet size.
<b>Explanation</b>	Harmful condition that potentially could give an attacker full access to the system. May indicate faulty hardware, an attack or experimental software.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None, but keep an eye open for for broken hardware somewhere in the network.
<b>Revision</b>	1
<b>Parameters</b>	recv_if grp

Context Parameters	Packet Buffer
--------------------	---------------

## 2.21.14. bad\_grp (ID: 04200015)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Bad IGMP Member Report at interface <iface>: Group record request group <grp> (which is not a multicast group).
<b>Explanation</b>	This is most likely a faulty IGMP config.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Specifically check for inconsistent SAT/NAT information in the IGMP config.
<b>Revision</b>	1
<b>Parameters</b>	grp iface

## 2.21.15. invalid\_report\_grp\_record (ID: 04200016)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Bad IGMP Member Report received. Group record <grp> of unknown type <type>.
<b>Explanation</b>	This indicates faulty software/hardware somewhere on the network.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None, but keep an eye open for for broken hardware somewhere in the network.
<b>Revision</b>	1
<b>Parameters</b>	grp type
<b>Context Parameters</b>	Packet Buffer

## 2.21.16. igmp\_report\_dropped (ID: 04200017)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Rule <name> drops IGMP Member Report concerning group <grp> and source <src> at interface <if> from host <hip>.
<b>Explanation</b>	Dropped IGMP Report.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1

<b>Parameters</b>	if hip igmpver grp src sat_grp sat_src name
-------------------	--

## 2.21.17. igmp\_ruleset\_rejects\_report (ID: 04200018)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Rule <name> drops multicast sender <src> for group record <grp> in Member Report at interface <iface>.
<b>Explanation</b>	IGMP Member Report contains an unwanted IP sender.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	name src grp iface

## 2.21.18. bad\_inet (ID: 04200019)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Rejected IGMP message from incorrect IP <src> at interface <iface>.
<b>Explanation</b>	Rejected IGMP message because it claims to have been sent by "me", but I know I did not send any. Possible IGMP DoS attack, but more likely an IP conflict. .
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Assign a different IP to the offending application.
<b>Revision</b>	1
<b>Parameters</b>	src iface
<b>Context Parameters</b>	Packet Buffer

## 2.21.19. max\_global\_requests\_per\_second\_reached (ID: 04200020)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Rejected IGMP message. Global requests per second rate reached

---

<b>Explanation</b>	Too many IGMP requests received per second. Possible IGMP DoS attack.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Increase global IGMPMaxReqs per second limit if more requests are wanted.
<b>Revision</b>	1
<b>Parameters</b>	ipsrc iface

## 2.21.20. max\_if\_requests\_per\_second\_reached (ID: 04200021)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Rejected IGMP message. Max requests per second and interface rate reached
<b>Explanation</b>	Too many IGMP requests received per second. Possible IGMP DoS attack.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Increase IGMPMaxReqsIf per second limit if more requests are wanted.
<b>Revision</b>	1
<b>Parameters</b>	ipsrc iface

## 2.21.21. disallowed\_igmp\_version (ID: 04200022)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Disallowed IGMP Version
<b>Explanation</b>	A system is using a too old IGMP version.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Upgrade the host/router running the disallowed version, or lower LowestIGMPVer limit.
<b>Revision</b>	1
<b>Parameters</b>	recv_ver required_ver
<b>Context Parameters</b>	Packet Buffer

## 2.21.22. received\_unknown\_igmp\_type (ID: 04200023)

<b>Default Severity</b>	NOTICE
-------------------------	--------

---

---

<b>Log Message</b>	Dropped IGMP message with unknown type.
<b>Explanation</b>	Invalid IGMP message type received.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None, but keep an eye open for malfunctional software/hardware on the network.
<b>Revision</b>	1
<b>Parameters</b>	MSGType
<b>Context Parameters</b>	Packet Buffer

## 2.21.23. older\_querier\_present (ID: 04200024)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Entering IGMPv<igmpver> Older Querier Present compatibility mode on interface <iface> because of a received General Query from <rip>.
<b>Explanation</b>	The router will use IGMPv[igmpver] when it is snooping/proxying IGMP messages upstream.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface rip igmpver

## 2.21.24. older\_querier\_gone (ID: 04200025)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	No IGMPv<igmpver> querier present. Older Querier Present (IGMPv<igmpver>) compatibility mode on interface <iface> has ended. Entering IGMPv<nigmpver> mode.
<b>Explanation</b>	The router has not heard any IGMPv[igmpver] general queries and will switch and use IGMPv[nigmpver] version when snooping/proxying IGMP messages upstream.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface igmpver nigmpver

## 2.22. IPPOOL

These log messages refer to the **IPPOOL (IPPool events)** category.

### 2.22.1. no\_offer\_received (ID: 01900001)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	No offers were received
<b>Explanation</b>	No DHCP offers were received by the IP pool general query.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Review DHCP server parameters and IP pool configuration.
<b>Revision</b>	1
<b>Parameters</b>	waited
<b>Context Parameters</b>	Rule Name

### 2.22.2. no\_valid\_dhcp\_offer\_received (ID: 01900002)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	No valid DHCP offers were received
<b>Explanation</b>	No valid DHCP offers were received.
<b>Gateway Action</b>	no_new_client_created
<b>Recommended Action</b>	Review DHCP server parameters and IP pool filters.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

### 2.22.3. too\_many\_dhcp\_offers\_received (ID: 01900003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Too many DHCP offers received. This and subsequent offers will be ignored
<b>Explanation</b>	Too many DHCP offers received.
<b>Gateway Action</b>	ignoring_offer
<b>Recommended Action</b>	Limit the number of DHCP servers on the locally attached network.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

### 2.22.4. lease\_disallowed\_by\_lease\_filter (ID: 01900004)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The lease was rejected due to a lease filter
<b>Explanation</b>	A lease was rejected by a lease filter.
<b>Gateway Action</b>	lease_rejected
<b>Recommended Action</b>	Verify the lease filters.
<b>Revision</b>	1
<b>Parameters</b>	client_ip
<b>Context Parameters</b>	Rule Name

### 2.22.5. lease\_disallowed\_by\_server\_filter (ID: 01900005)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The lease was rejected due to a server filter
<b>Explanation</b>	A lease was rejected by a server filter.
<b>Gateway Action</b>	lease_rejected
<b>Recommended Action</b>	Verify the server filters.
<b>Revision</b>	1
<b>Parameters</b>	server_ip
<b>Context Parameters</b>	Rule Name

### 2.22.6. lease\_have\_bad\_dhcp\_server (ID: 01900006)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The lease was rejected due to a bad DHCP-server address
<b>Explanation</b>	A lease was rejected due to a bad DHCP server address.
<b>Gateway Action</b>	lease_rejected
<b>Recommended Action</b>	Check DHCP server configuration.
<b>Revision</b>	1
<b>Parameters</b>	client_ip
<b>Context Parameters</b>	Rule Name

### 2.22.7. lease\_have\_bad\_netmask (ID: 01900007)

<b>Default Severity</b>	WARNING
-------------------------	---------

---

<b>Log Message</b>	The lease was rejected due to a bad offered netmask address
<b>Explanation</b>	A lease was rejected due to a bad offered netmask address.
<b>Gateway Action</b>	lease_rejected
<b>Recommended Action</b>	Check DHCP server configuration.
<b>Revision</b>	1
<b>Parameters</b>	netmask
<b>Context Parameters</b>	Rule Name

## 2.22.8. lease\_have\_bad\_offered\_broadcast (ID: 01900008)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The lease was rejected due to a bad offered broadcast address
<b>Explanation</b>	A lease was rejected due to a bad offered broadcast address.
<b>Gateway Action</b>	lease_rejected
<b>Recommended Action</b>	Check DHCP server configuration.
<b>Revision</b>	1
<b>Parameters</b>	broadcast
<b>Context Parameters</b>	Rule Name

## 2.22.9. lease\_have\_bad\_offered\_ip (ID: 01900009)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The lease was rejected due to a bad offered IP address
<b>Explanation</b>	A lease was rejected due to a bad offered IP address.
<b>Gateway Action</b>	lease_rejected
<b>Recommended Action</b>	Check DHCP server configuration.
<b>Revision</b>	1
<b>Parameters</b>	client_ip
<b>Context Parameters</b>	Rule Name

## 2.22.10. lease\_have\_bad\_gateway\_ip (ID: 01900010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The lease was rejected due to a bad offered gateway address
<b>Explanation</b>	A lease was rejected due to a bad offered gateway address.

<b>Gateway Action</b>	lease_rejected
<b>Recommended Action</b>	Check DHCP server configuration.
<b>Revision</b>	1
<b>Parameters</b>	gateway_ip
<b>Context Parameters</b>	Rule Name

## 2.22.11. lease\_ip\_is\_already\_occupied (ID: 01900011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The lease was rejected since it seem to be occupied
<b>Explanation</b>	A lease was rejected since it seem to be occupied.
<b>Gateway Action</b>	lease_rejected
<b>Recommended Action</b>	Check DHCP server configuration and statically configured hosts.
<b>Revision</b>	1
<b>Parameters</b>	client_ip
<b>Context Parameters</b>	Rule Name

## 2.22.12. lease\_rejected\_by\_server (ID: 01900012)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The lease was rejected by server
<b>Explanation</b>	A lease was rejected by the DHCP server.
<b>Gateway Action</b>	lease_rejected
<b>Recommended Action</b>	Check DHCP server configuration.
<b>Revision</b>	1
<b>Parameters</b>	client_ip
<b>Context Parameters</b>	Rule Name

## 2.22.13. ip\_offer\_already\_exist\_in\_the\_pool (ID: 01900013)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The lease was rejected since the offered IP already exist in the pool
<b>Explanation</b>	A lease was rejected since the offered IP already exists in the pool.
<b>Gateway Action</b>	lease_rejected
<b>Recommended Action</b>	Check IP pool configuration.

<b>Revision</b>	1
<b>Parameters</b>	client_ip
<b>Context Parameters</b>	Rule Name

## 2.22.14. pool\_reached\_max\_dhcp\_clients (ID: 01900014)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	The maximum number of clients for this IP pool have been reached
<b>Explanation</b>	The maximum number of clients for this pool have been reached.
<b>Gateway Action</b>	no_new_client_created
<b>Recommended Action</b>	Verify max clients limitation for the pool.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

## 2.22.15. macrange\_depleted (ID: 01900015)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	The range of MAC addresses for the DHCP clients have been depleted
<b>Explanation</b>	The configured range of MAC addresses for the DHCP clients have been depleted.
<b>Gateway Action</b>	no_new_client_created
<b>Recommended Action</b>	Expand the MAC address range.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

## 2.22.16. ip\_fetched\_pool (ID: 01900016)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Subsystem fetched a IP from the pool
<b>Explanation</b>	A subsystem fetched an IP from the pool.
<b>Gateway Action</b>	inform
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_ip subsystem
<b>Context Parameters</b>	Rule Name

## 2.22.17. ip\_returned\_to\_pool (ID: 01900017)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Subsystem returned an IP to the pool
<b>Explanation</b>	A subsystem returned an IP to the pool.
<b>Gateway Action</b>	inform
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_ip subsystem
<b>Context Parameters</b>	Rule Name

## 2.23. IPSEC

These log messages refer to the **IPSEC (IPsec (VPN) events)** category.

### 2.23.1. fatal\_ipsec\_event (ID: 01800100)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Fatal event occurred, because of <reason>
<b>Explanation</b>	Fatal event occurred in IPsec stack.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason

### 2.23.2. warning\_ipsec\_event (ID: 01800101)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Warning event occurred, because of <reason>
<b>Explanation</b>	Warning event from IPsec stack.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason

### 2.23.3. audit\_event (ID: 01800103)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Source IP: <source_ip>, Destination IP: <dest_ip>, SPI: <spi>, Seq: <seq>, Protocol: <protocol>, Reason: <reason>.
<b>Explanation</b>	An audit event occurred in the IPsec stack.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	source_ip dest_ip spi seq protocol reason

## 2.23.4. audit\_flood (ID: 01800104)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	<reason>.
<b>Explanation</b>	The rate limit for audit messages was reached.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason

## 2.23.5. ike\_delete\_notification (ID: 01800105)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Local IP: <local_ip>, Remote IP: <remote_ip>, Cookies: <cookies>, Reason: <reason>.
<b>Explanation</b>	None.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	local_ip remote_ip cookies reason

## 2.23.6. ike\_invalid\_payload (ID: 01800106)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Local IP: <local_ip>, Remote IP: <remote_ip>, Cookies: <cookies>, Reason: <reason>.
<b>Explanation</b>	None.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	local_ip remote_ip cookies reason

## 2.23.7. ike\_invalid\_proposal (ID: 01800107)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Local IP: <local_ip>, Remote IP: <remote_ip>, Cookies: <cookies>, Reason: <reason>.
<b>Explanation</b>	The proposal for the security association could not be accepted.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	local_ip remote_ip cookies reason

## 2.23.8. ike\_retry\_limit\_reached (ID: 01800108)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Local IP: <local_ip>, Remote IP: <remote_ip>, Cookies: <cookies>, Reason: <reason>.
<b>Explanation</b>	The retry limit for transmitting ISAKMP messages was reached.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	local_ip remote_ip cookies reason

## 2.23.9. ike\_quickmode\_failed (ID: 01800109)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Local IP: <local_ip>, Remote IP: <remote_ip>, Cookies: <cookies>, Reason: <reason>.
<b>Explanation</b>	None.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	local_ip remote_ip cookies

reason

## 2.23.10. packet\_corrupt (ID: 01800110)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Source IP: <source_ip>, Destination IP: <dest_ip>, SPI: <spi>, Seq: <seq>, Protocol: <protocol>, Reason: <reason>.
<b>Explanation</b>	Received a corrupt packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	source_ip dest_ip spi seq protocol reason

## 2.23.11. icv\_failure (ID: 01800111)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Source IP: <source_ip>, Destination IP: <dest_ip>, SPI: <spi>, Seq: <seq>, Protocol: <protocol>, Reason: <reason>.
<b>Explanation</b>	The computed and ICV of the received packet did not match.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	source_ip dest_ip spi seq protocol reason

## 2.23.12. sequence\_number\_failure (ID: 01800112)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Source IP: <source_ip>, Destination IP: <dest_ip>, SPI: <spi>, Seq: <seq>, Protocol: <protocol>, Reason: <reason>.
<b>Explanation</b>	The received packet did not fall within the sliding window.
<b>Gateway Action</b>	drop

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	source_ip dest_ip spi seq protocol reason

### 2.23.13. sa\_lookup\_failure (ID: 01800113)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Source IP: <source_ip>, Destination IP: <dest_ip>, SPI: <spi>, Seq: <seq>, Protocol: <protocol>, Reason: <reason>.
<b>Explanation</b>	The received packet could not be mapped to an appropriate SA.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	source_ip dest_ip spi seq protocol reason

### 2.23.14. ip\_fragment (ID: 01800114)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Source IP: <source_ip>, Destination IP: <dest_ip>, SPI: <spi>, Seq: <seq>, Protocol: <protocol>, Reason: <reason>.
<b>Explanation</b>	The packet offered to AH/ESP processing appears to be an IP fragment.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	source_ip dest_ip spi seq protocol reason

### 2.23.15. sequence\_number\_overflow (ID: 01800115)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Source IP: <source_ip>, Destination IP: <dest_ip>, SPI: <spi>, Seq: <seq>, Protocol: <protocol>, Reason: <reason>.
<b>Explanation</b>	An attempt to transmit a packet that would result in sequence number overflow.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	source_ip dest_ip spi seq protocol reason

## 2.23.16. bad\_padding (ID: 01800116)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Source IP: <source_ip>, Destination IP: <dest_ip>, SPI: <spi>, Seq: <seq>, Protocol: <protocol>, Reason: <reason>.
<b>Explanation</b>	The received packet has incorrect padding.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	source_ip dest_ip spi seq protocol reason

## 2.23.17. hardware\_accelerator\_congested (ID: 01800117)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Source IP: <source_ip>, Destination IP: <dest_ip>, SPI: <spi>, Seq: <seq>, Protocol: <protocol>, Reason: <reason>.
<b>Explanation</b>	Hardware acceleration failed due to resource shortage.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1

<b>Parameters</b>	source_ip dest_ip spi seq protocol reason
-------------------	--

## 2.23.18. hardware\_acceleration\_failure (ID: 01800118)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Source IP: <source_ip>, Destination IP: <dest_ip>, SPI: <spi>, Seq: <seq>, Protocol: <protocol>, Reason: <reason>.
<b>Explanation</b>	Hardware acceleration failed due to resource shortage, a corrupt packet or other hardware related error.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	source_ip dest_ip spi seq protocol reason

## 2.23.19. commit\_failed (ID: 01800200)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Failed to commit IPsec configuration
<b>Explanation</b>	Failed to commit IPsec configuration.
<b>Gateway Action</b>	IPsec_configuration_disabled
<b>Recommended Action</b>	Reconfigure_IPsec.
<b>Revision</b>	1

## 2.23.20. commit\_succeeded (ID: 01800201)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Commit succeeded - recalculating flows and reapplying routes
<b>Explanation</b>	Succeeded to commit IPsec configuration. Flows will be recalculated and reapplied.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.

Revision 1

## 2.23.21. IPsec\_successfully\_started (ID: 01800202)

**Default Severity** INFORMATIONAL  
**Log Message** IPsec is up and running  
**Explanation** IPsec configured and started.  
**Gateway Action** None  
**Recommended Action** None.  
Revision 1

## 2.23.22. x509\_init\_failed (ID: 01800203)

**Default Severity** CRITICAL  
**Log Message** Failed to initilaze x509 library  
**Explanation** Failed to initilaze x509 library.  
**Gateway Action** IPsec\_configuration\_disabled  
**Recommended Action** None.  
Revision 1

## 2.23.23. pm\_create\_failed (ID: 01800204)

**Default Severity** ERROR  
**Log Message** Failed to create policymanager  
**Explanation** Failed to create policymanager. Out of memory.  
**Gateway Action** reduce\_number\_of\_tunnels  
**Recommended Action** None.  
Revision 1

## 2.23.24. failed\_to\_start\_ipsec (ID: 01800206)

**Default Severity** ERROR  
**Log Message** Disable all IPsec tunnels  
**Explanation** Disable all IPsec tunnels due to memory limitations.  
**Gateway Action** disable\_all\_ipsec\_interfaces  
**Recommended Action** None.

---

Revision 1

## 2.23.25. failed\_create\_audit\_module (ID: 01800207)

**Default Severity** ERROR  
**Log Message** Failed to create audit module.  
**Explanation** Failed to create audit module.  
**Gateway Action** IPsec\_audit\_disabled  
**Recommended Action** None.  
Revision 1

## 2.23.26. failed\_to\_configure\_IPsec (ID: 01800210)

**Default Severity** CRITICAL  
**Log Message** Failed during configuration with error: <error\_msg>  
**Explanation** Failed to set IPsec configuration.  
**Gateway Action** IPsec\_configuration\_disabled  
**Recommended Action** Reconfigure\_IPsec.  
Revision 1  
**Parameters** error\_msg

## 2.23.27. reconfig\_IPsec (ID: 01800211)

**Default Severity** INFORMATIONAL  
**Log Message** Reconfiguration of IPsec started  
**Explanation** Reconfiguration of IPsec started.  
**Gateway Action** ipsec\_reconfigured  
**Recommended Action** None.  
Revision 2

## 2.23.28. IPsec\_init\_failed (ID: 01800213)

**Default Severity** CRITICAL  
**Log Message** Failed to initialize IPsec  
**Explanation** Failed to start IPsec.  
**Gateway Action** IPsec\_configuration\_disabled

---

<b>Recommended Action</b>	Restart.
<b>Revision</b>	1

## 2.23.29. ipsec\_started\_successfully (ID: 01800214)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	IPsec started successfully
<b>Explanation</b>	Succeeded to create Policymanger and commit IPsec configuration.
<b>Gateway Action</b>	ipsec_started
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.30. Failed\_to\_add\_certificate (ID: 01800302)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed add host certificate: <certificate>, for tunnel <tunnel>
<b>Explanation</b>	Failed to add specified host certificate.
<b>Gateway Action</b>	certificate_disabled
<b>Recommended Action</b>	Reconfigure_tunnnel.
<b>Revision</b>	1
<b>Parameters</b>	certificate tunnel

## 2.23.31. Default\_IKE\_DH\_groups\_will\_be\_used (ID: 01800303)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Default configuration for IKE DH groups (2 and 5) will be used for tunnel: <tunnel>
<b>Explanation</b>	Inform that default DH groups settings will be used.
<b>Gateway Action</b>	Use_default_IKE_DH_groups
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tunnel

## 2.23.32. failed\_to\_set\_algorithm\_properties (ID: 01800304)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to set properties IPsec algorithm <alg>, for tunnel <tunnel>
<b>Explanation</b>	Failed to set specified properties (keysize, lifetimes) for IPsec algorithm.
<b>Gateway Action</b>	use_default_values_for_algorithm
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	alg tunnel

### 2.23.33. failed\_to\_set\_algorithm\_properties (ID: 01800305)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to set properties for IKE algorithm <alg>, for tunnel <tunnel>
<b>Explanation</b>	Failed to set specified properties (keysize, lifetimes) for IKE algorithm.
<b>Gateway Action</b>	use_default_values_for_algorithm
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	alg tunnel

### 2.23.34. failed\_to\_add\_root\_certificate (ID: 01800306)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed add root certificate: <certificate>, for tunnel <tunnel>
<b>Explanation</b>	Failed to set specified certificate as root certificate.
<b>Gateway Action</b>	disable_certificate
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	1
<b>Parameters</b>	certificate tunnel

### 2.23.35. dns\_resolve\_failed (ID: 01800308)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Failed to resolve remote gateway <gateway> for IPsec Tunnel

---

	<ipsectunnel>. Keeping old IP <old_ip>
<b>Explanation</b>	Failed to resolve remote gateway through DNS.
<b>Gateway Action</b>	keeping_old_ip
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	gateway ipsectunnel old_ip

## 2.23.36. dns\_resolve\_failed (ID: 01800309)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Failed to resolve remote gateway <gateway> for IPsec Tunnel <ipsectunnel>. Disabling IPsec tunnel
<b>Explanation</b>	Failed to resolve remote gateway through DNS.
<b>Gateway Action</b>	IPsec_tunnel_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	gateway ipsectunnel

## 2.23.37. failed\_to\_add\_peer (ID: 01800312)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to add remote gateway: <gateway> resolved by DNS for IPsec tunnel: <ipsectunnel>
<b>Explanation</b>	Failed to add remote gateway, that have been resolved by DNS, to tunnel.
<b>Gateway Action</b>	IPsec_tunnel_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	gateway ipsectunnel

## 2.23.38. failed\_to\_add\_rules (ID: 01800313)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to add rules after remote gw: <gateway> have been resolved by DNS for IPsec tunnel: <ipsectunnel>

---

<b>Explanation</b>	Failed to add rules to tunnel after remote gateway have been resolved by DNS.
<b>Gateway Action</b>	IPsec_tunnel_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	gateway ipsectunnel

### 2.23.39. failed\_to\_add\_rules (ID: 01800314)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to commit rules after remote gw: <gateway> have been resolved by DNS for IPsec tunnel: <ipsectunnel>
<b>Explanation</b>	Failed to add rules to tunnel after remote gateway have been resolved by DNS.
<b>Gateway Action</b>	IPsec_tunnel_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	gateway ipsectunnel

### 2.23.40. new\_remote\_gw\_ip (ID: 01800315)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Resolved remote-gateway <gateway> to IP <ip> for IPsec tunnel <ipsectunnel>
<b>Explanation</b>	Tunnel have succesfully been reconfigured after remote gateway have been resolved.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	gateway ipsectunnel ip

### 2.23.41. no\_policymanager (ID: 01800316)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	No policymanager!! to free tunnel object from

<b>Explanation</b>	No policymanager to free tunnel from!!! IPsec does not work properly.
<b>Gateway Action</b>	ipsec_out_of_work
<b>Recommended Action</b>	Restart.
<b>Revision</b>	1

## 2.23.42. peer\_is\_dead (ID: 01800317)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Peer <peer> has been detected dead
<b>Explanation</b>	A remote peer have been detected as dead. This will cause all tunnels associated with the peer to be taken down.
<b>Gateway Action</b>	IPsec_tunnel_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	peer

## 2.23.43. failed\_to\_set\_dpdp\_cb (ID: 01800318)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to set callback for Dead Peer Detection
<b>Explanation</b>	Failed to set callback for Dead Peer Detection User will not receive log message when a peer has been detected dead and the tunnel have been killed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.44. failed\_to\_add\_key\_provider (ID: 01800321)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Failed with error: <status_msg>, when adding external key provider for certificate handling
<b>Explanation</b>	Failed to add external key provider. All certificate authentication will be disabled.
<b>Gateway Action</b>	IPsec_disabled
<b>Recommended Action</b>	Restart.
<b>Revision</b>	1

Parameters	status_msg
------------	------------

## 2.23.45. failed\_to\_add\_certificate (ID: 01800322)

Default Severity	ERROR
Log Message	Failed add certificate: <certificate>, for tunnel <tunnel>
Explanation	Failed to add certificate. Tunnel configured with this certificate for authentication will fail while negotiate.
Gateway Action	certificate_disabled
Recommended Action	None.
Revision	1
Parameters	certificate tunnel

## 2.23.46. failed\_to\_set\_remote\_ID (ID: 01800323)

Default Severity	ERROR
Log Message	Invalid type for ID in remote access idlist: <type>, for tunnel <tunnel>
Explanation	Invalid type for ID in remote access idlist have been specified in configuration.
Gateway Action	vpntunnel_disabled
Recommended Action	Reconfigure_tunnel.
Revision	1
Parameters	type tunnel

## 2.23.47. failed\_to\_create\_authorization (ID: 01800327)

Default Severity	CRITICAL
Log Message	Failed to create local authorization object
Explanation	Failed to create local authorization object. configured remote access groups will not be possible to use.
Gateway Action	IPsec_disabled
Recommended Action	None.
Revision	1

## 2.23.48. Failed\_to\_set\_xauth (ID: 01800328)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed set XAuth for tunnel <tunnel>
<b>Explanation</b>	Failed to set extended authentication (XAuth) for the tunnel.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	1
<b>Parameters</b>	tunnel

## 2.23.49. Failed\_to\_create\_xauth\_group (ID: 01800329)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Failed create XAuth group
<b>Explanation</b>	Failed to create extended authentication (XAuth) group.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.50. IPSec\_tunnel\_added (ID: 01800333)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	IPsec tunnel added to the configuration
<b>Explanation</b>	An IPsec tunnel has been enabled or added to the configuration.
<b>Gateway Action</b>	reconfiguration
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	username client_ip IPsec_tunnel

## 2.23.51. IPSec\_tunnel\_added\_bySGW (ID: 01800334)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	IPsec tunnel added by the Security Gateway
<b>Explanation</b>	An IPsec tunnel has been added by the Security Gateway.
<b>Gateway Action</b>	reconfiguration_by_SGW

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	username client_ip IPsec_tunnel

## 2.23.52. IPSec\_tunnel\_modified\_bySGW (ID: 01800335)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	IPsec tunnel changed by the Security Gateway
<b>Explanation</b>	An IPsec tunnel has been changed by the Security Gateway.
<b>Gateway Action</b>	reconfiguration_by_SGW
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	username client_ip IPsec_tunnel

## 2.23.53. IPSec\_tunnel\_modified (ID: 01800336)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	IPsec tunnel configuration modified
<b>Explanation</b>	An IPsec tunnel has been modified.
<b>Gateway Action</b>	reconfiguration
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_ip username IPsec_tunnel

## 2.23.54. IPSec\_tunnel\_removed (ID: 01800337)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	IPsec tunnel removed from the configuration
<b>Explanation</b>	An IPsec tunnel has been disabled or removed from the configuration.
<b>Gateway Action</b>	reconfiguration
<b>Recommended Action</b>	None.
<b>Revision</b>	1

<b>Parameters</b>	client_ip username IPsec_tunnel
-------------------	---------------------------------------

## 2.23.55. tunnel\_disabled (ID: 01800340)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Tunnel <tunnel> disabled due to configuration error.
<b>Explanation</b>	Tunnel [tunnel] disabled due to configuration error.
<b>Gateway Action</b>	tunnel_disabled
<b>Recommended Action</b>	Tunnel_disabled.
<b>Revision</b>	1
<b>Parameters</b>	tunnel

## 2.23.56. tunnel\_cfg\_error (ID: 01800341)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Critical configuration error on tunnel <tunnel>.
<b>Explanation</b>	Critical configuration error on tunnel [tunnel].
<b>Gateway Action</b>	restart
<b>Recommended Action</b>	Restart.
<b>Revision</b>	1
<b>Parameters</b>	tunnel

## 2.23.57. ippool\_does\_not\_exist (ID: 01800400)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IP pool does not exist: <ippool>
<b>Explanation</b>	The config mode pool refers to an IP pool that does not exist. As a result, IPsec clients using config mode will not be able lease IP addresses.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Update your config mode configuration.
<b>Revision</b>	1
<b>Parameters</b>	ippool

## 2.23.58. cfgmode\_ip\_freed (ID: 01800402)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Returned a dynamic cfg mode IP <ip> to the IP pool
<b>Explanation</b>	A dynamically allocated ip used for IKE cfg mode was returned to the IP pool.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ip

### 2.23.59. recieved\_packet\_to\_disabled\_IPsec (ID: 01800500)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	received plaintext packet disabled IPsec. Packet will be dropped
<b>Explanation</b>	Received plain text packet to IPsec while disabled.
<b>Gateway Action</b>	packet_will_be_dropped
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.60. recieved\_packet\_to\_disabled\_IPsec (ID: 01800501)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Received plain text packet to IPsec while shutting down. Packet will be dropped
<b>Explanation</b>	Received plain text packet to IPsec while shutting down.
<b>Gateway Action</b>	packet_will_be_dropped
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.61. Recieved\_plaintext\_packet\_for\_disabled\_IPsec\_interface (ID: 01800502)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IPsec tunnel <ipsec_connection> is disabled. Packet will be dropped
<b>Explanation</b>	A packed was dropped due to the IPsec interface being disabled.
<b>Gateway Action</b>	packet_will_be_dropped

---

<b>Recommended Action</b>	This is usually a consequence of low memory or a bad configuration. Look for previous log messages to find the cause for the interface being disabled.
<b>Revision</b>	1
<b>Parameters</b>	ipsec_connection

### 2.23.62. no\_remote\_gateway (ID: 01800503)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Remote gateway is null. No route is possible
<b>Explanation</b>	No remote gateway for packet, i.e no route defined.
<b>Gateway Action</b>	packet_will_be_dropped
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.63. no\_route (ID: 01800504)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to lookup route. No route for packet.
<b>Explanation</b>	No remote gateway for packet, i.e no route defined.
<b>Gateway Action</b>	packet_will_be_dropped
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.64. ping\_keepalive\_failed\_in\_tunnel (ID: 01800505)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	IPsec ping monitor detects loss if ping replies of packets INSIDE the tunnel
<b>Explanation</b>	IPsec ping monitor detects loss if ping replies of packets INSIDE the tunnel.
<b>Gateway Action</b>	tunnel_will_disabled_after_8_number_of_lost_packets
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.65. ipsec\_interface\_disabled (ID: 01800506)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	IPsec interface disabled
<b>Explanation</b>	IPsec interface disabled.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.66. maximum\_allowed\_tunnels\_limit\_reached (ID: 01800900)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Negotiation aborted due to license restrictions. Reached maximum of <allowed_tunnels> active IPsec tunnels
<b>Explanation</b>	More tunnels and/or unique peers than the license allow are trying to establish.
<b>Gateway Action</b>	negotiation_aborted
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	allowed_tunnels

## 2.23.67. SAs\_not\_killed\_for\_remote\_peer (ID: 01800901)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Failed to kill associated SA:s for <remoteppeer> peer(s)
<b>Explanation</b>	This happens if there is no tunnel established with the given peer.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	remoteppeer

## 2.23.68. trigger\_non\_ip\_packet (ID: 01802001)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Trigger for non-IP packet of protocol <proto>. Dropping request for policy
<b>Explanation</b>	Trigger for non IP packet, dropping request.

---

<b>Gateway Action</b>	dropping_request
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	proto

### 2.23.69. rule\_not\_active (ID: 01802002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The rule is not in the active configuration. Dropping request for policy
<b>Explanation</b>	The rule is not in the active configuration, dropping request.
<b>Gateway Action</b>	dropping_request
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.70. malformed\_packet (ID: 01802003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Malformed packet for trigger.Dropping request for policy
<b>Explanation</b>	Malformed packet for trigger, dropping request.
<b>Gateway Action</b>	dropping_request
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.71. max\_ipsec\_sa\_negotiations\_reached (ID: 01802004)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The maximum number of active Quick-Mode negotiations reached. Rekey not done.
<b>Explanation</b>	Maximum number of active Quick-Mode negotiations reached.
<b>Gateway Action</b>	rekey_not_done
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.72. max\_number\_of\_tunnels\_reached (ID: 01802011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Negotiation aborted due to license restrictions <maxtunnels>
<b>Explanation</b>	Reached max number of allowed active VPN tunnels according to license.
<b>Gateway Action</b>	ike_negotiation_aborted
<b>Recommended Action</b>	Reconfigure_IPsec.
<b>Revision</b>	1
<b>Parameters</b>	maxtunnels

### 2.23.73. ike\_sa\_failed (ID: 01802022)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Ike SA negotiation failed: <statusmsg> Local IKE peer: <local_peer> Remote IKE peer: <remote_peer> Initiator SPI: <initiator_spi>.
<b>Explanation</b>	Negotiation of IKE SA failed.
<b>Gateway Action</b>	no_ike_sa
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	statusmsg local_peer remote_peer initiator_spi

### 2.23.74. ike\_sa\_negotiation\_completed (ID: 01802024)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	IKE SA <options> negotiation completed: <mode> using <auth> (<encryption><keysize> - <hash>) Diffie-Hellman group <dhgroup> (<bits>) Lifetime: <lifetime> seconds
<b>Explanation</b>	Negotiation of IKE SA completed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	options mode auth encryption keysize hash dhgroup bits

lifetime

**2.23.75. ike\_sa\_negotiation\_failed (ID: 01802030)**

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	No IKE SA negotiations done. Reason: The authentication credentials were not specified or private key was not available
<b>Explanation</b>	No IKE SA negotiations done because of authentication problems.
<b>Gateway Action</b>	no_ike_sa
<b>Recommended Action</b>	None.
<b>Revision</b>	1

**2.23.76. ike\_sa\_negotiation\_failed (ID: 01802031)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Type of the local ID <localid> is not KEY-ID for the mamros-pskeyext negotiation. The negotiation might fail.
<b>Explanation</b>	Type of the local ID is not KEY-ID for the mamros-pskeyext negotiation. The negotiation might fail.
<b>Gateway Action</b>	no_ike_sa
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	localid

**2.23.77. ipsec\_sa\_negotiation\_completed (ID: 01802040)**

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	IPSec SA <sa> <info> negotiation completed:
<b>Explanation</b>	Child SA negotiatiion successfully completed.
<b>Gateway Action</b>	ipsec_sa_enabled
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	sa info local_peer remote_peer spi_in spi_out [local_ts] [remote_ts]

**2.23.78. ipsec\_sa\_informal (ID: 01802041)**

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	PFS using Diffie-Hellman group: <dhgroup> (<bits>)
<b>Explanation</b>	Information about PFS and Diffie Hellman group used for Child SA.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	dhgroup bits

**2.23.79. ipsec\_sa\_informal (ID: 01802043)**

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Inbound SPI:<spiin>   Outbound SPI:<spiout>   Algorithm:<alg> <keysize> <mac>
<b>Explanation</b>	Log information about SPI-values and algorithms for Child SA.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	spiin spiout alg keysize mac

**2.23.80. ipsec\_sa\_informal (ID: 01802044)**

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Inbound SPI:<spiin>   Outbound SPI:<spiout>   Algoritm:<mac>
<b>Explanation</b>	Log information about SPI-values and algorithms fro Child SA.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	spiin spiout mac

## 2.23.81. ipsec\_sa\_lifetime (ID: 01802045)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Local lifetime child SA: <kb> kilobytes, <sec> seconds
<b>Explanation</b>	Inform about lifetime for child SA:.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	kb sec

## 2.23.82. ipsec\_sa\_lifetime (ID: 01802046)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Local lifetime child SA: <sec> seconds
<b>Explanation</b>	Inform about lifetime for child SA:.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	sec

## 2.23.83. ipsec\_sa\_lifetime (ID: 01802047)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Local lifetime child SA: <kb> kilobytes
<b>Explanation</b>	Inform about lifetime for child SA:.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	kb

## 2.23.84. ipsec\_sa\_lifetime (ID: 01802048)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Local lifetime child SA: infinite
<b>Explanation</b>	Inform about lifetime for child SA.

<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.85. ipsec\_sa\_informal (ID: 01802058)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Local Proxy ID: <local_id>, Remote Proxy ID: <remote_id>
<b>Explanation</b>	Information about Proxy ID's for Child SA.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	local_id remote_id

## 2.23.86. ipsec\_invalid\_protocol (ID: 01802059)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Invalid protocol <proto> received for SA
<b>Explanation</b>	Invalid protocol received for SA.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	proto

## 2.23.87. ipsec\_sa\_negotiation\_aborted (ID: 01802060)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	IPsec SA Negotiation aborted: AH can not be initiated with NAT-T
<b>Explanation</b>	Negotiation aborted since AH can not be initiated with NAT-T.
<b>Gateway Action</b>	ipsec_sa_negotiation_aborted
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.88. create\_rules\_failed (ID: 01802080)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Cannot insert this rule, the forced NAT protocol type does not match rule protocol
<b>Explanation</b>	Failed to insert rule since forced NAT protocol do not match rule protocol.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_IPsec.
<b>Revision</b>	1

### 2.23.89. create\_rules\_failed (ID: 01802081)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Cannot insert this rule, the forced NAT protocol type does not match rule protocol
<b>Explanation</b>	Failed to insert rule since forced NAT protocol do not match rule protocol.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_IPsec.
<b>Revision</b>	1

### 2.23.90. no\_authentication\_method\_specified (ID: 01802100)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Neither pre-shared keys nor CA certificates nor EAP are specified for a tunnel
<b>Explanation</b>	No authentication method is specified for the tunnel.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_IPsec.
<b>Revision</b>	1

### 2.23.91. no\_key\_method\_configured\_for\_tunnel (ID: 01802102)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Tunnel does not specify any keying method (IKE or manual)
<b>Explanation</b>	No keying method (IKE/manual) is configured for tunnel.

<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_IPsec.
<b>Revision</b>	1

## 2.23.92. invalid\_configuration\_of\_force\_open (ID: 01802104)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Auto-start rule does not specify single IP address or domain name for its remote peer
<b>Explanation</b>	Can not use Auto-start rule (force open) for roaming tunnels.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_IPsec.
<b>Revision</b>	1

## 2.23.93. invalid\_rule\_setting (ID: 01802105)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Both REJECT and PASS defined for a rule
<b>Explanation</b>	Can not specify both pass and reject for a rule.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.94. invalid\_rule\_setting (ID: 01802106)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	The AUTHENTICATION-ONLY can be specified only for PASS rules
<b>Explanation</b>	Can only specify AUTHENTICATION-ONLY with PASS rules.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.95. invalid\_rule\_setting (ID: 01802107)

<b>Default Severity</b>	ERROR
-------------------------	-------

---

<b>Log Message</b>	To-tunnel specified for a REJECT rule
<b>Explanation</b>	To-tunnel can not be specified for REJECT rule.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.96. invalid\_rule\_setting (ID: 01802108)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	No from-tunnel specified for an AUTHENTICATION-ONLY rule
<b>Explanation</b>	From-tunnel must be specified for an AUTHENTICATION-ONLY rule.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.97. invalid\_rule\_setting (ID: 01802109)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	To-tunnel specified for an AUTHENTICATION-ONLY rule
<b>Explanation</b>	To-tunnel can not be specified for an AUTHENTICATION-ONLY rule.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.98. max\_number\_of\_policy\_rules\_reached (ID: 01802110)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	The maximum number of policy rules reached
<b>Explanation</b>	The maximum number of policy rules reached.
<b>Gateway Action</b>	VPN_configuration_disabled
<b>Recommended Action</b>	Review the advanced setting IPsecMaxRules.
<b>Revision</b>	2

## 2.23.99. suspicious\_outbound\_rule (ID: 01802114)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Detected suspicious outbound IPSec rule without any selectors
<b>Explanation</b>	Detected suspicious outbound IPSec rule without any selectors specified.
<b>Gateway Action</b>	the_rule_might_not_work
<b>Recommended Action</b>	Reconfigure_IPSec.
<b>Revision</b>	1

## 2.23.100. no\_algorithms\_configured\_for\_tunnel (ID: 01802200)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	ESP tunnel is missing encryption and authentication algorithms
<b>Explanation</b>	ESP tunnel [tunnel] not configured with encryption and authentication algorithms.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	1
<b>Parameters</b>	tunnel

## 2.23.101. no\_encryption\_algorithm\_configured\_for\_tunnel (ID: 01802201)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	ESP tunnel <tunnel> is missing encryption algorithm. Null encryption algorithm must be specified if no encryption is required
<b>Explanation</b>	ESP tunnel not configured with any encryption algorithm, not even Null.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	1
<b>Parameters</b>	tunnel

## 2.23.102. no\_authentication\_algorithm\_specified (ID: 01802203)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	No authentication algorithm configured for AH tunnel <tunnel>
<b>Explanation</b>	AH tunnel is configured without spetication algorithm.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	1
<b>Parameters</b>	tunnel

### 2.23.103. AH\_not\_supported (ID: 01802204)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	AH configured but not supported
<b>Explanation</b>	Tunnel [tunnel] configured for AH, but AH is not supported.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	1
<b>Parameters</b>	tunnel

### 2.23.104. invalid\_tunnel\_configuration (ID: 01802208)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	No IPSec transform (AH or ESP) specified for tunnel <tunnel>
<b>Explanation</b>	IPSec transform type must be specified for tunnel.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	1
<b>Parameters</b>	tunnel

### 2.23.105. invalid\_tunnel\_configuration (ID: 01802209)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Auto-start tunnel <tunnel> configured for `per-port' or `per-host' SA.
<b>Explanation</b>	`per-port' or `per-host' SA can not be specified for auto-start tunnels [tunnel].
<b>Gateway Action</b>	VPN_tunnel_disabled

<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	1
<b>Parameters</b>	tunnel

## 2.23.106. invalid\_tunnel\_configuration (ID: 01802210)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Both `auto-start' and `dont-initiate' specified for tunnel <tunnel>
<b>Explanation</b>	Both `auto-start' and `dont-initiate' can not be specified for a tunnel.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	1
<b>Parameters</b>	tunnel

## 2.23.107. out\_of\_memory\_for\_tunnel (ID: 01802211)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Out of memory. Could not allocate memory for tunnel name! <tunnel>
<b>Explanation</b>	Out of memory. Could not allocate memory for tunnel name!.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tunnel

## 2.23.108. invalid\_key\_size (ID: 01802214)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Invalid key sizes specified for algorithms
<b>Explanation</b>	Invalid key sizes specified for algorithms.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	2

## 2.23.109. invalid\_key\_size (ID: 01802215)

<b>Default Severity</b>	ERROR
-------------------------	-------

---

---

<b>Log Message</b>	Algorithm key sizes specified for unknown algorithm
<b>Explanation</b>	Algorithm key sizes specified for unknown algorithm.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	2

## 2.23.110. invalid\_key\_size (ID: 01802216)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Algorithm key sizes specified for unknown algorithm
<b>Explanation</b>	Algorithm key sizes specified for unknown algorithm.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	2

## 2.23.111. invalid\_key\_size (ID: 01802217)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Specified key size limits for cipher <alg> with fixed key size
<b>Explanation</b>	Configuration specifies key size limits for cipher with fixed key size.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	2
<b>Parameters</b>	alg

## 2.23.112. invalid\_cipher\_keysize (ID: 01802218)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Configured max cipher key size <keysize> is bigger than the built-in maximum <max>
<b>Explanation</b>	Tunnel configured invalid key size for cipher.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	1
<b>Parameters</b>	keysize max

## 2.23.113. invalid\_key\_size (ID: 01802219)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Tunnel specified key size limits for mac <alg> with fixed key size
<b>Explanation</b>	Configuration specifies key size limits for cipher with fixed key size.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	1
<b>Parameters</b>	alg

## 2.23.114. invalid\_cipher\_keysize (ID: 01802220)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Configured max MAC key size <keysize> is bigger than the built-in maximum <max>
<b>Explanation</b>	Tunnel configured invalid key size for MAC.
<b>Gateway Action</b>	VPN_tunnel_disabled
<b>Recommended Action</b>	Reconfigure_tunnel.
<b>Revision</b>	1
<b>Parameters</b>	keysize max

## 2.23.115. malformed\_tunnel\_id\_configured (ID: 01802225)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Malformed identity <id> configured for tunnel
<b>Explanation</b>	Malformed identity specified in configuration.
<b>Gateway Action</b>	VPN_tunnel_invalid
<b>Recommended Action</b>	Reconfigure_remote_id.
<b>Revision</b>	1
<b>Parameters</b>	id

## 2.23.116. malformed\_psk\_configured (ID: 01802229)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Malformed IKE secret (PSK) configured for tunnel

<b>Explanation</b>	Malformed IKE secret specified in configuration.
<b>Gateway Action</b>	VPN_tunnel_invalid
<b>Recommended Action</b>	Reconfigure_PSK.
<b>Revision</b>	1

### 2.23.117. rule\_selection\_failed (ID: 01802300)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Rule selection failed: <info>. Internal severity level: <int_severity>
<b>Explanation</b>	Rule selection failed!.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	info int_severity

### 2.23.118. max\_phase1\_sa\_reached (ID: 01802400)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The maximum number of active Phase-1 SAs reached
<b>Explanation</b>	Maximum number of active Phase-1 SAs reached.
<b>Gateway Action</b>	negotiation_aborted
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.119. max\_phase1\_negotiations\_reached (ID: 01802402)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The maximum number of active Phase-1 negotiations reached
<b>Explanation</b>	Maximum number of active Phase-1 negotiations reached.
<b>Gateway Action</b>	negotiation_aborted
<b>Recommended Action</b>	None.
<b>Revision</b>	2

### 2.23.120. max\_active\_quickmode\_negotiation\_reached (ID:

## 01802403)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The maximum number of active Quick-Mode negotiations reached
<b>Explanation</b>	Maximum number of active Quick-Mode negotiations reached.
<b>Gateway Action</b>	quick-mode_not_done
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.121. could\_not\_decode\_certificate (ID: 01802600)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Could not decode Certificate to pem format. The certificate may be corrupted or it was given in unrecognized format.
<b>Explanation</b>	Could_not_decode_certificate.
<b>Gateway Action</b>	certificate_invalid
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.122. could\_not\_convert\_certificate (ID: 01802601)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Could not convert CMi certificate to X.509 certificate
<b>Explanation</b>	Could not convert CMi certificate to X.509 certificate.
<b>Gateway Action</b>	certificate_invalid
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.123. could\_not\_get\_subject\_name\_from\_ca\_cert (ID: 01802602)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Could not get subject name from a CA certificate. This certificate is not usable as an IPsec authenticator, and is not inserted into local list of trusted CAs
<b>Explanation</b>	Could not get subject name from a CA certificate.
<b>Gateway Action</b>	certificate_not_trusted

**Recommended Action**     None.  
**Revision**                     1

## 2.23.124. could\_not\_set\_cert\_to\_non\_CRL\_issuer (ID: 01802603)

**Default Severity**             WARNING  
**Log Message**                 Could not set CA certificate to non-CRL issuer. This may cause authentication errors if valid CRLs are not available  
**Explanation**                 Could not set CA certificate to non-CRL issuer.  
**Gateway Action**               certificate\_not\_usable\_if\_no\_valid\_CRLs  
**Recommended Action**        None.  
**Revision**                        1

## 2.23.125. could\_not\_force\_cert\_to\_be\_trusted (ID: 01802604)

**Default Severity**             WARNING  
**Log Message**                 Could not force CA certificate as a point of trust  
**Explanation**                 Could not force CA certificate as a point of trust.  
**Gateway Action**               certificate\_disabled  
**Recommended Action**        None.  
**Revision**                        1

## 2.23.126. could\_not\_trusted\_set\_for\_cert (ID: 01802605)

**Default Severity**             WARNING  
**Log Message**                 Could not set the trusted set for a CA certificate  
**Explanation**                 Could not set the trusted set for a CA certificate.  
**Gateway Action**               certificate\_disabled  
**Recommended Action**        None.  
**Revision**                        1

## 2.23.127. could\_not\_insert\_cert\_to\_db (ID: 01802606)

**Default Severity**             ERROR

---

<b>Log Message</b>	Can not insert CA certificate into local database
<b>Explanation</b>	Can not insert CA certificate into local database.
<b>Gateway Action</b>	certificate_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.128. could\_not\_decode\_certificate (ID: 01802607)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Could not decode Certificate to pem format. The certificate may be corrupted or it was given in unrecognized format.
<b>Explanation</b>	Could_not_decode_certificate.
<b>Gateway Action</b>	certificate_invalid
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.129. could\_not\_loack\_certificate (ID: 01802608)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Could not lock certificate in cache
<b>Explanation</b>	Could not lock certificate in cache.
<b>Gateway Action</b>	certificate_invalid
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.130. could\_not\_insert\_cert\_to\_db (ID: 01802609)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Could not insert certificate into local database
<b>Explanation</b>	Could not insert certificate into local database.
<b>Gateway Action</b>	certificate_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.131. could\_not\_decode\_crl (ID: 01802610)

---

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Could not decode CRL. The certificate may be corrupted or it was given in unrecognized format. File format may be wrong
<b>Explanation</b>	Could_not_decode_CRL.
<b>Gateway Action</b>	certificate_invalid
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.132. ike\_sa\_negotiation\_completed (ID: 01802703)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	IKE SA: Local IKE peer: <local_peer> Remote IKE peer: <remote_peer> Initiator SPI: <initiator_spi> Responder SPI: <responder_spi>. Internal severity level: <int_severity>.
<b>Explanation</b>	Ike SA successfully installed.
<b>Gateway Action</b>	ike_sa_completed
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	local_peer remote_peer initiator_spi responder_spi int_severity

### 2.23.133. ike\_sa\_negotiation\_completed (ID: 01802704)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	IKE SA: Local IKE peer: <local_peer> Remote IKE peer: <remote_peer>. Internal severity level: <int_severity>
<b>Explanation</b>	Ike SA successfully installed.
<b>Gateway Action</b>	ike_sa_completed
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	local_peer remote_peer int_severity

### 2.23.134. Certificate\_contains\_bad\_IP\_address (ID: 01802705)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Certificate contains bad IP address: length=<len>
<b>Explanation</b>	Certificate contains bad IP address.
<b>Gateway Action</b>	try_next_certificate
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	len

### 2.23.135. dn\_name\_as\_subject\_alt\_name (ID: 01802706)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Directory names are not supported as subject alternative names. Skipping DN: <dn_name>
<b>Explanation</b>	Directory specified as subject alternative name.
<b>Gateway Action</b>	skip_dn_name
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	dn_name

### 2.23.136. could\_not\_decode\_certificate (ID: 01802707)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Could not decode Certificate to pem format. The certificate may be corrupted or it was given in unrecognized format.
<b>Explanation</b>	Could_not_decode_certificate.
<b>Gateway Action</b>	certificate_invalid
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.137. ike\_sa\_destroyed (ID: 01802708)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	IKE SA destroyed: <ike_sa>
<b>Explanation</b>	Ike SA is destroyed.
<b>Gateway Action</b>	ike_sa_killed

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ike_sa

## 2.23.138. cfgmode\_exchange\_event (ID: 01802709)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Event occurred for config mode <cfgmode> exchange: <msg>. Internal severity level: <int_severity>
<b>Explanation</b>	Config mode exchange event.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	cfgmode msg int_severity

## 2.23.139. remote\_access\_address (ID: 01802710)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Addresses for remote access attributes: <ipaddr> expires time <time>
<b>Explanation</b>	Addresses for remote access attributes.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipaddr [time]

## 2.23.140. remote\_access\_dns (ID: 01802711)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	DNS for remote access attributes: <dns_server>
<b>Explanation</b>	DNS for remote access attributes.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	dns_server

## 2.23.141. remote\_access\_wins (ID: 01802712)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	WINS for remote access attributes: <win>
<b>Explanation</b>	WINS for remote access attributes.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	win

## 2.23.142. remote\_access\_dhcp (ID: 01802713)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	DHCP for remote access attributes: <dhcp_s>
<b>Explanation</b>	DHCP remote access attributes.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	dhcp_s

## 2.23.143. remote\_access\_subnets (ID: 01802714)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Subnets remote access attributes: <subnets>
<b>Explanation</b>	Subnets remote access attributes.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	subnets

## 2.23.144. event\_on\_ike\_sa (ID: 01802715)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Event: <msg> occurred for IKE SA: <side>. Internal severity level: <int_severity>

<b>Explanation</b>	Event occurred at IKE SA.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	side msg int_severity

### 2.23.145. ipsec\_sa\_selection\_failed (ID: 01802717)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Selection of IPSec SA failed due to <reason>. Internal severity level: <int_severity>
<b>Explanation</b>	Failed to select a SA.
<b>Gateway Action</b>	no_ipsec_sa_selected
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason int_severity

### 2.23.146. certificate\_search\_failed (ID: 01802718)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Certificate manager search failure: <reason>. Internal severity level: <int_severity>
<b>Explanation</b>	Search for matching certificate failed.
<b>Gateway Action</b>	certificate_failure
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason int_severity

### 2.23.147. ipsec\_sa\_event (ID: 01802730)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IPSec SA negotiation event: <msg>, <local_proxy>, <remote_proxy>. Internal severity level: <int_severity>
<b>Explanation</b>	Event occurred for IPSec SA.

---

<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	msg local_proxy remote_proxy int_severity

## 2.23.148. ipsec\_sa\_event (ID: 01802731)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IPSec SA negotiation event: <msg>. Internal severity level: <int_severity>
<b>Explanation</b>	Event occurred for IPSec SA.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	msg int_severity

## 2.23.149. ipsec\_sa\_destroyed (ID: 01802732)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	IPSec SA destroyed: Inbound SPI: <spiin>   Outbound SPI: <spiout>
<b>Explanation</b>	IPSec SA have been destroyed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	spiin spiout

## 2.23.150. (ID: 01802735)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	L2TP <side> negotiation event: <msg>. <local_peer>, <remote_peer>. Internal severity level: <int_severity>
<b>Explanation</b>	L2TP negotiation event.
<b>Gateway Action</b>	l2tp_negotiation_event

---

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	side msg local_peer remote_peer int_severity

## 2.23.151. (ID: 01802736)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	L2TP <side> negotiation event: <msg>. <local_id>, <remote_id>. Internal severity level: <int_severity>
<b>Explanation</b>	L2TP negotiation event.
<b>Gateway Action</b>	l2tp_negotiation_event
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	side msg local_id remote_id int_severity

## 2.23.152. outofmem\_create\_engine (ID: 01802901)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Failed to allocate memory for engine object
<b>Explanation</b>	Could not allocate memory for engine object.
<b>Gateway Action</b>	ipsec_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.153. init\_rulelookup\_failed (ID: 01802903)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Initialization of rule lookup failed
<b>Explanation</b>	Initialization of rule lookup failed.
<b>Gateway Action</b>	ipsec_disabled
<b>Recommended Action</b>	None.

Revision 1

## 2.23.154. init\_rule\_lookup\_failed (ID: 01802904)

**Default Severity** CRITICAL  
**Log Message** Allocating default drop rule failed!  
**Explanation** Allocating default drop rule failed!.  
**Gateway Action** ipsec\_disabled  
**Recommended Action** None.  
Revision 1

## 2.23.155. init\_rule\_lookup\_failed (ID: 01802905)

**Default Severity** CRITICAL  
**Log Message** allocating default pass rule failed!  
**Explanation** Allocating default pass rule failed!.  
**Gateway Action** ipsec\_disabled  
**Recommended Action** None.  
Revision 1

## 2.23.156. init\_mutexes\_failed (ID: 01802906)

**Default Severity** CRITICAL  
**Log Message** Allocating mutexes failed  
**Explanation** Allocating mutexes failed.  
**Gateway Action** ipsec\_disabled  
**Recommended Action** None.  
Revision 1

## 2.23.157. init\_interface\_table\_failed (ID: 01802907)

**Default Severity** CRITICAL  
**Log Message** Initialization of interface table failed  
**Explanation** Initialization of interface table failed.  
**Gateway Action** ipsec\_disabled  
**Recommended Action** None.

---

Revision 1

## 2.23.158. init\_flow\_id\_table\_failed (ID: 01802908)

**Default Severity** CRITICAL  
**Log Message** Allocation of flow id hash tables failed  
**Explanation** Allocation of flow id hash tables failed.  
**Gateway Action** ipsec\_disabled  
**Recommended Action** None.  
Revision 1

## 2.23.159. init\_flow\_table\_failed (ID: 01802909)

**Default Severity** CRITICAL  
**Log Message** Allocation of flow table failed (size <size>)  
**Explanation** Allocation of flow table failed.  
**Gateway Action** ipsec\_disabled  
**Recommended Action** None.  
Revision 1  
**Parameters** size

## 2.23.160. init\_next\_hop\_table\_failed (ID: 01802910)

**Default Severity** CRITICAL  
**Log Message** Allocation of next hop table failed  
**Explanation** Allocation of next hop table failed.  
**Gateway Action** ipsec\_disabled  
**Recommended Action** None.  
Revision 1

## 2.23.161. init\_transform\_table\_failed (ID: 01802911)

**Default Severity** CRITICAL  
**Log Message** Allocation of transform table failed (size <size>)  
**Explanation** Allocation of transform table failed.  
**Gateway Action** ipsec\_disabled

---

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	size

### 2.23.162. init\_peer\_hash\_failed (ID: 01802912)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Allocation of peer hash table failed
<b>Explanation</b>	Allocation of peer hash table failed.
<b>Gateway Action</b>	ipsec_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.163. init\_peer\_id\_hash\_failed (ID: 01802913)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Allocation of peer id hash table failed
<b>Explanation</b>	Allocation of peer id hash table failed.
<b>Gateway Action</b>	ipsec_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.164. init\_rule\_table\_failed (ID: 01802914)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Allocation of rule table failed
<b>Explanation</b>	Allocation of rule table failed.
<b>Gateway Action</b>	ipsec_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.165. init\_inbound\_spi\_hash\_failed (ID: 01802915)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Allocation of inbound spi hash table failed
<b>Explanation</b>	Allocation of inbound spi hash table failed.

<b>Gateway Action</b>	ipsec_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.166. init\_transform\_context\_hash\_failed (ID: 01802916)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Allocation of transform context hash table failed
<b>Explanation</b>	Allocation of transform context hash table failed.
<b>Gateway Action</b>	ipsec_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.167. init\_packet\_context\_cache\_failed (ID: 01802917)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Allocation of packet context cache failed
<b>Explanation</b>	Allocation of packet context cache failed.
<b>Gateway Action</b>	ipsec_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.168. init\_transform\_context\_table\_failed (ID: 01802918)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Allocation of transform context table failed
<b>Explanation</b>	Allocation of transform context table failed.
<b>Gateway Action</b>	ipsec_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.169. init\_nat\_table\_failed (ID: 01802919)

<b>Default Severity</b>	CRITICAL
-------------------------	----------

---

<b>Log Message</b>	Allocation of NAT tables failed
<b>Explanation</b>	Allocation of NAT tables failed.
<b>Gateway Action</b>	ipsec_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.170. init\_frag\_table\_failed (ID: 01802920)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Allocation of fragmentation tables failed
<b>Explanation</b>	Allocation of fragmentation tables failed.
<b>Gateway Action</b>	ipsec_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.171. init\_engine\_tables\_failed (ID: 01802921)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Allocation of engine tables failed
<b>Explanation</b>	Allocation of engine tables failed.
<b>Gateway Action</b>	ipsec_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.172. init\_interceptor\_failed (ID: 01802922)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Opening the interceptor failed
<b>Explanation</b>	Opening the interceptor failed.
<b>Gateway Action</b>	ipsec_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.173. malformed\_ike\_sa\_proposal (ID: 01803000)

<b>Default Severity</b>	WARNING
-------------------------	---------

---

<b>Log Message</b>	Malformed IKE SA proposal: <reason>
<b>Explanation</b>	Received a malformed IKE SA proposal.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason

## 2.23.174. failed\_to\_select\_policy\_rule (ID: 01803001)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Could not select policy rule
<b>Explanation</b>	Could not select policy rule.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.175. failed\_to\_select\_ike\_sa (ID: 01803002)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Could not select SA from IKE SA proposal
<b>Explanation</b>	Could not select SA from IKE SA proposal.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.176. ike\_phase1\_notification (ID: 01803003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	<status> Phase-1 notification from <remote_peer> for protocol <proto>, SPI <spi>: <msg> (<type>) (<size> bytes)
<b>Explanation</b>	Received a IKE Phase-2 notification.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	status remote_peer

proto  
spi  
msg  
type  
size

## 2.23.177. ipsec\_sa\_failed (ID: 01803020)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IPsec SA negotiation failed: <statusmsg>
<b>Explanation</b>	Negotiation of IPsec SA failed.
<b>Gateway Action</b>	no_ipsec_sa
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	statusmsg

## 2.23.178. ipsec\_sa\_statistics (ID: 01803021)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	IPsec SA negotiations: <done> done, <success> successful, <failed> failed
<b>Explanation</b>	IPsec SA statistics.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	done success failed

## 2.23.179. config\_mode\_exchange\_event (ID: 01803022)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Config Mode exchange event: <msg>. <reason>.
<b>Explanation</b>	A Config Mode exchange event occurred.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	msg reason

## 2.23.180. config\_mode\_exchange\_event (ID: 01803023)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Config Mode exchange event: <msg>.
<b>Explanation</b>	A Config Mode exchange event occurred.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	msg

## 2.23.181. xauth\_exchange\_done (ID: 01803024)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	XAuth exchange done: <statusmsg>
<b>Explanation</b>	Information about the result of a completed XAuth exchange.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	statusmsg

## 2.23.182. config\_mode\_exchange\_event (ID: 01803025)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Config Mode exchange event: <msg>. <reason>.
<b>Explanation</b>	A Config Mode exchange event occurred.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	msg reason

## 2.23.183. config\_mode\_exchange\_event (ID: 01803026)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Config Mode exchange event: <msg>.

<b>Explanation</b>	A Config Mode exchange event occurred.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	msg

## 2.23.184. rejecting\_ipsec\_sa\_delete (ID: 01803027)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Rejecting IPsec SA delete notification from <remote_peer> since it was for protocol <proto>
<b>Explanation</b>	Rejected IPsec SA delete notification due to protocol mismatch.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	remote_peer proto

## 2.23.185. rejecting\_ipsec\_sa\_delete (ID: 01803028)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Rejecting IPsec SA delete notification from <remote_peer> since the SPI size <spi_size> does not match the expected value 4
<b>Explanation</b>	Rejected IPsec SA delete notification because the SPI size did not match the expected value 4.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	remote_peer spi_size

## 2.23.186. ike\_phase2\_notification (ID: 01803029)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	<status> Phase-2 notification from <remote_peer> for protocol <proto>, SPI <spi>: <msg> (<type>) (<size> bytes)
<b>Explanation</b>	Received a IKE Phase-2 notification.
<b>Gateway Action</b>	None

---

---

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	status remote_peer proto spi msg type size

## 2.23.187. ike\_qm\_notification (ID: 01803030)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Quick-Mode notification from <remote_peer> for protocol <proto>, SPI <spi>: <msg> (<type>) (<size> bytes)
<b>Explanation</b>	Received a IKE Quick-Mode notification.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	remote_peer proto spi msg type size

## 2.23.188. failed\_to\_verify\_peer\_identity (ID: 01803040)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Could not verify remote peer's identity
<b>Explanation</b>	Could not verify remote peer's identity.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.23.189. malformed\_ipsec\_sa\_proposal (ID: 01803050)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Malformed IPsec SA proposal: <reason>
<b>Explanation</b>	Received a malformed IPsec SA proposal.
<b>Gateway Action</b>	None

---

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason

## 2.23.190. malformed\_ipsec\_esp\_proposal (ID: 01803051)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Malformed IPsec ESP proposal: <reason>
<b>Explanation</b>	Received a malformed IPsec ESP proposal.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason

## 2.23.191. malformed\_ipsec\_ah\_proposal (ID: 01803052)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Malformed IPsec AH proposal: <reason>
<b>Explanation</b>	Received a malformed IPsec AH proposal.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason

## 2.23.192. failed\_to\_select\_ipsec\_proposal (ID: 01803053)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Could not select proposal for IPsec SA <sa_index>
<b>Explanation</b>	Could not select proposal for IPsec SA.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	sa_index

## 2.23.193. failed\_to\_select\_ipsec\_sa (ID: 01803054)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Could not select SA from IPsec SA proposal
<b>Explanation</b>	Could not select SA from IPsec SA proposal.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.194. ike\_responder\_mode\_not\_available (ID: 01803101)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Negotiation aborted due to license restrictions: IKE responder mode not available.
<b>Explanation</b>	A negotiation was aborted because it was not initiated by the correct side in accordance with license restrictions.
<b>Gateway Action</b>	ike_negotiation_aborted
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.23.195. audit\_event (ID: 01803200)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	An audit event occurred: <msg>. Internal severity level: <int_severity>
<b>Explanation</b>	An audit event occurred in the IPsec stack.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	msg int_severity

### 2.23.196. failed\_to\_find\_userauthobject\_for\_ipsec\_sa (ID: 01803302)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	No userauth object were found for IP <cfgmodeip> on iface <iface>. The IPsec SA will not be imported.

<b>Explanation</b>	Failed to find an userauth object when importing a IPsec SA. The IPsec SA will not be imported.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	cfgmodeip iface

## 2.24. IP\_ERROR

These log messages refer to the **IP\_ERROR (Packet discarded due to IP header error(s))** category.

### 2.24.1. too\_small\_packet (ID: 01500001)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Packet is too small to contain IPv4 header
<b>Explanation</b>	The received packet is too small to contain an IPv4 header, and will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.24.2. disallowed\_ip\_ver (ID: 01500002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Disallowed IP version <ipver>
<b>Explanation</b>	The received packet has a disallowed IP version, and will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipver
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.24.3. invalid\_ip\_length (ID: 01500003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Invalid IP header length - IPTotLen=<iptotlen>, IPHdrLen=<iphdrLen>
<b>Explanation</b>	The received packet IP header specifies an invalid length. The IP Header length can never be smaller than 20 bytes or longer than the total packet length. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.

---

<b>Revision</b>	1
<b>Parameters</b>	iptotlen iphdrln
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.24.4. invalid\_ip\_length (ID: 01500004)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Invalid IP header length, IPTotLen=<iptotlen>, RecvLen=<recvlen>
<b>Explanation</b>	The received packet IP total length is larger than the received transport data. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iptotlen recvlen
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.24.5. invalid\_ip\_checksum (ID: 01500005)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Invalid IP header checksum - RecvChkSum=<recvchksum>, CompChkSum=<compchksum>
<b>Explanation</b>	The received packet IP header checksum is invalid, dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	recvchksum compchksum
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.25. IP\_FLAG

These log messages refer to the **IP\_FLAG (Events concerning the IP header flags)** category.

### 2.25.1. ttl\_low (ID: 01600001)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received packet with too low TTL of <ttl>. Min TTL is <ttlmin>. Ignoring
<b>Explanation</b>	The received packet has a TTL (Time-To-Live) field which is too low. Ignoring and forwarding packet anyway.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ttl ttlmin
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.25.2. ip\_rsv\_flag\_set (ID: 01600002)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The IP Reserved Flag was set. Ignoring
<b>Explanation</b>	The received packet has the IP Reserved Flag set. This is ignored.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.25.3. ip\_rsv\_flag\_set (ID: 01600003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The IP Reserved Flag was set, stripping
<b>Explanation</b>	The received packet has the IP Reserved Flag set. Removing it.
<b>Gateway Action</b>	strip_flag
<b>Recommended Action</b>	None.
<b>Revision</b>	1

<b>Context Parameters</b>	Rule Name
	Packet Buffer

## 2.26. IP\_OPT

These log messages refer to the **IP\_OPT (Events concerning the IP header options)** category.

### 2.26.1. source\_route (ID: 01700001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Packet has a source route
<b>Explanation</b>	The packet has a source route. Ignoring.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.26.2. timestamp (ID: 01700002)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Packet has a timestamp IP Option
<b>Explanation</b>	The packet contains a timestamp IP Option. Ignoring.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.26.3. router\_alert (ID: 01700003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Packet has a router alert IP option
<b>Explanation</b>	The packet contains a router alert IP Option. Ignoring.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.26.4. ipopt\_present (ID: 01700004)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	IP Option <ipopt>(<optname>) is present
<b>Explanation</b>	The packet contains an IP Option. Ignoring.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipopt optname
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.26.5. ipoptlen\_too\_small (ID: 01700010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Type <ipopt> is multibyte, available <avail>. Dropping
<b>Explanation</b>	The IP Option type is multi byte which requires two bytes, and there is less than two bytes available. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipopt minoptlen avail
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.26.6. ipoptlen\_invalid (ID: 01700011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Type <ipopt> claims len=<optlen>, available=<avail>. Dropping
<b>Explanation</b>	The IP Option type does not fit in the option space. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipopt optlen

---

	avail
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.26.7. multiple\_ip\_option\_routes (ID: 01700012)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Multiple source/return routes in IP options. Dropping
<b>Explanation</b>	There are multiple source/return routes specified among the IP Options. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.26.8. bad\_length (ID: 01700013)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IP Option Type <ipopt>: Bad length <optlen> for <route> Route. Dropping
<b>Explanation</b>	An invalid length is specified for the IP Option type. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipopt optlen route
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.26.9. bad\_route\_pointer (ID: 01700014)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IP Option Type <ipopt>: Bad Source Route Pointer <routeptr>. Dropping
<b>Explanation</b>	The packet has a Source Route Pointer, which is invalid. Dropping packet.
<b>Gateway Action</b>	drop

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipopt routepr
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.26.10. source\_route\_disallowed (ID: 01700015)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Source route IP option disallowed. Dropping
<b>Explanation</b>	The packet has a source route, which is disallowed. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.26.11. multiple\_ip\_option\_timestamps (ID: 01700016)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Multiple timestamps in IP options. Dropping
<b>Explanation</b>	The packet contains mutiple timestamps in IP Options. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.26.12. bad\_timestamp\_len (ID: 01700017)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IP Option Type <ipopt>: Bad length <optlen>. Dropping
<b>Explanation</b>	The packet contains an IP Option, which has an invalid lenth. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.

---

<b>Revision</b>	1
<b>Parameters</b>	ipopt optlen
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.26.13. bad\_timestamp\_pointer (ID: 01700018)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IP Option Type <ipopt>: Bad Timestamp Pointer <tsptr>. Dropping
<b>Explanation</b>	The packet contains an invalid Timestamp Pointer. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipopt tsptr
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.26.14. bad\_timestamp\_pointer (ID: 01700019)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IP Option Type <ipopt>: Bad Timestamp Pointer <tsptr> with overflow <oflo>. Dropping
<b>Explanation</b>	The packet contains an invalid Timestamp Pointer, with Overflow. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipopt tsptr oflo
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.26.15. timestamp\_disallowed (ID: 01700020)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Timestamp IP option disallowed. Dropping

---

<b>Explanation</b>	The packet contains a timestamp IP Option, which is disallowed. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.26.16. router\_alert\_bad\_len (ID: 01700021)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IP Option Type <ipopt>: Bad length <optlen>. Dropping
<b>Explanation</b>	Packet contains a router alert IP Option, which has an invalid Length. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipopt optlen
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.26.17. router\_alert\_disallowed (ID: 01700022)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Router Alert IP Option disallowed. Dropping
<b>Explanation</b>	The packet contains a timestamp IP Option, which is disallowed. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.26.18. ipopt\_present\_disallowed (ID: 01700023)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IP Option <ipopt>(<optname>) is present. Dropping

<b>Explanation</b>	The packet contains an IP Option, which is disallowed. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipopt optname
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27. IP\_PROTO

These log messages refer to the **IP\_PROTO (IP Protocol verification events)** category.

### 2.27.1. multicast\_ethernet\_ip\_address\_mismatch (ID: 07000011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received packet with a destination IP address <ip_multicast_addr> that does not match the Ethernet multicast address <eth_multicast_addr>
<b>Explanation</b>	A packet was received with an IP multicast Ethernet address as destination address. The IP address in the IP header does however not match it. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ip_multicast_addr eth_multicast_addr
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.27.2. invalid\_ip4\_header\_length (ID: 07000012)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Invalid IP4 Header length - total length is <totlen> bytes. Dropping
<b>Explanation</b>	The packet contains an invalid IP4 Header Length. The total length is more than 64 Kb, which is not allowed. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	totlen
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.27.3. ttl\_zero (ID: 07000013)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received packet with zero TTL. Dropping
<b>Explanation</b>	A packet was received with a TTL (Time-To-Live) field set to zero,

	which is not allowed. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.27.4. ttl\_low (ID: 07000014)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received packet with too low TTL of <ttl>. Min TTL is <ttlmin>. Dropping
<b>Explanation</b>	The received packet has a TTL (Time-To-Live) field which is too low. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ttl ttlmin
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.27.5. ip\_rsv\_flag\_set (ID: 07000015)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The IP Reserved Flag was set. Dropping
<b>Explanation</b>	The received packet has the IP Reserved Flag set. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.27.6. oversize\_tcp (ID: 07000018)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Configured size limit for the TCP protocol exceeded. Dropping
<b>Explanation</b>	The configured size limit for the TCP protocol was exceeded.

---

	Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	This can be changed under the Advanced Settings section.
<b>Revision</b>	1
<b>Parameters</b>	proto
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.7. invalid\_tcp\_header (ID: 07000019)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Invalid TCP header - IPDataLen=<ipdatalen>, TCPHdrLen=<tcphdrLen>. Dropping
<b>Explanation</b>	The TCP packet contains an invalid header. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipdatalen tcphdrLen
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.8. oversize\_udp (ID: 07000021)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Configured size limit for the UDP protocol exceeded. Dropping
<b>Explanation</b>	The configured size limit for the UDP protocol was exceeded. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	This can be changed under the Advanced Settings section.
<b>Revision</b>	1
<b>Parameters</b>	proto
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.9. invalid\_udp\_header (ID: 07000022)

<b>Default Severity</b>	WARNING
-------------------------	---------

---

---

<b>Log Message</b>	Invalid UDP header - IPDataLen=<ipdatalen>, UDPTotLen=<udptotlen>. Dropping
<b>Explanation</b>	The UDP packet contains an invalid header. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipdatalen udptotlen
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.10. **oversize\_icmp (ID: 07000023)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Configured size limit for the ICMP protocol exceeded. Dropping
<b>Explanation</b>	The configured size limit for the ICMP protocol was exceeded. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	This can be changed under the Advanced Settings section.
<b>Revision</b>	1
<b>Parameters</b>	proto
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.11. **invalid\_icmp\_header (ID: 07000024)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Invalid ICMP header - IPDataLen=<ipdatalen>, ICMPMinLen=<icmpminlen>. Dropping
<b>Explanation</b>	The ICMP packet contains an invalid header. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ipdatalen icmpminlen
<b>Context Parameters</b>	Rule Name Packet Buffer

---

## 2.27.12. `multicast_ethernet_ip_address_mismatch` (ID: 07000033)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received packet with a destination IP address <ip_multicast_addr> that does not match the Ethernet multicast address <eth_multicast_addr>
<b>Explanation</b>	A packet was received with an IP multicast Ethernet address as destination address, but the IP address in the IP header does however not match it. This is a known exploit, though the gateway is currently configured to forward these packets.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ip_multicast_addr eth_multicast_addr
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.13. `oversize_gre` (ID: 07000050)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Configured size limit for the GRE protocol exceeded. Dropping
<b>Explanation</b>	The configured size limit for the GRE protocol was exceeded. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	This can be changed under the Advanced Settings section.
<b>Revision</b>	1
<b>Parameters</b>	proto
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.14. `oversize_esp` (ID: 07000051)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Configured size limit for the ESP protocol exceeded. Dropping
<b>Explanation</b>	The configured size limit for the ESP protocol was exceeded. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	This can be changed under the Advanced Settings section.

<b>Revision</b>	1
<b>Parameters</b>	proto
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.15. **oversize\_ah** (ID: 07000052)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Configured size limit for the AH protocol exceeded. Dropping
<b>Explanation</b>	The configured size limit for the AH protocol was exceeded. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	This can be changed under the Advanced Settings section.
<b>Revision</b>	1
<b>Parameters</b>	proto
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.16. **oversize\_skip** (ID: 07000053)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Configured size limit for the SKIP protocol exceeded. Dropping
<b>Explanation</b>	The configured size limit for the SKIP protocol was exceeded. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	This can be changed under the Advanced Settings section.
<b>Revision</b>	1
<b>Parameters</b>	proto
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.17. **oversize\_ospf** (ID: 07000054)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Configured size limit for the OSPF protocol exceeded. Dropping
<b>Explanation</b>	The configured size limit for the OSPF protocol was exceeded. Dropping packet.
<b>Gateway Action</b>	drop

<b>Recommended Action</b>	This can be changed under the Advanced Settings section.
<b>Revision</b>	1
<b>Parameters</b>	proto
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.18. **oversize\_ipip (ID: 07000055)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Configured size limit for the IPIP protocol exceeded. Dropping
<b>Explanation</b>	The configured size limit for the IPIP protocol was exceeded. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	This can be changed under the Advanced Settings section.
<b>Revision</b>	1
<b>Parameters</b>	proto
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.19. **oversize\_ipcomp (ID: 07000056)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Configured size limit for the IPComp protocol exceeded. Dropping
<b>Explanation</b>	The configured size limit for the IPComp protocol was exceeded. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	This can be changed under the Advanced Settings section.
<b>Revision</b>	1
<b>Parameters</b>	proto
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.20. **oversize\_l2tp (ID: 07000057)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Configured size limit for the L2TP protocol exceeded. Dropping
<b>Explanation</b>	The configured size limit for the L2TP protocol was exceeded. Dropping packet.

<b>Gateway Action</b>	drop
<b>Recommended Action</b>	This can be changed under the Advanced Settings section.
<b>Revision</b>	1
<b>Parameters</b>	proto
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.21. **oversize\_ip (ID: 07000058)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Configured size limit for IP protocol exceeded. Dropping
<b>Explanation</b>	The configured size limit for the IP protocol was exceeded. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	This can be changed under the Advanced Settings section.
<b>Revision</b>	1
<b>Parameters</b>	proto
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.22. **fragmented\_icmp (ID: 07000070)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	This ICMP type is not allowed to be fragmented. Dropping
<b>Explanation</b>	The ICMP type is not allowed to be fragmented. Only "Echo" and "EchoReply" are allowed to be fragmented. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.23. **invalid\_icmp\_data\_too\_small (ID: 07000071)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Invalid ICMP data length. ICMPDataLen=<icmpdatalen> ICMPIPHdrMinLen=<icmpiphdrminlen>. Dropping
<b>Explanation</b>	The ICMP data is not large enough to contain an IPv4 Header.

---

	Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	icmpdatalen icmpiphdrminlen
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.24. invalid\_icmp\_data\_ip\_ver (ID: 07000072)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Invalid ICMP data. ICMPDataLen=<icmpdatalen> ICMPIPVer=<icmpipver>. Dropping
<b>Explanation</b>	An invalid IP version is specified in the ICMP data. Version 4 expected. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	icmpdatalen icmpipver
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.25. invalid\_icmp\_data\_too\_small (ID: 07000073)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Invalid ICMP data length. ICMPDataLen=<icmpdatalen> ICMIPHDrLen=<icmphdrLen>. Dropping
<b>Explanation</b>	The ICMP data length is invalid. It must be large enough for the actual header, and the header must specify that it is atleast 20 bytes long. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	icmpdatalen icmphdrLen
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.26. invalid\_icmp\_data\_invalid\_ip\_length (ID: 07000074)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Invalid ICMP data length. ICMPDataLen=<icmpdatalen> ICMPIPDataLen=<icmpipdatalen> ICMPIPDataMinLen=<icmpipdataminlen>. Dropping
<b>Explanation</b>	The ICMP data length is invalid. The contained IP data must be atleast 8 bytes long. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	icmpdatalen icmpipdatalen icmpipdataminlen
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.27.27. invalid\_icmp\_data\_invalid\_paramprob (ID: 07000075)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Invalid ICMP ProbPtr. ICMPDataLen=<icmpdatalen> ICMPIPDataLen=<icmpipdatalen> ParamProbPtr=<paramprobptr>. Dropping
<b>Explanation</b>	Invalid ICMP Parameter Problem pointer. Parameter Problem pointer is not within the allowed range. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	icmpdatalen icmpipdatalen paramprobptr
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.28. L2TP

These log messages refer to the **L2TP (L2TP tunnel events)** category.

### 2.28.1. I2tpclient\_resolve\_successful (ID: 02800001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	L2TP client <iface> resolved <remotegwname> to <remotegw>
<b>Explanation</b>	The L2TP client successfully resolved the DNS name of the remote gateway.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegwname remotegw

### 2.28.2. I2tpclient\_resolve\_failed (ID: 02800002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	L2TP client <iface> failed to resolve <remotegwname>
<b>Explanation</b>	The L2TP client failed to resolve the DNS name of the remote gateway.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Make sure you have configured the DNS name of the remote gateway and the DNS servers correctly.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegwname

### 2.28.3. I2tpclient\_init (ID: 02800003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	L2TP client initialized, request sent to server on <remotegw>
<b>Explanation</b>	The L2TP client has been initialized and a request has been sent to the remote gateway.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

---

<b>Parameters</b>	iface remotegw
-------------------	-------------------

## 2.28.4. l2tp\_connection\_disallowed (ID: 02800004)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	L2TP connection disallowed according to rule <rule>! Tunnel ID: <tunnelid>, Session ID: <sessionid>
<b>Explanation</b>	The L2TP connection is disallowed according to the specified userauth rule.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Make sure the userauth rules are configured correctly.
<b>Revision</b>	1
<b>Parameters</b>	rule tunnelid sessionid

## 2.28.5. unknown\_l2tp\_auth\_source (ID: 02800005)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unknown L2TP authentication source for <rule>! Tunnel ID: <tunnelid>, Session ID: <sessionid>
<b>Explanation</b>	The authentication source for the specified userauth rule is unknown to the L2TP server.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Make sure the userauth rules are configured correctly.
<b>Revision</b>	1
<b>Parameters</b>	rule tunnelid sessionid

## 2.28.6. only\_routes\_set\_up\_by\_server\_iface\_allowed (ID: 02800006)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	L2TP server <iface> received a packet routed by a route not set up by the interface itself. Dropping packet
<b>Explanation</b>	The L2TP server received a packet that was routed to the interface by a route that was either manually configured or set up by another subsystem.
<b>Gateway Action</b>	drop

---

<b>Recommended Action</b>	Make sure no manually configured routes to the L2TP server interface exists in the configuration.
<b>Revision</b>	1
<b>Parameters</b>	iface

## 2.28.7. I2tp\_session\_closed (ID: 02800007)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Closed L2TP session. Session ID: <sessionid>, Tunnel ID: <tunnelid>
<b>Explanation</b>	The L2TP session with the specified session ID has been closed. The session was set up using the specified tunnel.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface sessionid tunnelid

## 2.28.8. I2tp\_tunnel\_closed (ID: 02800008)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Closed L2TP tunnel. Tunnel ID: <tunnelid>, Interface: <iface>.
<b>Explanation</b>	The L2TP tunnel with the specified tunnel ID has been closed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface tunnelid

## 2.28.9. session\_closed (ID: 02800009)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	MPPE failed but is required, closing session <sessionid> to <remotegw> on <iface>
<b>Explanation</b>	MPPE is required by the configuration but the MPPE negotiation failed. Session will be closed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Make sure the peer is capable of MPPE encryption, or disable the MPPE requirement.

---

<b>Revision</b>	1
<b>Parameters</b>	iface sessionid remotegw

## 2.28.10. l2tp\_session\_request (ID: 02800010)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	L2TP session request sent. Tunnel ID: <tunnelid>
<b>Explanation</b>	An L2TP session request has been sent over the specified L2TP tunnel.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tunnelid

## 2.28.11. l2tp\_session\_up (ID: 02800011)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	L2TP session up. Tunnel ID: <tunnelid>, Session ID: <sessionid>, Auth: <auth>, MPPE: <mppe>
<b>Explanation</b>	The L2TP session negotiation has completed successfully.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tunnelid sessionid auth mppe

## 2.28.12. l2tp\_no\_userauth\_rule\_found (ID: 02800014)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Did not find a matching userauth rule for this L2TP server! Tunnel ID: <tunnelid>, Session ID: <sessionid>
<b>Explanation</b>	The L2TP server was unsuccessful trying to find a matching userauth rule.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Make sure the userauth rules are configured correctly.
<b>Revision</b>	1

---

---

<b>Parameters</b>	tunnelid sessionid
-------------------	-----------------------

### 2.28.13. l2tp\_session\_request (ID: 02800015)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	L2TP session request received. Tunnel ID: <tunnelid>
<b>Explanation</b>	A new session request was received on the specified tunnel.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tunnelid

### 2.28.14. l2tp\_session\_up (ID: 02800016)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	L2TP session up. Tunnel ID: <tunnelid>, Session ID: <sessionid>, User: <user>, Auth: <auth>, MPPE: <mppe>, Assigned IP: <assigned_ip>
<b>Explanation</b>	The L2TP session negotiation has completed successfully.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tunnelid sessionid user auth mppe assigned_ip

### 2.28.15. failure\_init\_radius\_accounting (ID: 02800017)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Failed to send Accounting Start to RADIUS Accounting Server. Accounting will be disabled
<b>Explanation</b>	Failed to send START message to RADIUS accounting server. RADIUS accounting will be disabled for this session.
<b>Gateway Action</b>	accounting_disabled
<b>Recommended Action</b>	Make sure the RADIUS accounting configuration is correct.
<b>Revision</b>	1

---

## 2.28.16. l2tpclient\_tunnel\_up (ID: 02800018)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	L2TP tunnel to <remotegw> is up. Tunnel ID: <tunnelid>
<b>Explanation</b>	L2TP tunnel negotiated successfully.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tunnelid iface remotegw

## 2.28.17. malformed\_packet (ID: 02800019)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Malformed packet received from <remotegw> on tunnel <iface>. Error code: <error_code>
<b>Explanation</b>	A malformed packet was received by the L2TP interface.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegw error_code

## 2.28.18. waiting\_for\_ip\_to\_listen\_on (ID: 02800050)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	L2TP server <iface> cannot start until it has an IP address to listen on
<b>Explanation</b>	The L2TP server cannot start until the L2TP interface has a proper IP address to listen on.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Make sure that the IP address is configured correctly on the L2TP server interface, or that the DHCP server can hand out a proper IP address to the interface.
<b>Revision</b>	1
<b>Parameters</b>	iface

## 2.29. LICUPDATE

These log messages refer to the **LICUPDATE (License update)** category.

### 2.29.1. license\_update\_failure (ID: 05500001)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	License update failed, because of <reason>
<b>Explanation</b>	The unit tried to update the license, but failed. The reason for this is specified in the "reason" parameter.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason

### 2.29.2. license\_downloaded (ID: 05500002)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	New license downloaded
<b>Explanation</b>	An updated license has been downloaded, which will now be used.
<b>Gateway Action</b>	using_new_license
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.29.3. license\_already\_up\_to\_date (ID: 05500003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	License is up-to-date
<b>Explanation</b>	The current license is up-to-date, and does not need to be updated.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.30. NATPOOL

These log messages refer to the **NATPOOL (Events related to NAT Pools)** category.

### 2.30.1. uninitialized\_ippool (ID: 05600001)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	NATPool <poolname> has not been initialized
<b>Explanation</b>	The NATPool is not initialized. This can happen if the NATPool contains no valid IP addresses. If the NATPool is configured to use an IPPool, no IP addresses have been received from the IPPool.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If the NATPool is configured to use an IPPool, verify that addresses have been loaded from IPPool.
<b>Revision</b>	1
<b>Parameters</b>	poolname

### 2.30.2. removed\_translation\_address (ID: 05600002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Translation IP address <address> does no longer exist in NATPool <poolname>
<b>Explanation</b>	The translation IP has been removed by a configuration change. The connection is no longer valid and will be closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	address poolname

### 2.30.3. reconf\_state\_violation (ID: 05600003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	State violation during re-mapping to STATEFUL NATPool <poolname>.
<b>Explanation</b>	The NATPool's configuration has changed to STATEFUL. This connection's translation IP violates the stateful NATPool. Connection will remain open but will no longer be attached to this NATPool.
<b>Gateway Action</b>	decouple
<b>Recommended Action</b>	None.

<b>Revision</b>	1
<b>Parameters</b>	address poolname
<b>Context Parameters</b>	Connection

### 2.30.4. out\_of\_memory (ID: 05600005)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Out of memory while allocating NATPool state for <poolname>
<b>Explanation</b>	A state could not be allocated since the unit is out of memory.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	poolname

### 2.30.5. dhcp\_address\_expired (ID: 05600006)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	NATPool DHCP address <address> lease expired
<b>Explanation</b>	The IP Address used by this NATPool have expired and may not be used any more. The connection will be closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	address poolname
<b>Context Parameters</b>	Connection

### 2.30.6. out\_of\_memory (ID: 05600007)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Out of memory while allocating NATPool IP entry for <poolname>
<b>Explanation</b>	An IP entry could not be allocated since the unit is out of memory.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

<b>Parameters</b>	poolname
-------------------	----------

## 2.30.7. proxyarp\_failed (ID: 05600008)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Could not add dynamic ProxyARP route. NATPool <poolname>
<b>Explanation</b>	It was not possible to dynamically add a core route for the given IP address.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Try to configure a core route with ProxyARP manually.
<b>Revision</b>	1
<b>Parameters</b>	poolname ip

## 2.30.8. max\_states\_reached (ID: 05600009)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Maximum amount of states <num_states> have been reached for NATPool <poolname>. Replacing lingering state <replacedip>
<b>Explanation</b>	The maximum configured number of states for this NAT Pool have been reached. NATPool subsystem will try to replace the oldest lingering state.
<b>Gateway Action</b>	replace_lingering
<b>Recommended Action</b>	Increase the MAXSTATES variable for this NATPool if more concurrent states are wanted.
<b>Revision</b>	1
<b>Parameters</b>	poolname num_states replacedip

## 2.30.9. max\_states\_reached (ID: 05600010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Maximum amount of states <num_states> have been reached for NATPool <poolname>. Replacing active state <replacedip>
<b>Explanation</b>	The maximum configured number of states for this NAT Pool have been reached. NATPool subsystem must replace an active state since no lingering states exist.
<b>Gateway Action</b>	replace_active
<b>Recommended Action</b>	Increase the MAXSTATES variable for this NATPool if more concurrent states are wanted.

<b>Revision</b>	1
<b>Parameters</b>	poolname num_states replacedip

## 2.30.10. registerip\_failed (ID: 05600011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Request to activate already active Translation IP address <ip> in pool <poolname>
<b>Explanation</b>	Attempt to activate an already active Translation IP.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	poolname ip

## 2.30.11. registerip\_failed (ID: 05600012)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Too many Translation IP addresses requested for <poolname>
<b>Explanation</b>	To many Translation IP addresses was requested for NAT Pool. Dropping this address.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	poolname ip

## 2.30.12. dynamicip\_failed (ID: 05600013)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to fetch new Translation IP address from IP Pool <poolname>
<b>Explanation</b>	Failed to fetch new Translation IP address from IP Pool.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Check configuration for NAT Pool and IP Pool.
<b>Revision</b>	1
<b>Parameters</b>	poolname

---

## 2.30.13. synchronization\_failed (ID: 05600014)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to synchronize Translation IP address to peer
<b>Explanation</b>	Failed to synchronize Translation IP address to peer.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Check status of peer and verify High Availability configuration.
<b>Revision</b>	1

## 2.30.14. registerip\_failed (ID: 05600015)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Invalid synchronized translated connection receivedRequest to activate already active Translation IP address <ip> in pool <poolname>
<b>Explanation</b>	Attempt to activate an already active Translation IP.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	poolname ip

## 2.31. NETCON

These log messages refer to the **NETCON (Netcon (remote mgmt) events)** category.

### 2.31.1. init\_complete (ID: 02300001)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	NetCon initialization complete
<b>Explanation</b>	The NetCon initializing phase was successfully completed, and the unit can now process NetCon traffic.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

### 2.31.2. netcon\_connect\_reject\_shutdown\_running (ID: 02300002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Rejecting NetCon connect attempt from <peer_ip>:<peer_port> - shutdown running
<b>Explanation</b>	A NetCon connection attempt was rejected, as the unit is shutting down.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Try again when the unit is up and running.
<b>Revision</b>	1
<b>Parameters</b>	peer_ip peer_port

### 2.31.3. disallowed\_netcon\_ping (ID: 02300003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Disallowed NetCon ping from <peer_ip>:<peer_port>
<b>Explanation</b>	The unit received a disallowed NetCon ping from peer.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If this is a valid NetCon ping, make sure that the peer is configured to use NetCon.
<b>Revision</b>	1
<b>Parameters</b>	peer_ip peer_port

## 2.31.4. netcon\_sessionmanager\_error (ID: 02300101)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Missing context at Session Manager callback
<b>Explanation</b>	Incoming event from the Session Manager was for a nonexistent context.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	Check current contexts in NetCon and in Session Manager.
<b>Revision</b>	1

## 2.31.5. cert\_upload\_aborted (ID: 02300200)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Certificate upload from <peer_ip>:<peer_port> aborted by peer
<b>Explanation</b>	X.509 certificates were being uploaded, but the process was aborted by peer.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	peer_ip peer_port

## 2.31.6. cert\_upload\_failed (ID: 02300201)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Certificate upload from <peer_ip>:<peer_port> failed. Reason: <reason>
<b>Explanation</b>	Uploading of x.509 certificates to the unit failed. The "reason" parameter contains the reason for this.
<b>Gateway Action</b>	abort_transfer
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason peer_ip peer_port

## 2.31.7. cert\_upload\_begin (ID: 02300202)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Receiving certificates (<size> bytes) from <peer_ip>:<peer_port>
<b>Explanation</b>	Uploading of x.509 certificates to the unit is in progress.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	size peer_ip peer_port

## 2.31.8. upload\_fail\_disk\_out\_of\_space (ID: 02300250)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Out of disk space receiving <upload_file> from <peer_ip>:<peer_port>
<b>Explanation</b>	The unit ran out of disk space when a file was being uploaded. The upload process was aborted.
<b>Gateway Action</b>	abort
<b>Recommended Action</b>	Verify that the disk media is intact, and remove old unused files.
<b>Revision</b>	1
<b>Parameters</b>	upload_file peer_ip peer_port

## 2.31.9. upload\_fail\_disk\_cannot\_remove (ID: 02300251)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Out of disk space receiving <upload_file> from <peer_ip>:<peer_port>, and failed to remove old file <old_file> because of <reason>.
<b>Explanation</b>	The unit ran out of disk space when a new version of an already existing file was being uploaded. The previous version of the file was not successfully removed. The upload process was aborted.
<b>Gateway Action</b>	abort
<b>Recommended Action</b>	Verify that the disk media is intact.
<b>Revision</b>	1
<b>Parameters</b>	upload_file old_file reason peer_ip peer_port

## 2.31.10. disk\_out\_of\_space (ID: 02300252)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Out of disk space receiving <upload_file> from <peer_ip>:<peer_port>. Removed <old_file> to free up more space
<b>Explanation</b>	The unit ran out of disk space when a new version of an already existing file was being uploaded. The previous version of the file was successfully removed in order to free space, and the uploading process is resumed.
<b>Gateway Action</b>	removed_old_file
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	upload_file old_file peer_ip peer_port

## 2.31.11. disk\_write\_error (ID: 02300300)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Write error while receiving <upload_file> from <peer_ip>:<peer_port>, because of <reason>
<b>Explanation</b>	There was an error when writing an uploaded file to the disk media. The "reason" parameter contains the reason for this.
<b>Gateway Action</b>	upload_fail
<b>Recommended Action</b>	Verify that the disk media is intact.
<b>Revision</b>	1
<b>Parameters</b>	upload_file reason peer_ip peer_port

## 2.31.12. upload\_complete (ID: 02300350)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Received <upload_file> from <peer_ip>:<peer_port>, <filesize> bytes total
<b>Explanation</b>	The unit successfully received an uploaded file.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.

<b>Revision</b>	1
<b>Parameters</b>	upload_file filesize peer_ip peer_port

## 2.31.13. concurrent\_processing\_limit\_reached (ID: 02300400)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	File event <event> from <peer_ip>:<peer_port> for <file> failed. Too many NetCon peers are processing files simultaneously
<b>Explanation</b>	The file event failed, as too many NetCon peers are processing files simultaneously.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Try again later, when less NetCon peers are processing files.
<b>Revision</b>	1
<b>Parameters</b>	event file peer_ip peer_port

## 2.31.14. netcon\_init\_fail\_listen\_socket\_fail (ID: 02300500)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Internal Error: Could not create listening socket for NetCon
<b>Explanation</b>	The NetCon initializing phase failed, as the unit failed to set up a listening socket for NetCon traffic. A possible reason for this is that the unit ran out of memory.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the unit has enough RAM memory available.
<b>Revision</b>	1

## 2.31.15. netcon\_init\_fail\_security\_file\_corrupt (ID: 02300501)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	NetCon security file corrupt. NetCon disabled
<b>Explanation</b>	The NetCon security file was corrupt. NetCon has been disabled, and no NetCon traffic can be processed.

<b>Gateway Action</b>	netcon_disable
<b>Recommended Action</b>	Verify that the NetCon security file exists, and is valid. Also try to revert the unit to using the default NetCon keys.
<b>Revision</b>	1

## 2.31.16. **disallowed\_netcon\_connect (ID: 02300502)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Disallowed NetCon connect attempt from <peer_ip>:<peer_port>. Dropping
<b>Explanation</b>	A NetCon connection attempt was disallowed, and the connection was dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If this is a valid NetCon connection attempt, make sure that the peer is configured to use NetCon.
<b>Revision</b>	1
<b>Parameters</b>	peer_ip peer_port

## 2.31.17. **netcon\_connect (ID: 02300503)**

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	New NetCon connection from <peer_ip>:<peer_port>
<b>Explanation</b>	A NetCon connection was successfully established.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	peer_ip peer_port

## 2.31.18. **netcon\_disconnect (ID: 02300504)**

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Disconnecting NetCon peer <peer_ip>:<peer_port>
<b>Explanation</b>	A NetCon connection was disconnected.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

<b>Parameters</b>	peer_ip peer_port
-------------------	----------------------

## 2.31.19. disk\_cannot\_write (ID: 02300505)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to save new keys <file>. Reverting to old keys
<b>Explanation</b>	The unit failed to save the new NetCon security keys, and reverted into using the old keys.
<b>Gateway Action</b>	reverting_to_old_keys
<b>Recommended Action</b>	Verify that the disk media is intact.
<b>Revision</b>	1
<b>Parameters</b>	file

## 2.31.20. keychange\_successful (ID: 02300506)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	New keys have been stored in <file>
<b>Explanation</b>	The new NetCon security keys was successfully stored, and is now used for NetCon traffic.
<b>Gateway Action</b>	using_new_keys
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	file

## 2.31.21. keychange\_fail (ID: 02300507)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to establish bi-directional confirmation with peer of new keys. Reverting to old keys
<b>Explanation</b>	The unit failed to establish a connection back to peer, using the new NetCon security keys. It will try to revert to the previous NetCon security keys.
<b>Gateway Action</b>	reverting_to_old_keys
<b>Recommended Action</b>	Verify that the new NetCon keys are valid, and that both peers are using the same keys.
<b>Revision</b>	1

## 2.31.22. disk\_cannot\_read\_old\_keys (ID: 02300508)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to read old keys from <file>
<b>Explanation</b>	The unit failed to read the old NetCon security keys from the security file.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the NetCon security file exists, and that it is valid. Try uploading a new Netcon secutiyy file.
<b>Revision</b>	1
<b>Parameters</b>	file

## 2.31.23. download\_fail (ID: 02300509)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	File download requested by peer <peer_ip>:<peer_port> failed
<b>Explanation</b>	A peer requested to download a file from the unit, but the process failed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the disk media is intact, and that the file exists.
<b>Revision</b>	1
<b>Parameters</b>	peer_ip peer_port

## 2.31.24. concurrent\_netcon\_processing (ID: 02300510)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	File event <event> request from peer <peer_ip>:<peer_port> failed. The file <file> is currently being <current_event> by another NetCon peer.
<b>Explanation</b>	The file event, upload or download, failed, as another NetCon peer is currently carrying out the same event on the same file.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Try again later, when no other NetCon peer is uploading/downloading the file.
<b>Revision</b>	1
<b>Parameters</b>	event file current_event peer_ip

---

peer\_port

## 2.31.25. disk\_cannot\_write (ID: 02300511)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to open <file> for writing. Upload request from peer <peer_ip>:<peer_port> failed.
<b>Explanation</b>	The unit failed to open the file for write access, and as a result, the upload request failed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the disk media is intact, and that this file is not write protected.
<b>Revision</b>	1
<b>Parameters</b>	file peer_ip peer_port

## 2.31.26. upload\_begin (ID: 02300512)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Receiving <file> from peer <peer_ip>:<peer_port>.
<b>Explanation</b>	The upload phase has begun, and the unit is currently receiving the file from peer, using chunked encoding.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	file peer_ip peer_port

## 2.31.27. upload\_begin (ID: 02300513)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Receiving <file> (<filesize> bytes) from peer <peer_ip>:<peer_port>.
<b>Explanation</b>	The upload phase has begun, and the unit is currently receiving the file, with the specified filesize, from peer.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

---

<b>Parameters</b>	file filesize peer_ip peer_port
-------------------	--

## 2.31.28. disk\_cannot\_read\_download\_fail (ID: 02300514)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to open <file> for reading. Download request from peer <peer_ip>:<peer_port> failed.
<b>Explanation</b>	The unit failed to open the file for read access, and as a result, the download request failed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the disk media is intact, and that this file is exists on the media.
<b>Revision</b>	1
<b>Parameters</b>	file peer_ip peer_port

## 2.31.29. download\_begin (ID: 02300515)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Sending <file> to peer <peer_ip>:<peer_port>.
<b>Explanation</b>	The download phase has begun, and the unit is currently sending the file to peer.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	file peer_ip peer_port

## 2.31.30. upload\_abort (ID: 02300516)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Upload from peer <peer_ip>:<peer_port> aborted by peer
<b>Explanation</b>	The upload process was aborted by peer. A partialy received file will be deleted.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.

---

<b>Revision</b>	1
<b>Parameters</b>	peer_ip peer_port

## 2.31.31. upload\_fail (ID: 02300517)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Upload of <file> peer <peer_ip>:<peer_port> failed because of <reason>
<b>Explanation</b>	The upload process failed. The "reason" parameter contains the reason for this.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	file reason peer_ip peer_port

## 2.31.32. download\_complete (ID: 02300518)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Sent <file> to peer <peer_ip>:<peer_port>, total <filesize> bytes
<b>Explanation</b>	The download phase was completed, and unit successfully sent the file to peer.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	file filesize peer_ip peer_port

## 2.32. OSPF

These log messages refer to the OSPF (OSPF events) category.

### 2.32.1. internal\_error (ID: 02400001)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Internal Error. Iface <iface> got IEvent <ievent> in IState <istate>. Ignored
<b>Explanation</b>	Internal error in the OSPF interface state engine.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	Contact support.
<b>Revision</b>	1
<b>Parameters</b>	iface ievent istate
<b>Context Parameters</b>	Rule Name

### 2.32.2. internal\_error (ID: 02400002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Internal Error. Iface <iface> got NEvent <nevent> in NState <nstate>. Ignored
<b>Explanation</b>	Internal error in the OSPF interface neighbor state engine.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	Contact support.
<b>Revision</b>	1
<b>Parameters</b>	iface nevent nstate
<b>Context Parameters</b>	Rule Name

### 2.32.3. unable\_to\_map\_ptp\_neighbor (ID: 02400003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unable to map PTP neighbor <neighborid> to my ip <myifaceip> at HA failover
<b>Explanation</b>	Unable to map a configured PTP neighbor to the local IP at HA failover.
<b>Gateway Action</b>	None

<b>Recommended Action</b>	Check OSPF interface configuration.
<b>Revision</b>	1
<b>Parameters</b>	iface neighborid myifaceip
<b>Context Parameters</b>	Rule Name

### 2.32.4. bad\_packet\_len (ID: 02400004)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received OSPF packet with bad length
<b>Explanation</b>	Received OSPF packet with a bad length.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check the configuration on the neighboring router.
<b>Revision</b>	1
<b>Parameters</b>	ospflen iplen type
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.32.5. bad\_ospf\_version (ID: 02400005)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Packet OSPF version is not 2
<b>Explanation</b>	Received OSPF packet with other version than 2.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Make sure that all routers are using version 2.
<b>Revision</b>	1
<b>Parameters</b>	ver
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.32.6. sender\_not\_in\_iface\_range (ID: 02400006)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Sender source <srcip> not within interface range (<ifacorange>)
<b>Explanation</b>	Received OSPF data from a neighboring router not within the receive

---

	interface range.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Make sure all locally attached OSPF routes are on the same network.
<b>Revision</b>	1
<b>Parameters</b>	srcip ifacorange
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.32.7. area\_mismatch (ID: 02400007)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Bad area <area>
<b>Explanation</b>	Received OSPF data from a neighboring router not within the same area as the receive interface.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Make sure all locally attached OSPF routers are in the same area as the attaching interfaces.
<b>Revision</b>	1
<b>Parameters</b>	area
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.32.8. hello\_netmask\_mismatch (ID: 02400008)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Hello netmask mismatch. Received was <recv_netmask>, mine is <my_netmask>. Dropping
<b>Explanation</b>	Received OSPF data from a neighboring router with different network netmask then the receive interface.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Make sure all locally attached OSPF routers have the same netmask as the attaching interfaces.
<b>Revision</b>	1
<b>Parameters</b>	recv_netmask my_netmask
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.32.9. hello\_interval\_mismatch (ID: 02400009)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Hello interval mismatch. Received was <recv_interval>, mine is <my_interval>. Dropping
<b>Explanation</b>	Received OSPF data from a neighboring router with a mismatching hello interval.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Make sure all locally attached OSPF routers share the same hello interval.
<b>Revision</b>	1
<b>Parameters</b>	recv_interval my_interval
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.32.10. hello\_rtr\_dead\_mismatch (ID: 02400010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Hello router dead interval mismatch. Received was <recv_rtrdead>, mine is <my_rtrdead>. Dropping
<b>Explanation</b>	Received OSPF data from a neighboring router with a mismatching router dead interval.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Make sure all locally attached OSPF routers share the same router dead interval.
<b>Revision</b>	1
<b>Parameters</b>	recv_rtrdead my_rtrdead
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.32.11. hello\_e\_flag\_mismatch (ID: 02400011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Hello E-flag mismatch. Received was <recv_e_flag>, mine is <my_e_flag>. Dropping
<b>Explanation</b>	Received OSPF data from a neighboring router with mismatching E-flag (describes how AS-external-LSAs are flooded) configuration.
<b>Gateway Action</b>	drop

---

<b>Recommended Action</b>	Make sure all locally attached OSPF routers share the same E-flag configuration.
<b>Revision</b>	1
<b>Parameters</b>	recv_e_flag my_e_flag
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.32.12. hello\_n\_flag\_mismatch (ID: 02400012)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Hello N-flag mismatch. Received was <recv_n_flag>, mine is <my_n_flag>. Dropping
<b>Explanation</b>	Received OSPF data from a neighboring router with mismatching N-flag (NSSA details) configuration.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Make sure all locally attached OSPF routers share the same N-flag configuration.
<b>Revision</b>	1
<b>Parameters</b>	recv_n_flag my_n_flag
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.32.13. both\_np\_and\_e\_flag\_set (ID: 02400013)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Hello N-flag and E-flag set. This is a illegal combination. Dropping
<b>Explanation</b>	Received OSPF data from a neighboring router which illegally have both the N and E-flag set.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check the configuration on the neighboring router.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.32.14. unknown\_lsa\_type (ID: 02400014)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unknown LSA type <lsatype>. Dropping

---

---

<b>Explanation</b>	Received OSPF data from a neighbor which contained a unknown LSA.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check the configuration on the neighboring router.
<b>Revision</b>	1
<b>Parameters</b>	lsatype
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.32.15. auth\_mismatch (ID: 02400050)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Authentication mismatch. Received was <recv_auth>, mine is <my_auth>
<b>Explanation</b>	Authentication mismatch with neighboring OSPF router.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Verify that the neighboring OSPF router share the same authentication.
<b>Revision</b>	1
<b>Parameters</b>	recv_auth my_auth
<b>Context Parameters</b>	Rule Name

### 2.32.16. bad\_auth\_password (ID: 02400051)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Authentication mismatch. Bad password
<b>Explanation</b>	Authentication failed due to a bad password.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Verify that the neighboring OSPF router share the same password.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

### 2.32.17. bad\_auth\_crypto\_key\_id (ID: 02400052)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Authentication mismatch. Bad crypto key id. Received was <recv_id>, mine is <my_id>

<b>Explanation</b>	Authentication failed due to a bad crypto key id.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Verify that the neighboring OSPF router share the same crypto key id.
<b>Revision</b>	1
<b>Parameters</b>	recv_id my_id
<b>Context Parameters</b>	Rule Name

## 2.32.18. bad\_auth\_crypto\_seq\_number (ID: 02400053)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Authentication mismatch. Bad crypto sequence number. Received was <recv_seq>, expected atleast <my_seq>
<b>Explanation</b>	Authentication failed due to mismatching crypto sequence number.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	recv_seq my_seq
<b>Context Parameters</b>	Rule Name

## 2.32.19. bad\_auth\_crypto\_digest (ID: 02400054)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Authentication mismatch. Bad crypto digest
<b>Explanation</b>	Authentication failed due to bad crypto digest.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Verify that the neighboring OSPF router share the same crypto digest.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

## 2.32.20. checksum\_mismatch (ID: 02400055)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Checksum mismatch. Received was <recv_chksum>, mine is <my_chksum>
<b>Explanation</b>	Received OSPF data from neighbor with mismatching checksum.

<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Check network equipment for problems.
<b>Revision</b>	1
<b>Parameters</b>	recv_chksum my_chksum
<b>Context Parameters</b>	Rule Name

## 2.32.21. dd\_mtu\_exceeds\_interface\_mtu (ID: 02400100)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Neighbor <neighbor> MTU is too high. Received DD has MTU <dd_mtu>. Interface MTU is <iface_mtu>
<b>Explanation</b>	Received database description from neighbor with too high MTU.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Lower the MTU on the neighboring OSPF router.
<b>Revision</b>	1
<b>Parameters</b>	neighbor dd_mtu iface_mtu
<b>Context Parameters</b>	Rule Name

## 2.32.22. m\_ms\_mismatch (ID: 02400101)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Neighbor <neighbor> M/MS mismatch. Restarting exchange
<b>Explanation</b>	Received indication that a neighbor got the M/MS (master/slave) role wrong.
<b>Gateway Action</b>	restart
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	neighbor
<b>Context Parameters</b>	Rule Name

## 2.32.23. i\_flag\_misuse (ID: 02400102)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Neighbor <neighbor> misused the I-flag. Restarting exchange

---

<b>Explanation</b>	Neighbor misused the I-flag.
<b>Gateway Action</b>	restart
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	neighbor
<b>Context Parameters</b>	Rule Name

### 2.32.24. opt\_change (ID: 02400103)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Neighbor <neighbor> changed options during exchange. Restarting exchange
<b>Explanation</b>	Neighbor illegally changed options during the exchange phase.
<b>Gateway Action</b>	restart
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	neighbor
<b>Context Parameters</b>	Rule Name

### 2.32.25. bad\_seq\_num (ID: 02400104)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Neighbor <neighbor> replied with a unexpected sequence number. Restarting exchange
<b>Explanation</b>	Received neighbor reply with a unexpected sequence number.
<b>Gateway Action</b>	restart
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	neighbor
<b>Context Parameters</b>	Rule Name

### 2.32.26. non\_dup\_dd (ID: 02400105)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Neighbor <neighbor> sent a non dup DD from a higher state then exchange. Restarting exchange

---

<b>Explanation</b>	Received a non dup database descriptor from a neighbor in a higher state then exchange.
<b>Gateway Action</b>	restart
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	neighbor
<b>Context Parameters</b>	Rule Name

### 2.32.27. as\_ext\_on\_stub (ID: 02400106)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Neighbor <neighbor> implied AS-EXT on a stub area. Restarting exchange
<b>Explanation</b>	A neighbor illegally implied AS-EXT on a stub area.
<b>Gateway Action</b>	restart
<b>Recommended Action</b>	Check neighboring OSPF router configuration.
<b>Revision</b>	1
<b>Parameters</b>	neighbor
<b>Context Parameters</b>	Rule Name

### 2.32.28. unknown\_lsa (ID: 02400107)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Neighbor <neighbor> implied unknown LSA (<lsa_type>). Restarting exchange
<b>Explanation</b>	A neighbor described an unknown LSA type.
<b>Gateway Action</b>	restart
<b>Recommended Action</b>	Check neighboring OSPF router configuration.
<b>Revision</b>	1
<b>Parameters</b>	neighbor lsa_type
<b>Context Parameters</b>	Rule Name

### 2.32.29. bad\_lsa\_sequence\_number (ID: 02400108)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Got LSA with bad sequence number <seqnum>. Restarting exchange

<b>Explanation</b>	Received a LSA with a bad sequence number.
<b>Gateway Action</b>	restart
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	seqnum
<b>Context Parameters</b>	Rule Name

### 2.32.30. bad\_lsa\_maxage (ID: 02400109)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Got LSA with bad maxage (<maxage> > <def_maxage>). Restarting exchange
<b>Explanation</b>	Received a LSA with a bad maxage value.
<b>Gateway Action</b>	restart
<b>Recommended Action</b>	Check orginating router configuration.
<b>Revision</b>	1
<b>Parameters</b>	maxage def_maxage
<b>Context Parameters</b>	Rule Name

### 2.32.31. lsa\_checksum\_mismatch (ID: 02400150)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	LSA checksum mismatch. LSA is discarded
<b>Explanation</b>	Received LSA with mismatching checksum.
<b>Gateway Action</b>	discard
<b>Recommended Action</b>	Check network equipment for problems.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

### 2.32.32. unknown\_lsa\_type (ID: 02400151)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unknown LSA type (<lsa_type>). LSA is discarded
<b>Explanation</b>	Received LSA of unknown type.
<b>Gateway Action</b>	discard

<b>Recommended Action</b>	Check originating router configuration.
<b>Revision</b>	1
<b>Parameters</b>	lsa_type
<b>Context Parameters</b>	Rule Name

### 2.32.33. bad\_isa\_sequencenumber (ID: 02400152)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Bad LSA sequence number (<seqnum>). LSA is discarded
<b>Explanation</b>	Received LSA with a bad sequence number.
<b>Gateway Action</b>	discard
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	seqnum
<b>Context Parameters</b>	Rule Name

### 2.32.34. bad\_isa\_maxage (ID: 02400153)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Bad LSA maxage (<maxage>). LSA is discarded
<b>Explanation</b>	Received LSA with a bad max age.
<b>Gateway Action</b>	discard
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	maxage
<b>Context Parameters</b>	Rule Name

### 2.32.35. received\_as\_ext\_on\_stub (ID: 02400154)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received AS-EXT LSA on stub. LSA is discarded
<b>Explanation</b>	Received AS external LSA which is illegal on a stub area.
<b>Gateway Action</b>	discard
<b>Recommended Action</b>	None.
<b>Revision</b>	1

Context Parameters      Rule Name

## 2.32.36. received\_selforg\_for\_unknown\_lsa\_type (ID: 02400155)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received selforginated LSA for unknown LSA <lsatype> type? Flushing
<b>Explanation</b>	Received selforginated LSA of unknown type.
<b>Gateway Action</b>	flush
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	lsatype
<b>Context Parameters</b>	Rule Name

## 2.32.37. db\_copy\_more\_recent\_than\_received (ID: 02400156)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received LSA(LSA-<lsa> ID:<lsaid> AdvRtr:<lsartr>) is older then DB copy. Discarding received LSA
<b>Explanation</b>	Received LSA which is older then the copy in the database.
<b>Gateway Action</b>	discard
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	lsa lsaid lsartr
<b>Context Parameters</b>	Rule Name

## 2.32.38. got\_ack\_mismatched\_lsa (ID: 02400157)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Got ACK for mismatched LSA (LSA-<lsa> ID:<lsaid> AdvRtr:<lsartr>). ACK ingored
<b>Explanation</b>	Received acknowledge for mismatched LSA.
<b>Gateway Action</b>	None

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	lsa lsaid lsartr
<b>Context Parameters</b>	Rule Name

### 2.32.39. upd\_packet\_lsa\_size\_mismatch (ID: 02400158)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	UPD packet LSA size mismatch. Parsing aborted
<b>Explanation</b>	Received OSPF UPD packet with a mismatching LSA size.
<b>Gateway Action</b>	abort
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.32.40. req\_packet\_lsa\_size\_mismatch (ID: 02400159)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	REQ packet LSA size mismatch. Parsing aborted
<b>Explanation</b>	Received OSPF REQ packet with a mismatching LSA size.
<b>Gateway Action</b>	abort
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.32.41. ack\_packet\_lsa\_size\_mismatch (ID: 02400160)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	ACK packet LSA size mismatch. Parsing aborted
<b>Explanation</b>	Received OSPF ACK packet with a mismatching LSA size.
<b>Gateway Action</b>	abort
<b>Recommended Action</b>	None.
<b>Revision</b>	1

Context Parameters	Rule Name Packet Buffer
--------------------	----------------------------

## 2.32.42. failed\_to\_create\_replacement\_Isa (ID: 02400161)

Default Severity	CRITICAL
Log Message	Failed to prepare replacement LSA (LSA- <lsa> ID:<lsaid> AdvRtr:<lsartr>)
Explanation	Failed to create LSA.
Gateway Action	alert
Recommended Action	Check memory consumption.
Revision	1
Parameters	lsa lsaid lsartr
Context Parameters	Rule Name

## 2.32.43. unable\_to\_send\_ack (ID: 02400162)

Default Severity	CRITICAL
Log Message	Unable to send ACK
Explanation	Unable to send acknowledgement.
Gateway Action	alert
Recommended Action	Check memory consumption.
Revision	1
Context Parameters	Rule Name

## 2.32.44. unknown\_neighbor (ID: 02400200)

Default Severity	WARNING
Log Message	Unknown neighbor(IP:<neighbor> ID:<neighborid>) seen on <iface>. Ignoring
Explanation	Unknown neighbor seen on PTP based interface.
Gateway Action	None
Recommended Action	Check for incorrectly configured neighbors.
Revision	1
Parameters	neighbor neighborid

---

	iface
<b>Context Parameters</b>	Rule Name

## 2.32.45. too\_many\_neighbors (ID: 02400201)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Too many neighbors on <iface>. Unable to maintain 2-way with all of them(hello packet)
<b>Explanation</b>	There are too many OSPF routers on a directly connected network.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Reduce the number of OSPF routers on the network.
<b>Revision</b>	1
<b>Parameters</b>	iface
<b>Context Parameters</b>	Rule Name

## 2.32.46. neighbor\_died (ID: 02400202)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Neighbor <neighbor> on <neighboriface> died
<b>Explanation</b>	Lost connectivity with neighbor router.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Check neighbor status and connectivity.
<b>Revision</b>	1
<b>Parameters</b>	neighbor neighboriface
<b>Context Parameters</b>	Rule Name

## 2.32.47. unable\_to\_find\_transport\_area (ID: 02400300)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unable to find transport area <area> for VLINK <vlink> when building router LSA. Iface skipped
<b>Explanation</b>	Unable to find transport area for a vlink.
<b>Gateway Action</b>	skip_iface
<b>Recommended Action</b>	Check OSPF area configuration.
<b>Revision</b>	1

<b>Parameters</b>	area vlink
<b>Context Parameters</b>	Rule Name

## 2.32.48. internal\_error\_unable\_to\_map\_identifier (ID: 02400301)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Internal error: Unable to map a identifier for LSA Type:<lsatype> ID:<lsaid> AdvRouter:<lsaadvtr>
<b>Explanation</b>	Unable to map an identifier for a LSA.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	lsatype lsaid lsaadvtr
<b>Context Parameters</b>	Rule Name

## 2.32.49. lsa\_size\_too\_big (ID: 02400302)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Requested LSA size(<lsasize>) too big. Unable to create LSA
<b>Explanation</b>	Unable to create LSA since the size is too big.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	lsasize
<b>Context Parameters</b>	Rule Name

## 2.32.50. memory\_usage\_exceeded\_70\_percent\_of\_max\_allowed (ID: 02400303)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Memory usage for OSPF process <ospfproc> have now exceeded 70 percent of the maximum allowed
<b>Explanation</b>	The memory usage for a OSPF process have exceeded 70 percent of the maximum allowed.

<b>Gateway Action</b>	None
<b>Recommended Action</b>	Check memory consumption.
<b>Revision</b>	1
<b>Parameters</b>	ospfproc
<b>Context Parameters</b>	Rule Name

### 2.32.51. memory\_usage\_exceeded\_90\_percent\_of\_max\_allowed (ID: 02400304)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Memory usage for OSPF process <ospfproc> have now exceeded 90 percent of the maximum allowed
<b>Explanation</b>	The memory usage for a OSPF process have exceeded 70 percent of the maximum allowed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Check memory consumption.
<b>Revision</b>	1
<b>Parameters</b>	ospfproc
<b>Context Parameters</b>	Rule Name

### 2.32.52. as\_disabled\_due\_to\_mem\_alloc\_fail (ID: 02400305)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	AS disabled due to memory allocation failure
<b>Explanation</b>	An OSPF AS have been disabled due to memory allocation failure.
<b>Gateway Action</b>	alert
<b>Recommended Action</b>	Check memory consumption.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

### 2.32.53. internal\_lsa\_chksum\_error (ID: 02400306)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	LSA internal checksum error
<b>Explanation</b>	Internal LSA checksum error.
<b>Gateway Action</b>	alert

<b>Recommended Action</b>	Check hardware for defects.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

## 2.32.54. unable\_to\_find\_iface\_to\_stub\_net (ID: 02400400)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Internal error: Unable to find my interface attached to stub network <stub>
<b>Explanation</b>	Unable to find local interface attached to stub network.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Contact support with a scenario description.
<b>Revision</b>	1
<b>Parameters</b>	stub
<b>Context Parameters</b>	Rule Name

## 2.32.55. internal\_error\_unable\_to\_find\_lnk\_connecting\_to\_lsa (ID: 02400401)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Internal error: Unable to find my link connecting to described LSA (NetVtxId: <netvtxid>)
<b>Explanation</b>	Unable to find local link to described LSA.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Contact support with a scenario description.
<b>Revision</b>	1
<b>Parameters</b>	netvtxid
<b>Context Parameters</b>	Rule Name

## 2.32.56. internal\_error\_unable\_to\_find\_iface\_connecting\_to\_lsa (ID: 02400402)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Internal error: Unable to find my interface connecting to described LSA (NetVtxId: <netvtxid>)
<b>Explanation</b>	Unable to find local interface connecting to described LSA.
<b>Gateway Action</b>	None

<b>Recommended Action</b>	Contact support with a scenario description.
<b>Revision</b>	1
<b>Parameters</b>	netvtxid
<b>Context Parameters</b>	Rule Name

## 2.32.57. internal\_error\_unable\_to\_find\_lnk\_connecting\_to\_lsa (ID: 02400403)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Internal error: Unable to find my link connecting to described LSA (RtrVtxId: <rtrvtxid>)
<b>Explanation</b>	Unable to find local link connecting to described LSA.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Contact support with a scenario description.
<b>Revision</b>	1
<b>Parameters</b>	rtrvtxid
<b>Context Parameters</b>	Rule Name

## 2.32.58. internal\_error\_unable\_to\_find\_iface\_connecting\_to\_lsa (ID: 02400404)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Internal error: Unable to find my interface connecting to described LSA (RtrVtxId: <rtrvtxid>)
<b>Explanation</b>	Unable to find local interface connecting to described LSA.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Contact support with a scenario description.
<b>Revision</b>	1
<b>Parameters</b>	rtrvtxid
<b>Context Parameters</b>	Rule Name

## 2.32.59. internal\_error\_unable\_neighbor\_iface\_attached\_back\_to\_me (ID: 02400405)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Internal error: Unable to find neighbor (RtrVtxId: <rtrvtxid>) interface attached back to me

<b>Explanation</b>	Unable to find neighbor interface attached back.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Contact support with a scenario description.
<b>Revision</b>	1
<b>Parameters</b>	rtrvtxid
<b>Context Parameters</b>	Rule Name

### 2.32.60. bad\_iface\_type\_mapping\_rtr\_to\_rtr\_link (ID: 02400406)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Internal error: Bad interface type (<ifacetype>) when mapping rtr-to-rtr (RtrVtxId:<rtrvtxid>)
<b>Explanation</b>	Bad interface type found when doing router-to-router mapping.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Check OSPF interface configuration.
<b>Revision</b>	1
<b>Parameters</b>	ifacetype rtrvtxid
<b>Context Parameters</b>	Rule Name

### 2.32.61. internal\_error\_unable\_to\_find\_lnk\_connecting\_to\_lsa (ID: 02400407)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Internal error: Unable to find my link connecting to described LSA (NetVtxId:<netvtxid>)
<b>Explanation</b>	Unable to find local link connected to described LSA.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Contact support with a scenario description.
<b>Revision</b>	1
<b>Parameters</b>	netvtxid
<b>Context Parameters</b>	Rule Name

### 2.32.62. memory\_allocation\_failure (ID: 02400500)

<b>Default Severity</b>	CRITICAL
-------------------------	----------

---

<b>Log Message</b>	Internal Error: Memory allocation failure! OSPF process now considered inconsistent
<b>Explanation</b>	Memory allocation failure.
<b>Gateway Action</b>	alert
<b>Recommended Action</b>	Check memory consumption.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

### 2.32.63. unable\_to\_send (ID: 02400501)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Internal Error: Unable to send (No sendbuffer?)
<b>Explanation</b>	Unable to get buffer for sending.
<b>Gateway Action</b>	alert
<b>Recommended Action</b>	Check buffer consumption.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

### 2.32.64. failed\_to\_add\_route (ID: 02400502)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Failed to add route <route>! OSPF process should now be considered inconsistent
<b>Explanation</b>	Unable to add route.
<b>Gateway Action</b>	alert
<b>Recommended Action</b>	Check memory consumption.
<b>Revision</b>	1
<b>Parameters</b>	route
<b>Context Parameters</b>	Rule Name

## 2.33. PPP

These log messages refer to the **PPP (PPP tunnel events)** category.

### 2.33.1. ip\_pool\_empty (ID: 02500001)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IPCP can not assign IP address to peer because the IP address pool is empty
<b>Explanation</b>	IPCP can not assign an IP address to the peer because there are no free IP addresses in IP address pool.
<b>Gateway Action</b>	failed_ipcp_address_assignment
<b>Recommended Action</b>	Increase the number of IP addresses in the IP address pool to allow all connecting clients to be assigned a unique IP address.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

### 2.33.2. ip\_address\_required\_but\_not\_received (ID: 02500002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	IP address required but not received. PPP terminated
<b>Explanation</b>	Peer refuses to give out an IP address. Since an IP address lease is required, PPP is terminated.
<b>Gateway Action</b>	ppp_terminated
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

### 2.33.3. primary\_dns\_address\_required\_but\_not\_received (ID: 02500003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Primary DNS address required but not received. PPP terminated
<b>Explanation</b>	Peer refuses to give out a primary DNS address. Since reception of a primary DNS address is required, PPP is terminated.
<b>Gateway Action</b>	ppp_terminated
<b>Recommended Action</b>	None.

<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

### 2.33.4. **secondary\_dns\_address\_required\_but\_not\_received** (ID: 02500004)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Secondary DNS address required but not received. PPP terminated
<b>Explanation</b>	Peer refuses to give out a secondary DNS address. Since reception of a secondary DNS address is required, PPP is terminated.
<b>Gateway Action</b>	ppp_terminated
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

### 2.33.5. **primary\_nbns\_address\_required\_but\_not\_received** (ID: 02500005)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Primary NBNS address required but not received. PPP terminated
<b>Explanation</b>	Peer refuses to give out a primary NBNS address. Since reception of a primary NBNS address is required, PPP is terminated.
<b>Gateway Action</b>	ppp_terminated
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

### 2.33.6. **secondary\_nbns\_address\_required\_but\_not\_received** (ID: 02500006)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Secondary NBNS address required but not received. PPP terminated
<b>Explanation</b>	Peer refuses to give out a secondary NBNS address. Since reception of a secondary NBNS address is required, PPP is terminated.
<b>Gateway Action</b>	ppp_terminated
<b>Recommended Action</b>	None.
<b>Revision</b>	1

Parameters tunnel\_type

## 2.33.7. failed\_to\_agree\_on\_authentication\_protocol (ID: 02500050)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to agree on authentication protocol. PPP terminated
<b>Explanation</b>	Failed to agree on PPP authentication protocol. PPP is terminated.
<b>Gateway Action</b>	ppp_terminated
<b>Recommended Action</b>	Review the allowed authentication protocols configured. The client and server must be configured to have at least one authentication protocol in common.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

## 2.33.8. peer\_refuses\_to\_use\_authentication (ID: 02500051)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Peer refuses to use authentication. PPP terminated
<b>Explanation</b>	Peer refuses to use any authentication at all. PPP is terminated since we demand authentication.
<b>Gateway Action</b>	ppp_terminated
<b>Recommended Action</b>	Review the allowed authentication types configured. The client and server must be configured to have at least one authentication type in common.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

## 2.33.9. lcp\_negotiation\_stalled (ID: 02500052)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	LCP negotiation stalled. PPP terminated
<b>Explanation</b>	PPP LCP negotiation stalled. Terminating PPP since the peer persistently demands the use of an LCP option that is unsupported.
<b>Gateway Action</b>	ppp_terminated
<b>Recommended Action</b>	Try to reconfigure the peer so it does not demand the use of this LCP option.
<b>Revision</b>	1

<b>Parameters</b>	tunnel_type unsupported_lcp_option
-------------------	---------------------------------------

## 2.33.10. ppp\_tunnel\_limit\_exceeded (ID: 02500100)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	PPP Tunnel license limit exceeded. PPP terminated
<b>Explanation</b>	PPP is terminated because the license restrictions do not allow any more PPP tunnels. No new PPP tunnels can be established until an existing one is closed.
<b>Gateway Action</b>	ppp_terminated
<b>Recommended Action</b>	Upgrade your license to allow more simultaneous PPP tunnels.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type limit

## 2.33.11. authentication\_failed (ID: 02500101)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Authentication failed. PPP terminated
<b>Explanation</b>	Authentication failed. PPP terminated.
<b>Gateway Action</b>	ppp_terminated
<b>Recommended Action</b>	Make sure that the right username and password is used.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type user

## 2.33.12. response\_value\_too\_long (ID: 02500150)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	PPP CHAP response value was truncated because it was too long
<b>Explanation</b>	PPP CHAP response value was truncated because it was too long.
<b>Gateway Action</b>	chap_response_value_truncated
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

### 2.33.13. username\_too\_long (ID: 02500151)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	PPP CHAP username was truncated because it was too long
<b>Explanation</b>	PPP CHAP username was truncated because it was too long.
<b>Gateway Action</b>	chap_username_truncated
<b>Recommended Action</b>	Reconfigure the endpoints to use a shorter username.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

### 2.33.14. username\_too\_long (ID: 02500201)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	PPP MSCHAPv1 username was truncated because it was too long
<b>Explanation</b>	PPP MSCHAPv1 username was truncated because it was too long.
<b>Gateway Action</b>	mschapv1_username_truncated
<b>Recommended Action</b>	Reconfigure the endpoints to use a shorter username.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

### 2.33.15. username\_too\_long (ID: 02500301)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	PPP MSCHAPv2 username was truncated because it was too long
<b>Explanation</b>	PPP MSCHAPv2 username was truncated because it was too long.
<b>Gateway Action</b>	mschapv2_username_truncated
<b>Recommended Action</b>	Reconfigure the endpoints to use a shorter username.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

### 2.33.16. username\_too\_long (ID: 02500350)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	PPP PAP username was truncated because it was too long
<b>Explanation</b>	PPP PAP username was truncated because it was too long.

<b>Gateway Action</b>	pap_username_truncated
<b>Recommended Action</b>	Reconfigure the endpoints to use a shorter username.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

## 2.33.17. password\_too\_long (ID: 02500351)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	PPP PAP password was truncated because it was too long
<b>Explanation</b>	PPP PAP password was truncated because it was too long.
<b>Gateway Action</b>	pap_password_truncated
<b>Recommended Action</b>	Reconfigure the endpoints to use a shorter password.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

## 2.33.18. unsupported\_auth\_server (ID: 02500500)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Unsupported authentication server. PPP Authentication terminated
<b>Explanation</b>	Unsupported authentication server. PPP Authentication terminated.
<b>Gateway Action</b>	authentication_terminated
<b>Recommended Action</b>	Review the authentication server configuration.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

## 2.33.19. radius\_error (ID: 02500501)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Radius server authentication error. PPP Authentication terminated
<b>Explanation</b>	There was an error while authenticating using a radius server. PPP Authentication terminated.
<b>Gateway Action</b>	authentication_terminated
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

## 2.33.20. authdb\_error (ID: 02500502)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Local database authentication error. PPP Authentication terminated
<b>Explanation</b>	There was an error while authenticating using a local user database. PPP Authentication terminated.
<b>Gateway Action</b>	authentication_terminated
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tunnel_type

## 2.33.21. MPPE\_decrypt\_fail (ID: 02500600)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	MPPE decryption resulted in the unsupported protocol <protocol>. Terminating PPP
<b>Explanation</b>	MPPE decryption resulted in an unsupported protocol. IP is the only protocol supported. This either means that the decryption failed or that the peer actually sent data using an unsupported protocol. PPP is terminated.
<b>Gateway Action</b>	ppp_terminated
<b>Recommended Action</b>	Reconnect the tunnel. If the peer keeps sending the same unsupported protocol, try to reconfigure the peer to only send IP packets through the tunnel.
<b>Revision</b>	1
<b>Parameters</b>	protocol

## 2.34. PPPOE

These log messages refer to the **PPPOE (PPPoE tunnel events)** category.

### 2.34.1. pppoe\_tunnel\_up (ID: 02600001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	PPPoE tunnel on <iface> established to <pppoeserver>. Auth: <auth>, IfaceIP: <ifaceip>, Downtime: <downtime>
<b>Explanation</b>	The PPPoE tunnel for the interface have been established. .
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface pppoeserver auth ifaceip downtime

### 2.34.2. pppoe\_tunnel\_closed (ID: 02600002)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	PPPoE tunnel on <iface> to <pppoeserver> closed. Uptime: <uptime>
<b>Explanation</b>	The PPPoE tunnel for the interface have been closed. .
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface pppoeserver uptime

## 2.35. PPTP

These log messages refer to the **PPTP (PPTP tunnel events)** category.

### 2.35.1. pptpclient\_resolve\_successful (ID: 02700001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	PPTP client <iface> resolved <remotegwname> to <remotegw>
<b>Explanation</b>	The PPTP client successfully resolved the DNS name of remote gateway.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegwname remotegw

### 2.35.2. pptpclient\_resolve\_failed (ID: 02700002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	PPTP client <iface> failed to resolve <remotegwname>
<b>Explanation</b>	The PPTP client failed to resolve the DNS name of the remote gateway.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Make sure you have configured the DNS name of the remote gateway and the DNS servers correctly.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegwname

### 2.35.3. pptp\_connection\_disallowed (ID: 02700003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	PPTP connection from <remotegw> disallowed according to rule <rule>! Call ID: <callid>
<b>Explanation</b>	The PPTP connection is disallowed by the new configuration according to the specified userauth rule. Closing down the PPTP connection.
<b>Gateway Action</b>	pptp_connection_closed
<b>Recommended Action</b>	Make sure the userauth rules are configured correctly.

---

<b>Revision</b>	1
<b>Parameters</b>	rule remotegw callid

## 2.35.4. unknown\_pptp\_auth\_source (ID: 02700004)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unknown PPTP authentication source for <rule>! Remote gateway: <remotegw>, Call ID: <callid>
<b>Explanation</b>	The authentication source for the specified userauth rule found in the new configuration is unknown to the PPTP server. Closing down the PPTP connection.
<b>Gateway Action</b>	pptp_connection_closed
<b>Recommended Action</b>	Make sure the userauth rules are configured correctly.
<b>Revision</b>	1
<b>Parameters</b>	rule remotegw callid

## 2.35.5. user\_disconnected (ID: 02700005)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	User <user> is forcibly disconnected. Call ID: <callid> Remote gateway: <remotegw>
<b>Explanation</b>	The connected client is forcibly disconnected by the userauth system.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	user callid remotegw

## 2.35.6. only\_routes\_set\_up\_by\_server\_iface\_allowed (ID: 02700006)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	PPTP server <iface> received a packet routed by a route not set up by the interface itself. Dropping packet.
<b>Explanation</b>	The PPTP server interface received a packet that was routed to the interface by a route that was either manually configured or set up by

	another subsystem. Traffic can only be sent out on the PPTP server using the dynamic routes set up by the interface itself.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Make sure there are no manually configured routes pointing to the PPTP server interface in the configuration.
<b>Revision</b>	1
<b>Parameters</b>	iface

## 2.35.7. mppe\_required (ID: 02700007)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	MPPE failed but is required, closing session <callid> to <remotegw> on <iface>.
<b>Explanation</b>	MPPE is required by the configuration but the MPPE negotiation failed. Session will be closed.
<b>Gateway Action</b>	close_session
<b>Recommended Action</b>	Make sure the peer is capable of MPPE encryption, or disable the MPPE requirement.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegw callid

## 2.35.8. pptp\_session\_closed (ID: 02700008)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	PPTP session <callid> to <remotegw> on <iface> closed.
<b>Explanation</b>	A PPTP session has been closed. The specified interface, remote gateway and call ID identify the specific session.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegw callid

## 2.35.9. pptp\_session\_request (ID: 02700009)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	PPTP session request sent on control connection to <remotegw>

---

<b>Explanation</b>	An PPTP session request has been sent on the control connection to the specified remote gateway.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	remotegw

## 2.35.10. unsupported\_message (ID: 02700010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unsupported message type <type> received on session <callid> from <remotegw>. Ignoring message.
<b>Explanation</b>	A message with unsupported type received. Ignoring it. The specified interface, remote gateway and call ID identify the specific session.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface type callid remotegw

## 2.35.11. failure\_init\_radius\_accounting (ID: 02700011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Failed to send Accounting Start to RADIUS Accounting Server. Accounting will be disabled. Interface: <iface>, Remote gateway: <remotegw>, Call ID: <callid>
<b>Explanation</b>	Failed to send START message to RADIUS accounting server. RADIUS accounting will be disabled for this session. The specified interface, remote gateway and call ID identify the specific session.
<b>Gateway Action</b>	accounting_disabled
<b>Recommended Action</b>	Make sure the RADIUS accounting configuration is correct.
<b>Revision</b>	1
<b>Parameters</b>	callid remotegw iface

## 2.35.12. pptp\_session\_up (ID: 02700012)

<b>Default Severity</b>	WARNING
-------------------------	---------

---

---

<b>Log Message</b>	PPP negotiation completed for session <callid> to <remotegw> on <iface>. User: <user>, Auth: <auth>, MPPE: <mppe>, Assigned IP: <assigned_ip>
<b>Explanation</b>	The PPP negotiation has completed successfully for this session. The specified interface, remote gateway and call ID identify the specific session.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	callid iface remotegw user auth mppe assigned_ip

### 2.35.13. pptp\_session\_up (ID: 02700013)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	PPP negotiation completed for session <callid> on <iface> connected to <remotegw>. Auth: <auth>, MPPE: <mppe>
<b>Explanation</b>	The PPP negotiation has completed successfully for this session. The specified interface, remote gateway and call ID identify the specific session.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	callid iface remotegw auth mppe

### 2.35.14. tunnel\_idle\_timeout (ID: 02700014)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	PPTP tunnel to <remotegw> on <iface> has been idle for too long. Closing it.
<b>Explanation</b>	A PPTP tunnel has been idle for too long. Tunnel will be closed.
<b>Gateway Action</b>	close_tunnel
<b>Recommended Action</b>	None.
<b>Revision</b>	1

---

---

<b>Parameters</b>	iface remotegw
-------------------	-------------------

## 2.35.15. session\_idle\_timeout (ID: 02700015)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	PPTP session <callid> to <remotegw> on <iface> has been idle for too long. Closing it.
<b>Explanation</b>	A PPTP session has been idle for too long. Session will be closed.
<b>Gateway Action</b>	close_session
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegw callid

## 2.35.16. pptpclient\_start (ID: 02700017)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	PPTP client <iface> started, connecting to server on <remotegw>
<b>Explanation</b>	A PPTP client has initiated the connection to its remote gateway.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegw

## 2.35.17. pptpclient\_connected (ID: 02700018)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	PPTP client <iface> connected to <remotegw>, requesting control connection
<b>Explanation</b>	A PPTP client has established a connection to its remote gateway and is sending a control connection request message.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegw

---

## 2.35.18. pptp\_tunnel\_up (ID: 02700019)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	PPTP tunnel up, client <remotegw> connected to <iface>
<b>Explanation</b>	A remote PPTP client has established a connection to this PPTP server.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegw

## 2.35.19. ctrlconn\_refused (ID: 02700020)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The remote PPTP server on <remotegw> refused to establish PPTP control connection. Reason: <reason>
<b>Explanation</b>	A remote PPTP server refused to establish PPTP control connection.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Read the reason specified by the PPTP server. This might give a clue why the PPTP server refused the PPTP control connection.
<b>Revision</b>	1
<b>Parameters</b>	reason iface remotegw

## 2.35.20. pptp\_tunnel\_up (ID: 02700021)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	PPTP tunnel on <iface> is up. Connected to server on <remotegw>.
<b>Explanation</b>	This PPTP client has established a control connection to the remote PPTP server.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegw

## 2.35.21. pptp\_tunnel\_closed (ID: 02700022)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	PPTP tunnel to <remotegw> on <iface> closed.
<b>Explanation</b>	The PPTP tunnel to has been closed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegw

## 2.35.22. pptp\_connection\_disallowed (ID: 02700024)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	PPTP connection from <remotegw> disallowed according to rule <rule>. Interface: <iface>.
<b>Explanation</b>	The PPTP connection is disallowed according to the specified userauth rule.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Make sure the userauth rules are configured correctly.
<b>Revision</b>	1
<b>Parameters</b>	rule iface remotegw

## 2.35.23. unknown\_pptp\_auth\_source (ID: 02700025)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unknown PPTP authentication source for <rule>!. Interface: <iface>, Remote gateway: <remotegw>.
<b>Explanation</b>	The authentication source for the specified userauth rule is unknown to the PPTP server.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Make sure the userauth rules are configured correctly.
<b>Revision</b>	1
<b>Parameters</b>	rule iface remotegw

## 2.35.24. pptp\_no\_userauth\_rule\_found (ID: 02700026)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Did not find a matching userauth rule for the incoming PPTP connection. Interface: <iface>, Remote gateway: <remotegw>.
<b>Explanation</b>	The PPTP server was unsuccessful trying to find a userauth rule matching the incoming PPTP connection.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Make sure the userauth rules are configured correctly.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegw

## 2.35.25. malformed\_packet (ID: 02700027)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Malformed packet received from <remotegw> on <iface>. Error code: <error_code>
<b>Explanation</b>	A malformed packet was received by the PPTP interface.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface remotegw error_code

## 2.35.26. waiting\_for\_ip\_to\_listen\_on (ID: 02700050)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	PPTP server <iface> cannot start until it has an IP address to listen on.
<b>Explanation</b>	The PPTP server cannot start until it has a proper IP address to listen on.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Make sure that the IP address is configured correctly on the PPTP server interface. If the PPTP server is supposed to listen on an IP assigned by a DHCP server, make sure that the DHCP server is working properly.
<b>Revision</b>	1
<b>Parameters</b>	iface

## 2.36. REASSEMBLY

These log messages refer to the **REASSEMBLY (Events concerning data reassembly)** category.

### 2.36.1. ack\_of\_not\_transmitted\_data (ID: 04800002)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	TCP segment acknowledges data not yet transmitted
<b>Explanation</b>	A TCP segment that acknowledges data not yet transmitted was received. The segment will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Connection

### 2.36.2. invalid\_tcp\_checksum (ID: 04800003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	TCP segment with invalid checksum
<b>Explanation</b>	A TCP segment with an invalid checksum was received. The segment will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Connection

### 2.36.3. mismatching\_data\_in\_overlapping\_tcp\_segment (ID: 04800004)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Overlapping TCP segment containing different data
<b>Explanation</b>	A TCP segment that partly overlaps segments that has been received earlier was received. The data in the overlapping part is however different from the data in the segments received earlier. The segment's data will be replaced so that it is consistent with the earlier received segments.
<b>Gateway Action</b>	correct the data
<b>Recommended Action</b>	Research the source of this erroneous traffic.
<b>Revision</b>	1

---

Context Parameters	Connection
--------------------	------------

## 2.36.4. memory\_allocation\_failure (ID: 04800005)

Default Severity	ERROR
Log Message	Can't allocate memory to keep track of a packet
Explanation	The gateway is unable to allocate memory to keep track of packet that was received. The packet will be dropped.
Gateway Action	drop
Recommended Action	Review configuration to reduce memory consumption.
Revision	1

## 2.36.5. drop\_due\_to\_buffer\_starvation (ID: 04800007)

Default Severity	ERROR
Log Message	Can't allocate resources to process a packet
Explanation	The gateway ran out of resources when trying to allocate resources to send a packet. The packet that triggered the need to send a packet will be dropped.
Gateway Action	drop
Recommended Action	Check buffer consumption.
Revision	1

## 2.36.6. failed\_to\_send\_ack (ID: 04800008)

Default Severity	ERROR
Log Message	Failed to send TCP ACK in response to a segment
Explanation	The gateway responds to some segments by sending an acknowledgement segment to the sender. An example is when it receives a segment that is outside of the receiver's receive window. This log message indicates that the gateway failed to allocate resources to send such an acknowledgement segment.
Gateway Action	none
Recommended Action	Check buffer consumption.
Revision	1

## 2.36.7. processing\_memory\_limit\_reached (ID: 04800009)

Default Severity	NOTICE
------------------	--------

---

<b>Log Message</b>	Maximum processing memory limit reached
<b>Explanation</b>	The reassembly subsystem has reached the maximum limit set on its processing memory. This will decrease the performance of connections that are processed by the reassembly subsystem.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Consider increasing the setting Reassembly_MaxProcessingMem.
<b>Revision</b>	1

## **2.36.8. maximum\_connections\_limit\_reached (ID: 04800010)**

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Maximum connections limit reached
<b>Explanation</b>	The reassembly subsystem has reached the maximum number of concurrent connections.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	Consider increasing the setting Reassembly_MaxConnections.
<b>Revision</b>	1
<b>Context Parameters</b>	Connection

## **2.36.9. state\_memory\_allocation\_failed (ID: 04800011)**

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to allocate the memory needed to activate reassembly on a connection
<b>Explanation</b>	The reassembly subsystem has failed to allocate the memory needed to activate reassembly on a connection.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	Review configuration to reduce memory consumption.
<b>Revision</b>	1
<b>Context Parameters</b>	Connection

## 2.37. RFO

These log messages refer to the **RFO (Route fail over events)** category.

### 2.37.1. has\_ping (ID: 04100001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Interface <iface>, Table <table>, Net <net>: Route enabled, got PING reply from GW <gateway>
<b>Explanation</b>	Route is available. Received PING reply from the gateway.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	iface table net gateway

### 2.37.2. no\_ping (ID: 04100002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Interface <iface>, Table <table>, Net <net>: Unable to open conn for PING trying again later
<b>Explanation</b>	Unable to open a connection to verify the status of the route. Will try again later.
<b>Gateway Action</b>	try_again_later
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface table net gateway

### 2.37.3. no\_ping (ID: 04100003)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Interface <iface>, Table <table>, Net <net>: Route disabled, no PING reply from Gateway <gateway>
<b>Explanation</b>	Route is not available, and has been disabled. Did not receive a PING reply from the gateway.
<b>Gateway Action</b>	route_disabled

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface table net gateway

## 2.37.4. unable\_to\_register\_pingmon (ID: 04100004)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Interface <iface>, Table <table>, Net <net>: Route no longer monitored, unable to register PING monitor
<b>Explanation</b>	Internal Error: The route is no longer monitored. Failed to register PING Route Monitor.
<b>Gateway Action</b>	route_not_monitored
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface table net gateway

## 2.37.5. unable\_to\_register\_pingmon (ID: 04100005)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Interface <iface>, Table <table>, Net <net>: Route no longer monitored via PING, unable to register PING monitor
<b>Explanation</b>	Internal Error: The route is no longer monitored. Failed to register PING Route Monitor.
<b>Gateway Action</b>	disabled_monitor
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface table net gateway

## 2.37.6. has\_arp (ID: 04100006)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Interface <iface>, Table <table>, Net <net>: Route enabled, got ARP

	reply from Gateway <gateway>
<b>Explanation</b>	Route is available. Received ARP reply from the gateway.
<b>Gateway Action</b>	route_enabled
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	iface table net gateway

### 2.37.7. no\_arp (ID: 04100007)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Interface <iface>, Table <table>, Net <net>: Route disabled, no ARP reply from Gateway <gateway>
<b>Explanation</b>	Route is not available, and has been disabled. Did not receive a ARP reply from the gateway.
<b>Gateway Action</b>	route_enabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface table net gateway

### 2.37.8. unable\_to\_register\_arp\_monitor (ID: 04100008)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Interface <iface>, Table <table>, Net <net>: Route no longer monitored, unable to register ARP monitor
<b>Explanation</b>	Internal Error: The route is no longer monitored. Failed to register ARP Route Monitor.
<b>Gateway Action</b>	no_monitoring
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface table net gateway

### 2.37.9. unable\_to\_register\_arp\_monitor (ID: 04100009)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Interface <iface>, Table <table>, Net <net>: Route no longer monitored via ARP, unable to register ARP monitor
<b>Explanation</b>	Internal Error: The route is no longer monitored. Failed to register ARP Route Monitor.
<b>Gateway Action</b>	disabled_monitor
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface table net gateway

## 2.37.10. no\_link (ID: 04100010)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Interface <iface> has no link (reason: <reason>), all associated routes disabled.
<b>Explanation</b>	The interface has no link, and all associated routes has been disabled.
<b>Gateway Action</b>	associated_routes_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	iface reason

## 2.37.11. has\_link (ID: 04100011)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Interface <iface> has link. Some associated routes may require ARP to be enabled
<b>Explanation</b>	The interface has a link. Some associated routes may require ARP to be enabled.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	iface

## 2.37.12. unable\_to\_register\_interface\_monitor (ID:

## 04100012)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Interface <iface>, Table <table>, Net <net>: Route no longer monitored, unable to register interface monitor
<b>Explanation</b>	Internal Error: Route is no longer monitored. Unable to register Interface Monitor.
<b>Gateway Action</b>	no_monitoring
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface table net gateway

## 2.37.13. unable\_to\_register\_interface\_monitor (ID: 04100013)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Interface <iface>, Table <table>, Net <net>: Route no longer monitored, unable to register interface monitor
<b>Explanation</b>	Internal Error: Route is no longer monitored. Unable to register Interface Monitor.
<b>Gateway Action</b>	disabled_monitor
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface table net gateway

## 2.37.14. hostmon\_failed (ID: 04100014)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Interface <iface>, Table <table>, Net <net>: Route disabled, host monitoring failed
<b>Explanation</b>	Route is disabled. Host monitoring failed.
<b>Gateway Action</b>	route_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1

<b>Parameters</b>	iface table net
-------------------	-----------------------

## 2.37.15. hostmon\_successful (ID: 04100015)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Interface <iface>, Table <table>, Net <net>: Route enabled, host monitoring successful
<b>Explanation</b>	Route is available. Host monitoring successful.
<b>Gateway Action</b>	route_enabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	iface table net

## 2.38. RULE

These log messages refer to the **RULE (Events triggered by rules)** category.

### 2.38.1. ruleset\_fwdfast (ID: 06000003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Packet statelessly forwarded (fwdfast)
<b>Explanation</b>	The packet matches a rule with a "fwdfast" action, and is statelessly forwarded.
<b>Gateway Action</b>	fwdfast
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Information Packet Buffer

### 2.38.2. ip\_verified\_access (ID: 06000005)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	IP address verified according to ACCESS section
<b>Explanation</b>	The IP address was verified according to the ACCESS section.
<b>Gateway Action</b>	access_allow
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.38.3. rule\_match (ID: 06000006)

<b>Default Severity</b>	DEBUG
<b>Log Message</b>	GOTO action trigged
<b>Explanation</b>	A rule with a special GOTO action was trigged by an IP-rule lookup. This log message only appears if you explicitly requested it for the rule in question, and it is considered of DEBUG severity.
<b>Gateway Action</b>	GOTO
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Rule Information

---

 Packet Buffer

## 2.38.4. rule\_match (ID: 06000007)

<b>Default Severity</b>	DEBUG
<b>Log Message</b>	RETURN action triggered
<b>Explanation</b>	A rule with a special RETURN action was triggered by an IP-rule lookup. This log message only appears if you explicitly requested it for the rule in question, and it is considered of DEBUG severity.
<b>Gateway Action</b>	RETURN
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Rule Information Packet Buffer

## 2.38.5. block0net (ID: 06000010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Destination address is the 0.* net. Dropping
<b>Explanation</b>	The destination address was the 0.* net, which is not allowed according to the configuration. The packet is dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Investigate why this traffic had the 0.* net as the destination.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.38.6. block0net (ID: 06000011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Destination address is the 0.* net. Accepting
<b>Explanation</b>	The destination address was the 0.* net, which is allowed according to the configuration. The packet is accepted.
<b>Gateway Action</b>	accept
<b>Recommended Action</b>	If this type of traffic should be dropped, modify the "Settings" section in the configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

---

 Packet Buffer

### 2.38.7. block127net (ID: 06000012)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Destination address is the 127.* net. Dropping
<b>Explanation</b>	The destination address was the 127.* net, which is not allowed according to the configuration. The packet is dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Investigate why this traffic had the 127.* net as the destination.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.38.8. block127net (ID: 06000013)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Destination address is the 127.* net. Accepting
<b>Explanation</b>	The destination address was the 127.* net, which is allowed according to the configuration. The packet is accepted.
<b>Gateway Action</b>	accept
<b>Recommended Action</b>	If this type of traffic should be dropped, modify the "Settings" section in the configuration.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.38.9. directed\_broadcasts (ID: 06000030)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Packet directed to the broadcast address of the destination network. Forwarding
<b>Explanation</b>	The packet was directed to the broadcast address of the destination network, and the unit is configured to allow this.
<b>Gateway Action</b>	forward
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

## 2.38.10. directed\_broadcasts (ID: 06000031)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Packet directed to the broadcast address of the destination network. Dropping
<b>Explanation</b>	The packet was directed to the broadcast address of the destination network, and the unit is configured to disallow this.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name

## 2.38.11. unknown\_vlanid (ID: 06000040)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received VLAN packet with unknown tag <vlanid>. Dropping
<b>Explanation</b>	The unit received a VLAN packet with an unknown tag, and the packet is dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	vlanid
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.38.12. ruleset\_reject\_packet (ID: 06000050)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Packet rejected by rule-set. Rejecting
<b>Explanation</b>	The rule-set is configured to rejected this packet.
<b>Gateway Action</b>	reject
<b>Recommended Action</b>	If this is not the indended behaviour, modify the rule-set.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Information Packet Buffer

## 2.38.13. ruleset\_drop\_packet (ID: 06000051)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Packet dropped by rule-set. Dropping
<b>Explanation</b>	The rule-set is configured to drop this packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If this is not the intended behaviour, modify the rule-set.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Information Packet Buffer

## 2.38.14. unhandled\_local (ID: 06000060)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Allowed but unhandled packet to the firewall. Dropping
<b>Explanation</b>	A packet directed to the unit itself was received. The packet is allowed, but there is no matching state information for this packet. It is not part of any open connections, and will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.39. SLB

These log messages refer to the **SLB (SLB events)** category.

### 2.39.1. server\_online (ID: 02900001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	SLB Server <server_ip> is online according to monitor
<b>Explanation</b>	A disabled server has been determined to be alive again.
<b>Gateway Action</b>	Adding this server to the active servers list.
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	server_ip
<b>Context Parameters</b>	Rule Name

### 2.39.2. server\_offline (ID: 02900002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SLB Server <server_ip> is offline according to monitor
<b>Explanation</b>	The server is determined to be offline according to monitor.
<b>Gateway Action</b>	Removing this server from the active servers list.
<b>Recommended Action</b>	Determine why the server is not responding.
<b>Revision</b>	1
<b>Parameters</b>	server_ip [monitor] [monitor_port]
<b>Context Parameters</b>	Rule Name

## 2.40. SMTPLOG

These log messages refer to the **SMTPLOG (SMTPLOG events)** category.

### 2.40.1. unable\_to\_establish\_connection (ID: 03000001)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unable to establish connection to SMTP server <smtp_server>. Send aborted
<b>Explanation</b>	The unit failed to establish a connection to the SMTP server. No SMTP Log will be sent.
<b>Gateway Action</b>	abort_sending
<b>Recommended Action</b>	Verify that a SMTP server is running at the address specified.
<b>Revision</b>	1
<b>Parameters</b>	smtp_server

### 2.40.2. connect\_timeout (ID: 03000002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Timeout connecting to SMTP server <smtp_server>. Send aborted
<b>Explanation</b>	The unit timed out while trying to establish a connection to the SMTP server. No SMTP Log will be sent.
<b>Gateway Action</b>	abort_sending
<b>Recommended Action</b>	Verify that a SMTP server is running at the address specified.
<b>Revision</b>	1
<b>Parameters</b>	smtp_server

### 2.40.3. send\_failure (ID: 03000004)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unable to send data to SMTP server <smtp_server>. Send aborted
<b>Explanation</b>	The unit failed to send data to the SMTP server. No SMTP Log will be sent.
<b>Gateway Action</b>	abort_sending
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	smtp_server

**2.40.4. receive\_timeout (ID: 03000005)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Receive timeout from SMTP server <smtp_server>. Send aborted
<b>Explanation</b>	The unit timed out while receiving data from the SMTP server. No SMTP Log will be sent.
<b>Gateway Action</b>	abort_sending
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	smtp_server

**2.40.5. rejected\_connect (ID: 03000006)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTP server <smtp_server> rejected connection. Send aborted
<b>Explanation</b>	The SMTP server reject the connection attempt. No SMTP Log will be sent.
<b>Gateway Action</b>	abort_sending
<b>Recommended Action</b>	Verify that a SMTP Server is configured to accept connections from the unit.
<b>Revision</b>	1
<b>Parameters</b>	smtp_server

**2.40.6. rejected\_ehlo\_helo (ID: 03000007)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTP server <smtp_server> rejected both EHLO/HELO. Trying to continue anyway
<b>Explanation</b>	The SMTP server rejected the normal handshake process. The unit will try to continue anyway.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	If problems arise, verify that the SMTP server is properly configured.
<b>Revision</b>	1
<b>Parameters</b>	smtp_server

**2.40.7. rejected\_sender (ID: 03000008)**

<b>Default Severity</b>	WARNING
-------------------------	---------

<b>Log Message</b>	SMTP server <smtp_server> rejected sender <sender>. Send aborted
<b>Explanation</b>	The SMTP server rejected the sender. No SMTP Log will be sent.
<b>Gateway Action</b>	abort_sending
<b>Recommended Action</b>	Verify that the SMTP server is configured to accept this sender.
<b>Revision</b>	1
<b>Parameters</b>	smtp_server sender

## 2.40.8. rejected\_recipient (ID: 03000009)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTP server <smtp_server> rejected recipient <recipient>
<b>Explanation</b>	The SMTP server rejected the recipient. No SMTP Log will be sent.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the SMTP server is configured to accept this recipient.
<b>Revision</b>	1
<b>Parameters</b>	smtp_server recipient

## 2.40.9. rejected\_all\_recipients (ID: 03000010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTP server <smtp_server> rejected all recipients. Send aborted
<b>Explanation</b>	The SMTP server rejected all recipients. No SMTP Log will be sent.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the SMTP server is configured to accept these recipients.
<b>Revision</b>	1
<b>Parameters</b>	smtp_server

## 2.40.10. rejected\_data (ID: 03000011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTP server <smtp_server> rejected DATA request. Send aborted
<b>Explanation</b>	The SMTP server rejected the DATA request. No SMTP Log will be sent.
<b>Gateway Action</b>	None

<b>Recommended Action</b>	Verify that the SMTP server is properly configured.
<b>Revision</b>	1
<b>Parameters</b>	smtp_server

## 2.40.11. rejected\_message\_text (ID: 03000012)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SMTP server <smtp_server> rejected message text. Send aborted
<b>Explanation</b>	The SMTP server rejected the message text. No SMTP Log will be sent.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the SMTP server is properly configured.
<b>Revision</b>	1
<b>Parameters</b>	smtp_server

## 2.41. SNMP

These log messages refer to the **SNMP (Allowed and disallowed SNMP accesses)** category.

### 2.41.1. disallowed\_sender (ID: 03100001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Disallowed SNMP from <peer>, disallowed sender IP
<b>Explanation</b>	The sender IP address is not allowed to send SNMP data to the unit. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If this sender IP address should have SNMP access to the unit, this should be configured in the ACCESS section.
<b>Revision</b>	1
<b>Parameters</b>	peer
<b>Context Parameters</b>	Connection

### 2.41.2. invalid\_snmp\_community (ID: 03100002)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Disallowed SNMP from <peer>, invalid community string
<b>Explanation</b>	The SNMP community string is invalid.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Make sure the entered SNMP community string is correct.
<b>Revision</b>	1
<b>Parameters</b>	peer
<b>Context Parameters</b>	Connection

## 2.42. SYSTEM

These log messages refer to the **SYSTEM (System-wide events: startup, shutdown, etc..)** category.

### 2.42.1. demo\_expired (ID: 03200020)

<b>Default Severity</b>	EMERGENCY
<b>Log Message</b>	The DEMO period for this copy of Clavister CorePlus has expired. Please install license and re-run Clavister CorePlus, or restart the firewall to initiate another evaluation session
<b>Explanation</b>	The unit will no longer operate, as the demo period has expired. Install a license in order to avoid this.
<b>Gateway Action</b>	shutdown
<b>Recommended Action</b>	Install a license.
<b>Revision</b>	1
<b>Parameters</b>	shutdown

### 2.42.2. demo\_mode (ID: 03200021)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	This copy of Clavister CorePlus is in DEMO mode. Firewall core will halt in <time> seconds
<b>Explanation</b>	The unit is running in DEMO mode, and will eventually expire. Install a license in order to avoid this.
<b>Gateway Action</b>	shutdown_soon
<b>Recommended Action</b>	Install a license.
<b>Revision</b>	1
<b>Parameters</b>	shutdown time

### 2.42.3. reset\_clock (ID: 03200100)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The clock at <oldtime> was manually reset by <user> to <newtime>
<b>Explanation</b>	The clock has manually been reset.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

<b>Parameters</b>	oldtime newtime user
-------------------	----------------------------

## 2.42.4. reset\_clock (ID: 03200101)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The clock at <oldtime> was manually reset to <newtime>
<b>Explanation</b>	The clock has manually been reset.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	oldtime newtime

## 2.42.5. invalid\_ip\_match\_access\_section (ID: 03200110)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Failed to verify IP address as per ACCESS section. Dropping
<b>Explanation</b>	The IP address was not verified according to the ACCESS section.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.42.6. hardware\_watchdog\_initialized (ID: 03200260)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Hardware Watchdog <hardware_watchdog_chip> found and initialized with a timeout of <watchdog_timeout> minutes.
<b>Explanation</b>	The system has identified a Hardware Watchdog and initialized it.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	hardware_watchdog_chip watchdog_timeout

## 2.42.7. port\_bind\_failed (ID: 03200300)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Out of memory while trying to allocate dynamic port for local IP <localip> to destination IP <destip>
<b>Explanation</b>	The unit failed to allocate a dynamic port, as it is out of memory.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason localip destip

## 2.42.8. port\_bind\_failed (ID: 03200301)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Out of dynamic assigned ports. All ports <port_base>-<port_end> for Local IP <localip> to Destination IP <destip> are in use
<b>Explanation</b>	Failed to allocate a dynamic port, as all ports are in use.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	reason localip destip port_base port_end

## 2.42.9. port\_hlm\_conversion (ID: 03200302)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Using High Load Mode for Local IP <localip> Destination IP <destip> pair
<b>Explanation</b>	Mode for Local IP - Destination IP pair has changed to High Load because of heavy traffic.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	localip destip

## 2.42.10. port\_ilm\_conversion (ID: 03200303)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Using Low Load Mode for Local IP <localip> Destination IP <destip> pair
<b>Explanation</b>	Mode for Local IP - Destination IP pair has changed to Low Load because of low traffic.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	localip destip

## 2.42.11. log\_messages\_lost\_due\_to\_throttling (ID: 03200400)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	<logcnt> messages lost due to throttling
<b>Explanation</b>	Due to extensive logging, a number of log messages was not sent.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Examine why the unit sent such a large amount of log messages. If this is normal activity, the "LogSendPerSec" setting might be set too low.
<b>Revision</b>	1
<b>Parameters</b>	logcnt

## 2.42.12. log\_messages\_lost\_due\_to\_log\_buffer\_exhaust (ID: 03200401)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	<logcnt> log messages lost due to log buffer exhaustion
<b>Explanation</b>	Due to extensive logging, a number of log messages was not sent.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Examine why the unit sent such a large amount of log messages. If this is normal activity, the "LogSendPerSec" setting might be set too low.
<b>Revision</b>	1
<b>Parameters</b>	logcnt

**2.42.13. ssl\_encryption\_failed (ID: 03200450)**

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Encryption failed.
<b>Explanation</b>	Encryption failed due to error. Connection closed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

**2.42.14. bidir\_fail (ID: 03200600)**

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Failed to establish bi-directional communication with peer in <timeout> seconds
<b>Explanation</b>	The unit failed to establish a connection back to peer, using the new configuration. It will try to revert to the previous configuration file.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the new configuration file does not contain errors that would cause bi-directional communication failure.
<b>Revision</b>	1
<b>Parameters</b>	cfgver timeout

**2.42.15. disk\_cannot\_remove\_file (ID: 03200601)**

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Failed to remove <file>, bi-directional communication will now probably be impossible
<b>Explanation</b>	The unit failed to remove the new, faulty, configuration file. It will still try to revert to the previous configuration file.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the disk media is intact.
<b>Revision</b>	1
<b>Parameters</b>	file

**2.42.16. file\_open\_failed (ID: 03200602)**

<b>Default Severity</b>	ERROR
-------------------------	-------

<b>Log Message</b>	Failed to open newly uploaded configuration file <new_cfg>
<b>Explanation</b>	The unit failed to open the uploaded configuration file.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the disk media is intact.
<b>Revision</b>	1
<b>Parameters</b>	new_cfg

## 2.42.17. disk\_cannot\_remove (ID: 03200603)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to remove <old_cfg>
<b>Explanation</b>	The unit failed to remove the old configuration file.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the disk media is intact, and that the file is not write protected.
<b>Revision</b>	1
<b>Parameters</b>	old_cfg

## 2.42.18. disk\_cannot\_rename (ID: 03200604)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to rename <cfg_new> to <cfg_real>
<b>Explanation</b>	The unit failed to rename the new configuration file to the real configuration file name.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the disk media is intact.
<b>Revision</b>	1
<b>Parameters</b>	cfg_new cfg_real

## 2.42.19. cfg\_switch\_fail (ID: 03200605)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Failed to switch to new configuration
<b>Explanation</b>	For reasons specified in earlier log events, the unit failed to switch to the new configuration and will continue to use the present configuration.

---

<b>Gateway Action</b>	None
<b>Recommended Action</b>	Consult the recommended action in the previous log message, which contained a more detailed error description.
<b>Revision</b>	1

## 2.42.20. core\_switch\_fail (ID: 03200606)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Failed to switch to new core
<b>Explanation</b>	For reasons specified in earlier log events, the unit failed to switch to the new core executable and will continue to use the present core executable.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Consult the recommended action in the previous log message, which contained a more detailed error description.
<b>Revision</b>	1

## 2.42.21. bidir\_ok (ID: 03200607)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Configuration <cfgver> verified for bi-directional communication
<b>Explanation</b>	The new configuration has been verified for communication back to peer, and will now be used as the active configuration.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	cfgver

## 2.42.22. shutdown (ID: 03201000)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Shutdown <shutdown>. Active in <time> seconds. Reason: <reason>
<b>Explanation</b>	The unit is shutting down.
<b>Gateway Action</b>	shutdown
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	shutdown time

---

reason

## 2.42.23. shutdown (ID: 03201010)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Reconfiguration aborted. Configuration files are missing
<b>Explanation</b>	The unit was issued a reconfigure command, but no configuration file is seen. The reconfiguration process is aborted.
<b>Gateway Action</b>	reconfigure_gateway_aborted
<b>Recommended Action</b>	Verify that the disk media is intact.
<b>Revision</b>	1
<b>Parameters</b>	reason

## 2.42.24. shutdown (ID: 03201011)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Shutdown aborted. Core file <core> missing
<b>Explanation</b>	The unit was issued a shutdown command, but no core executable file is seen. The shutdown process is aborted.
<b>Gateway Action</b>	shutdown_gateway_aborted
<b>Recommended Action</b>	Verify that the disk media is intact.
<b>Revision</b>	1
<b>Parameters</b>	shutdown reason core

## 2.42.25. startup\_normal (ID: 03202000)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Security gateway starting. Core: <corever>. Build: <build>. Current uptime: <uptime>. Using configuration file <cfgfile>, version <cfgver>. Previous shutdown: <previous_shutdown>
<b>Explanation</b>	The Security Gateway is starting up.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	corever build uptime

cfgfile  
 cfgver  
 previous\_shutdown

## 2.42.26. startup\_echo (ID: 03202001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Security gateway starting echo (<delay> seconds). Core: <corever>. Build: <build>. Current uptime: <uptime>. Using configuration file <cfgfile>, version <cfgver>. Previous shutdown: <previous_shutdown>
<b>Explanation</b>	The Security Gateway is starting up, echo.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	delay corever build uptime cfgfile cfgver previous_shutdown

## 2.42.27. shutdown (ID: 03202500)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Shutdown <shutdown>
<b>Explanation</b>	The Security Gateway is shutting down.
<b>Gateway Action</b>	shutdown
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	shutdown

## 2.42.28. admin\_login (ID: 03203000)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Administrative user <username> logged in via <authsystem>. Access level: <access_level>
<b>Explanation</b>	An administrative user has logged in to the configuration system.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.

<b>Revision</b>	1
<b>Parameters</b>	authsystem username access_level [userdb] [server_ip] [server_port] [client_ip] [client_port]

## 2.42.29. admin\_logout (ID: 03203001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Administrative user <username> logged out, via <authsystem>. Access level: <access_level>
<b>Explanation</b>	An administrative user has logged out from the configuration system.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	authsystem username access_level [userdb] [client_ip]

## 2.42.30. admin\_login\_failed (ID: 03203002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Administrative user <username> failed to log in via <authsystem>, because of bad credentials
<b>Explanation</b>	An administrative user failed to log in to configuration system. This is most likely due to an invalid entered username or password.
<b>Gateway Action</b>	disallow_admin_access
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	authsystem username [server_ip] [server_port] [client_ip] [client_port]

## 2.43. TCP\_FLAG

These log messages refer to the **TCP\_FLAG (Events concerning the TCP header flags)** category.

### 2.43.1. tcp\_flags\_set (ID: 03300001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The TCP <good_flag> and <bad_flag> flags are set. Allowing
<b>Explanation</b>	The possible combinations for these flags are: SYN URG, SYN PSH, SYN RST, SYN FIN and FIN URG.
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	If any of these combinations should either be dropped or having the bad flag stripped, specify this in configuration, in the "Settings" sub system.
<b>Revision</b>	1
<b>Parameters</b>	good_flag bad_flag
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.43.2. tcp\_flags\_set (ID: 03300002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The TCP <good_flag> and <bad_flag> flags are set. Stripping <bad_flag> flag
<b>Explanation</b>	The possible combinations for these flags are: SYN URG, SYN PSH, SYN RST, SYN FIN and FIN URG. Removing the "bad" flag.
<b>Gateway Action</b>	strip_bad_flag
<b>Recommended Action</b>	If any of these combinations should either be dropped or ignored, specify this in configuration, in the "Settings" sub system.
<b>Revision</b>	1
<b>Parameters</b>	good_flag bad_flag
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.43.3. tcp\_flag\_set (ID: 03300003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The TCP <bad_flag> flag is set. Ignoring
<b>Explanation</b>	The TCP flag is set. Ignoring.

---

<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	bad_flag
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.43.4. tcp\_flag\_set (ID: 03300004)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The TCP <bad_flag> flag is set. Stripping
<b>Explanation</b>	A "bad" TCP flag is set. Removing it.
<b>Gateway Action</b>	strip_flag
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	bad_flag
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.43.5. tcp\_null\_flags (ID: 03300005)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Packet has no SYN, ACK, FIN or RST flag set
<b>Explanation</b>	The packet has no SYN, ACK, FIN or RST flag set. Ignoring.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.43.6. tcp\_flags\_set (ID: 03300008)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The TCP <good_flag> and <bad_flag> flags are set. Dropping
<b>Explanation</b>	The possible combinations for these flags are: SYN URG, SYN PSH, SYN RST, SYN FIN and FIN URG.
<b>Gateway Action</b>	drop

<b>Recommended Action</b>	If any of these combinations should either be ignored or having the bad flag stripped, specify this in configuration, in the "Settings" sub system.
<b>Revision</b>	1
<b>Parameters</b>	good_flag bad_flag
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.43.7. tcp\_flag\_set (ID: 03300009)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	The TCP <bad_flag> flag is set. Dropping
<b>Explanation</b>	The TCP flag is set. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	bad_flag
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.43.8. unexpected\_tcp\_flags (ID: 03300010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Unexpected tcp flags <flags> from <endpoint> during state <state>. Dropping
<b>Explanation</b>	Received unexpected tcp flags during a specific state. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	flags endpoint state
<b>Context Parameters</b>	Rule Name Connection Packet Buffer

### 2.43.9. mismatched\_syn\_resent (ID: 03300011)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Mismatched syn "resent" with seq <seqno>, expected <origseqno>. Dropping
<b>Explanation</b>	Mismatching sequence numbers. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	seqno origseqno
<b>Context Parameters</b>	Rule Name Connection Packet Buffer

## 2.43.10. mismatched\_first\_ack\_seqno (ID: 03300012)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	ACK packet with seq <seqno>. Expected <expectseqno>. Dropping
<b>Explanation</b>	Mismatching sequence numbers. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	seqno expectseqno
<b>Context Parameters</b>	Rule Name Connection Packet Buffer

## 2.43.11. mismatched\_first\_ack\_seqno (ID: 03300013)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	SYNACK packet with seq <seqno>. Expected <expectseqno>. Dropping
<b>Explanation</b>	Mismatching sequence numbers. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	seqno expectseqno

---

<b>Context Parameters</b>	Rule Name Connection Packet Buffer
---------------------------	--

## 2.43.12. rst\_out\_of\_bounds (ID: 03300015)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Originator RST seq <seqno> is not in window <winstart>...<winend>. Dropping
<b>Explanation</b>	The RST flag sequence number is not within the receiver window. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	seqno winstart winend
<b>Context Parameters</b>	Rule Name Connection Packet Buffer

## 2.43.13. tcp\_seqno\_too\_low (ID: 03300016)

<b>Default Severity</b>	DEBUG
<b>Log Message</b>	TCP sequence number <seqno> is not in the acceptable range <accstart>-<accend>. Dropping
<b>Explanation</b>	A TCP segment with an unacceptable sequence number was received. The packet will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	seqno accstart accend
<b>Context Parameters</b>	Rule Name Connection Packet Buffer

## 2.43.14. unacceptable\_ack (ID: 03300017)

<b>Default Severity</b>	NOTICE
-------------------------	--------

---

---

<b>Log Message</b>	TCP acknowledgement <ack> is not in the acceptable range <accstart>-<accend>. Dropping
<b>Explanation</b>	A TCP segment with an unacceptable acknowledgement number was received during state SYN_SENT. The packet will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	ack accstart accend
<b>Context Parameters</b>	Rule Name Connection Packet Buffer

## 2.43.15. rst\_without\_ack (ID: 03300018)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	TCP RST segment without ACK during state SYN_SENT. Dropping
<b>Explanation</b>	A TCP segment with the RST flag but not the ACK flag was received during state SYN_SENT. The packet will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Connection Packet Buffer

## 2.43.16. tcp\_seqno\_too\_high (ID: 03300019)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TCP sequence number <seqno> is not in the acceptable range <accstart>-<accend>. Dropping
<b>Explanation</b>	A TCP segment with an unacceptable sequence number was received. The packet will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	seqno accstart accend

---

<b>Context Parameters</b>	Rule Name Connection Packet Buffer
---------------------------	--

## 2.43.17. tcp\_rcv\_windows\_drained (ID: 03300022)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Out of large TCP receive windows. Maximum windows: <max_windows>. Triggered <num_events> times last 10 seconds.
<b>Explanation</b>	The TCP stack could not accept incoming data since it has run out of large TCP receive windows. This event was triggered [num_events] times during the last 10 seconds.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	If the system is configured to use TCP based ALGs, increase the amount of maximum sessions parameter on the associated service.
<b>Revision</b>	1
<b>Parameters</b>	max_windows [num_events]

## 2.43.18. tcp\_snd\_windows\_drained (ID: 03300023)

<b>Default Severity</b>	CRITICAL
<b>Log Message</b>	Out of large TCP send windows. Maximum windows: <max_windows>. Triggered <num_events> times last 10 seconds.
<b>Explanation</b>	The TCP stack could not send data since it has run out of large TCP send windows. This event was triggered [num_events] times during the last 10 seconds.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	If the system is configured to use TCP based ALGs, increase the amount of maximum sessions parameter on the associated service.
<b>Revision</b>	1
<b>Parameters</b>	max_windows [num_events]

## 2.43.19. tcp\_get\_freesocket\_failed (ID: 03300024)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	System was not able to get a free socket. Triggered <num_events> times last 10 seconds.
<b>Explanation</b>	The TCP stack could not get a free socket. This event was triggered [num_events] times during the last 10 seconds.

<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1

## 2.43.20. tcp\_seqno\_too\_low\_with\_syn (ID: 03300025)

<b>Default Severity</b>	DEBUG
<b>Log Message</b>	TCP sequence number <seqno> is not in the acceptable range <accstart>-<accend>. Dropping
<b>Explanation</b>	A TCP segment with an unacceptable sequence number was received. The packet will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	seqno accstart accend
<b>Context Parameters</b>	Rule Name Connection Packet Buffer

## 2.44. TCP\_OPT

These log messages refer to the **TCP\_OPT (Events concerning the TCP header options)** category.

### 2.44.1. tcp\_mss\_too\_low (ID: 03400001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	TCP MSS <mss> too low. TCPMSSMin=<minmss>
<b>Explanation</b>	The TCP MSS is too low. Ignoring.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tcpopt mss minmss
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.44.2. tcp\_mss\_too\_low (ID: 03400002)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	TCP MSS <mss> too low. TCPMSSMin=<minmss>. Adjusting
<b>Explanation</b>	The TCP MSS is too low. Adjusting to use the configured minimum MSS.
<b>Gateway Action</b>	adjust
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tcpopt mss minmss
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.44.3. tcp\_mss\_too\_high (ID: 03400003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	TCP MSS <mss> too high. TCPMSSMax=<maxmss>
<b>Explanation</b>	The TCP MSS is too high. Ignoring.
<b>Gateway Action</b>	None

---

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tcpopt mss maxmss
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.44.4. tcp\_mss\_too\_high (ID: 03400004)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	TCP MSS <mss> too high. TCPMSSMax=<maxmss>. Adjusting
<b>Explanation</b>	The TCP MSS is too high. Adjusting to use the configured maximum MSS.
<b>Gateway Action</b>	adjust
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tcpopt mss maxmss
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.44.5. tcp\_mss\_above\_log\_level (ID: 03400005)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	TCP MSS <mss> higher than log level. TCPMSSLogLevel=<mssloglevel>
<b>Explanation</b>	The TCP MSS is higher than the log level.
<b>Gateway Action</b>	log
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tcpopt mss mssloglevel
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.44.6. tcp\_option (ID: 03400006)

---

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Packet has a type <tcpopt> TCP option
<b>Explanation</b>	The packet has a TCP Option of the specified type. Ignoring.
<b>Gateway Action</b>	ignore
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tcpopt
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.44.7. tcp\_option\_strip (ID: 03400007)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Packet has a type <tcpopt> TCP option. Stripping it
<b>Explanation</b>	The packet has a TCP Option of the specified type. Removing it.
<b>Gateway Action</b>	strip
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tcpopt
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.44.8. bad\_tcpopt\_length (ID: 03400010)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Type <tcpopt> is multibyte, available=<avail>. Dropping
<b>Explanation</b>	The TCP Option type is multi byte which requires two bytes, and there is less than two bytes available. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tcpopt minoptlen avail
<b>Context Parameters</b>	Rule Name Packet Buffer

**2.44.9. bad\_tcptopt\_length (ID: 03400011)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Type <tcptopt> claims length=<len> bytes, avail=<avail> bytes. Dropping
<b>Explanation</b>	The TCP Option type does not fit in the option space. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tcptopt len avail
<b>Context Parameters</b>	Rule Name Packet Buffer

**2.44.10. bad\_tcptopt\_length (ID: 03400012)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Type <tcptopt>: bad length <optlen>. Expected <expectlen> bytes. Dropping
<b>Explanation</b>	The TCP Option type has an invalid length. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tcptopt optlen expectlen
<b>Context Parameters</b>	Rule Name Packet Buffer

**2.44.11. tcp\_mss\_too\_low (ID: 03400013)**

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TCP MSS <mss> too low. TCPMSSMin=<minmss>. Dropping
<b>Explanation</b>	The TCP MSS is too low. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1

---

<b>Parameters</b>	tcpopt mss minmss
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.44.12. tcp\_mss\_too\_high (ID: 03400014)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TCP MSS <mss> too high. TCPMSSMax=<maxmss>. Dropping
<b>Explanation</b>	The TCP MSS is too high. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tcpopt mss maxmss
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.44.13. tcp\_option\_disallowed (ID: 03400015)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Packet has a <tcpopt> TCP option, which is disallowed. Dropping
<b>Explanation</b>	The packet has a TCP Option of the specified type. Dropping packet.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	tcpopt
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.44.14. tcp\_null\_flags (ID: 03400016)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Packet has no SYN, ACK, FIN or RST flag set. Dropping
<b>Explanation</b>	The packet has no SYN, ACK, FIN or RST flag set. Dropping packet.
<b>Gateway Action</b>	drop

---

<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.44.15. multiple\_tcp\_ws\_options (ID: 03400017)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Multiple window scale options present in a single TCP segment
<b>Explanation</b>	Multiple TCP window scale options present in a single TCP segment.
<b>Gateway Action</b>	strip
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Connection Packet Buffer

## 2.44.16. too\_large\_tcp\_window\_scale (ID: 03400018)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	TCP window scale option with shift count <shift_cnt> was received. The shift count will be lowered to 14.
<b>Explanation</b>	A TCP segment with a window scale option specifying a shift count that is larger than 14 was received. The shift count will be lowered to 14.
<b>Gateway Action</b>	adjust
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	shift_cnt
<b>Context Parameters</b>	Connection Packet Buffer

## 2.44.17. mismatching\_tcp\_window\_scale (ID: 03400019)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Mismatching TCP window scale shift count. Expected <old> got <new> will use <effective>
<b>Explanation</b>	TCP segment with a window scale option specifying a different shift count than previous segments was received. The lower of the two values will be used.

<b>Gateway Action</b>	adjust
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	old new effective
<b>Context Parameters</b>	Connection Packet Buffer

## 2.45. THRESHOLD

These log messages refer to the **THRESHOLD (Threshold rule events)** category.

### 2.45.1. conn\_threshold\_exceeded (ID: 05300100)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Connection threshold <description> exceeded <threshold>. Source IP: <srcip>. Closing connection
<b>Explanation</b>	The source ip is opening up new connections too fast.
<b>Gateway Action</b>	closing_connection
<b>Recommended Action</b>	Investigate worms and DoS attacks.
<b>Revision</b>	1
<b>Parameters</b>	description threshold srcip
<b>Context Parameters</b>	Rule Name

### 2.45.2. reminder\_conn\_threshold (ID: 05300101)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Reminder: Connection threshold <description> exceeded <threshold>. Source IP: <srcip>.
<b>Explanation</b>	The source ip is still opening up new connections too fast.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Look through logs to see if the source ip has misbehaved in the past.
<b>Revision</b>	1
<b>Parameters</b>	description threshold srcip
<b>Context Parameters</b>	Rule Name

### 2.45.3. conn\_threshold\_exceeded (ID: 05300102)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Connection threshold <description> exceeded <threshold>. Source IP: <srcip>
<b>Explanation</b>	The source ip is opening up new connections too fast.
<b>Gateway Action</b>	None

<b>Recommended Action</b>	Investigate worms and DoS attacks.
<b>Revision</b>	1
<b>Parameters</b>	description threshold srcip
<b>Context Parameters</b>	Rule Name

## 2.45.4. failed\_to\_keep\_connection\_count (ID: 05300200)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to keep connection count. Reason: Out of memory
<b>Explanation</b>	The device was unable to allocate resources needed to include the connection in the connection count kept by threshold rules. The connection will not be included in the connection count.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	Check memory consumption.
<b>Revision</b>	1
<b>Context Parameters</b>	Connection

## 2.45.5. failed\_to\_keep\_connection\_count (ID: 05300201)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Failed to keep connection count. Reason: Out of memory
<b>Explanation</b>	The device was unable to allocate resources needed to include the connection in the connection count kept by threshold rules. Since there exist protect actions that are triggered by thresholds on the number of connections, the connection will be closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Check memory consumption.
<b>Revision</b>	1
<b>Context Parameters</b>	Connection

## 2.45.6. threshold\_conns\_from\_srcip\_exceeded (ID: 05300210)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The number of connections matching the rule and originating from <srcip> exceeds <threshold>.
<b>Explanation</b>	The number of connections matching the threshold rule and originating

from a single host exceeds the configured threshold. Note: This log message is rate limited via an exponential back-off procedure.

<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	threshold srcip [username]
<b>Context Parameters</b>	Rule Name

## 2.45.7. threshold\_conns\_from\_srcip\_exceeded (ID: 05300211)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The number of connections matching the rule and originating from <srcip> exceeds <threshold>.
<b>Explanation</b>	The number of connections matching the threshold rule and originating from a single host exceeds the configured threshold. The configured protective measures will be triggered. Note: This log message is rate limited via an exponential back-off procedure.
<b>Gateway Action</b>	protect
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	threshold srcip [username]
<b>Context Parameters</b>	Rule Name

## 2.45.8. threshold\_conns\_from\_filter\_exceeded (ID: 05300212)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The number of connections matching the rule exceeds <threshold>. The Offending host is <srcip>.
<b>Explanation</b>	The number of connections matching the threshold rule exceeds the configured threshold. Note: This log message is rate limited via an exponential back-off procedure.
<b>Gateway Action</b>	none
<b>Recommended Action</b>	None.
<b>Revision</b>	1

<b>Parameters</b>	threshold srcip [username]
<b>Context Parameters</b>	Rule Name

## 2.45.9. threshold\_conns\_from\_filter\_exceeded (ID: 05300213)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The number of connections matching the rule exceeds <threshold>. The Offending host is <srcip>.
<b>Explanation</b>	The number of connections matching the threshold rule exceeds the configured threshold. The configured protective measures will be triggered. Note: This log message is rate limited via an exponential back-off procedure.
<b>Gateway Action</b>	protect
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	threshold srcip [username]
<b>Context Parameters</b>	Rule Name

## 2.46. TIMESYNC

These log messages refer to the **TIMESYNC (Firewall time synchronization events)** category.

### 2.46.1. synced\_clock (ID: 03500001)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	The clock at <oldtime>, was off by <clockdrift> second(s) and synchronized with <timeserver> to <newtime>
<b>Explanation</b>	The clock has been synchronized with the time server.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	2
<b>Parameters</b>	oldtime newtime clockdrift timeserver

### 2.46.2. failure\_communicate\_with\_timeservers (ID: 03500002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Communication with the timeserver(s) failed. Clock not updated.
<b>Explanation</b>	The unit failed to establish a connection with the time sync server. The clock has not been updated.
<b>Gateway Action</b>	clock_not_synced
<b>Recommended Action</b>	Verify that the time sync server is running.
<b>Revision</b>	1

### 2.46.3. clockdrift\_too\_high (ID: 03500003)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	According to the timeserver the clock has drifted <clockdrift> seconds(s) which is NOT in the allowed correction interval (+/-<interval> seconds)
<b>Explanation</b>	The clock has drifted so much that it is not within the allowed +/- correction interval. The clock will not be updated.
<b>Gateway Action</b>	clock_not_synced
<b>Recommended Action</b>	If the correction interval is too narrow, it can be changed in the Advanced Settings section.

<b>Revision</b>	1
<b>Parameters</b>	clockdrift timeserver interval

## 2.47. TRANSPARENCY

These log messages refer to the **TRANSPARENCY (Events concerning the Transparent Mode feature)** category.

### 2.47.1. impossible\_hw\_sender\_address (ID: 04400410)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Impossible hardware sender address 0000:0000:0000. Dropping.
<b>Explanation</b>	Some equipment on the network is sending packets with a source MAC address of 0000:0000:0000. These packets will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Investigate if there are equipment sending packets using 0000:0000:0000 as source MAC address. If there are, try to change the behaviour of that equipment.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.47.2. enet\_hw\_sender\_broadcast (ID: 04400411)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Ethernet hardware sender is a broadcast address. Accepting.
<b>Explanation</b>	The Ethernet hardware sender address is a broadcast address. The packet will be accepted.
<b>Gateway Action</b>	accept
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

### 2.47.3. enet\_hw\_sender\_broadcast (ID: 04400412)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Ethernet hardware sender is a broadcast address. Rewriting to the address of the forwarding interface.
<b>Explanation</b>	The Ethernet hardware sender address is a broadcast address. The packet will be rewritten with the hardware sender address of the forwarding interface.
<b>Gateway Action</b>	rewrite
<b>Recommended Action</b>	None.

<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.47.4. enet\_hw\_sender\_broadcast (ID: 04400413)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Ethernet hardware sender is a broadcast address. Dropping.
<b>Explanation</b>	The Ethernet hardware sender address is a broadcast address. The packet will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Investigate if there are equipment sending packets using a broadcast address as sender MAC address. If there are, try to change the behaviour of that equipment.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.47.5. enet\_hw\_sender\_multicast (ID: 04400414)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Ethernet hardware sender is a multicast address. Accepting.
<b>Explanation</b>	The Ethernet hardware sender address is a multicast address. The packet will be accepted.
<b>Gateway Action</b>	accept
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.47.6. enet\_hw\_sender\_multicast (ID: 04400415)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Ethernet hardware sender is a multicast address. Rewriting to the address of the forwarding interface.
<b>Explanation</b>	The Ethernet hardware sender address is a multicast address. The packet will be rewritten with the hardware sender address of the forwarding interface.
<b>Gateway Action</b>	rewrite
<b>Recommended Action</b>	None.

<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.47.7. enet\_hw\_sender\_multicast (ID: 04400416)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Ethernet hardware sender is a multicast address. Dropping.
<b>Explanation</b>	The Ethernet hardware sender address is a multicast address. The packet will be dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	Investigate if there are equipment sending packets using a multicast address as sender MAC address. If there are, try to change the behaviour of that equipment.
<b>Revision</b>	1
<b>Context Parameters</b>	Rule Name Packet Buffer

## 2.47.8. relay\_stp\_frame (ID: 04400417)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Relaying STP frame from <recvif> to switched interfaces
<b>Explanation</b>	An incoming STP frame has been relayed to all switched interfaces in the same switch route as [recif].
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	recvif

## 2.47.9. dropped\_stp\_frame (ID: 04400418)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Dropping STP frame from <recvif>
<b>Explanation</b>	An incoming STP frame has been dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	recvif

---

## 2.47.10. invalid\_stp\_frame (ID: 04400419)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Incomming STP frame from <recvif> dropped. Reason: <reason>
<b>Explanation</b>	An incomming Spanning-Tree frame has been dropped since it is either malformed or its type is unknown. Supported Spanning-Tree versions are STP, RSTP, MSTP and PVST+.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If the frame format is invalid, locate the unit which is sending the malformed frame.
<b>Revision</b>	1
<b>Parameters</b>	recvif reason

## 2.47.11. relay\_mpls\_frame (ID: 04400420)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Forwarding MPLS packet from <recvif>.
<b>Explanation</b>	An incomming MPLS packet has been forwarded through the gateway. [destif] indicates if it was forwarded to an ultimate destination or if it was broadcasted to over all interfaces in the switch group.
<b>Gateway Action</b>	allow
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	recvif destif

## 2.47.12. dropped\_mpls\_packet (ID: 04400421)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Dropping MPLS packet from <recvif>
<b>Explanation</b>	An incomming MPLS packet has been dropped.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	recvif

## 2.47.13. invalid\_mpls\_packet (ID: 04400422)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Incomming MPLS packet on <recvif> dropped. Reason: <reason>
<b>Explanation</b>	An incomming MPLS packet has been dropped since it was malformed.
<b>Gateway Action</b>	drop
<b>Recommended Action</b>	If the packet format is invalid, locate the unit which is sending the malformed packet.
<b>Revision</b>	1
<b>Parameters</b>	recvif reason

## 2.48. USERAUTH

These log messages refer to the **USERAUTH (User authentication (e.g. RADIUS) events)** category.

### 2.48.1. accounting\_start (ID: 03700001)

<b>Default Severity</b>	INFORMATIONAL
<b>Log Message</b>	Successfully received RADIUS Accounting START response from RADIUS Accounting server
<b>Explanation</b>	The unit received a valid response to an Accounting-Start event from the Accounting Server.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

### 2.48.2. invalid\_accounting\_start\_server\_response (ID: 03700002)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received a RADIUS Accounting START response with an Identifier mismatch. Ignoring this packet
<b>Explanation</b>	The unit received a response with an invalid Identifier mismatch. This can be the result of a busy network, causing accounting event re-sends. This will be ignored.
<b>Gateway Action</b>	ignore_packet
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

### 2.48.3. no\_accounting\_start\_server\_response (ID: 03700003)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Did not receive a RADIUS Accounting START response. Accounting has been disabled
<b>Explanation</b>	The unit did not receive a response to an Accounting-Start event from the Accounting Server. Accounting features will be disabled.
<b>Gateway Action</b>	accounting_disabled

---

<b>Recommended Action</b>	Verify that the RADIUS Accounting server daemon is running on the Accounting Server.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

### 2.48.4. invalid\_accounting\_start\_server\_response (ID: 03700004)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Received an invalid RADIUS Accounting START response from RADIUS Accounting server. Accounting has been disabled
<b>Explanation</b>	The unit received an invalid response to an Accounting-Start event from the Accounting Server Accounting features will be disabled.
<b>Gateway Action</b>	accounting_disabled
<b>Recommended Action</b>	Verify that the RADIUS Accounting server is properly configured.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

### 2.48.5. no\_accounting\_start\_server\_response (ID: 03700005)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Logging out the authenticated user, as no RADIUS Accounting START response was received from RADIUS Accounting server
<b>Explanation</b>	The authenticated user is logged out as no response to the Accounting-Start event was received from the Accounting Server.
<b>Gateway Action</b>	logout_user
<b>Recommended Action</b>	Verify that the RADIUS Accounting server daemon is running on the Accounting Server.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

### 2.48.6. invalid\_accounting\_start\_server\_response (ID: 03700006)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Logging out the authenticated user, as an invalid RADIUS Accounting START response was received from RADIUS Accounting server
<b>Explanation</b>	The authenticated user is logged out as an invalid response to the

---

	Accounting-Start event was received from the Accounting Server.
<b>Gateway Action</b>	logout_user
<b>Recommended Action</b>	Verify that the RADIUS Accounting server is properly configured.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.7. failed\_to\_send\_accounting\_stop (ID: 03700007)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Failed to send Accounting STOP to Authentication Server. Accounting information will not be sent to Authentication Server.
<b>Explanation</b>	The unit failed to send an Accounting-Stop event to the Accounting Server. Accounting information will not be sent to the Accounting Server.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.8. accounting\_stop (ID: 03700008)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Successfully received RADIUS Accounting STOP response from RADIUS Accounting server. Bytes sent=<bytessent>, Bytes rcv=<bytesrcv>, Packets sent=<packetsent>, Packets rcv=<packetsrcv>, Session time=<sestime>
<b>Explanation</b>	The unit received a valid response to an Accounting-Stop event from the Accounting Server.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	bytessent bytesrcv packetsent packetsrcv gigawrapresent gigawraprecv sestime
<b>Context Parameters</b>	User Authentication

## 2.48.9. invalid\_accounting\_stop\_server\_response (ID:

## 03700009)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received a RADIUS Accounting STOP response with an Identifier mismatch. Ignoring this packet
<b>Explanation</b>	The unit received a response with an invalid Identifier mismatch. This can be the result of a busy network, causing accounting event re-sends. This will be ignored.
<b>Gateway Action</b>	ignore_packet
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.10. no\_accounting\_stop\_server\_response (ID: 03700010)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Did not receive a RADIUS Accounting STOP response. User statistics might not have been updated on the Accounting Server
<b>Explanation</b>	The unit did not receive a response to an Accounting-Stop event from the Accounting Server. Accounting information might not have been properly received by the Accounting Server.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the RADIUS Accounting server daemon is running on the Accounting Server.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.11. invalid\_accounting\_stop\_server\_response (ID: 03700011)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Received an invalid RADIUS Accounting STOP response from RADIUS Accounting server. User statistics might not have been updated on the Accounting Server
<b>Explanation</b>	The unit received an invalid response to an Accounting-Stop event from the Accounting Server. Accounting information might not have been properly received by the Accounting Server.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the RADIUS Accounting server is properly configured.

<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.12. failure\_init\_radius\_accounting (ID: 03700012)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Failed to send Accounting Start to RADIUS Accounting Server. Accounting will be disabled
<b>Explanation</b>	The unit failed to send an Accounting-Start event to the Accounting Server. Accounting features will be disabled.
<b>Gateway Action</b>	accounting_disabled
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.13. invalid\_accounting\_start\_request (ID: 03700013)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Logging out the authenticated user, as a RADIUS Accounting START request could not be sent to the RADIUS Accounting server
<b>Explanation</b>	The authenticated user is logged out as an Accounting-Start request did not get sent to the Accounting Server. This could be a result of missing a route from the unit to the Accounting Server.
<b>Gateway Action</b>	logout_user
<b>Recommended Action</b>	Verify that a route exists from the unit to the RADIUS Accounting server, and that it is properly configured.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.14. no\_accounting\_start\_server\_response (ID: 03700014)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Did not send a RADIUS Accounting START request. Accounting has been disabled
<b>Explanation</b>	The unit did not send an Accounting-Start event to the Accounting Server. Accounting features will be disabled. This could be a result of missing a route from the unit to the Accounting Server.
<b>Gateway Action</b>	accounting_disabled

<b>Recommended Action</b>	Verify that a route exists from the unit to the RADIUS Accounting server, and that it is properly configured.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.15. user\_timeout (ID: 03700020)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	User timeout expired, user is automatically logged out
<b>Explanation</b>	The user is automatically logged out, as the configured timeout expired.
<b>Gateway Action</b>	user_removed
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.16. user\_timeout\_removed\_delayed\_user (ID: 03700021)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Delayed user timeout expired, user is removed
<b>Explanation</b>	User did not receive any Accounting Start Response from Radius.
<b>Gateway Action</b>	delayed_user_removed
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.17. group\_list\_too\_long (ID: 03700030)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	User <username> belongs in too many groups, keeping the 32 first groups
<b>Explanation</b>	A username can only be a member of a maximum of 32 groups. This username is a member of too many groups, and only the 32 first groups will be used.
<b>Gateway Action</b>	truncating_group_list
<b>Recommended Action</b>	Lower the number of groups that this user belongs to.

---

<b>Revision</b>	1
<b>Parameters</b>	username

## 2.48.18. accounting\_alive (ID: 03700050)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Successfully received RADIUS Accounting Interim response from RADIUS Accounting server. Bytes sent=<bytessent>, Bytes recv=<bytesrecv>, Packets sent=<packetssent>, Packets recv=<packetsrecv>, Session time=<sestime>
<b>Explanation</b>	The unit successfully received a RADIUS Accounting Interim response to an Accounting-Interim request event from the Accounting Server. Accounting information has been updated on the Accounting Server.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	bytessent bytesrecv packetssent packetsrecv gigawrapresent gigawraprecv sestime
<b>Context Parameters</b>	User Authentication

## 2.48.19. accounting\_interim\_failure (ID: 03700051)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Failed to send Accounting Interim to Authentication Server. Accounting information might not be properly updated on the Accounting Server.
<b>Explanation</b>	The unit failed to send an Accounting-Interim event to the Accounting Server. The statistics on the Accounting Server might not have been properly synchronized.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the RADIUS Accounting server daemon is running on the Accounting Server.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.20. no\_accounting\_interim\_server\_response (ID: 03700052)

---

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Did not receive a RADIUS Accounting Interim response. User statistics might not have been updated on the Accounting Server
<b>Explanation</b>	The unit did not receive a response to an Accounting-Interim event from the Accounting Server. Accounting information might not have been properly received by the Accounting Server.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the RADIUS Accounting server daemon is running on the Accounting Server.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.21. invalid\_accounting\_interim\_server\_response (ID: 03700053)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Received an invalid RADIUS Accounting Interim response from RADIUS Accounting server. User statistics might not have been updated on the Accounting Server
<b>Explanation</b>	The unit received an invalid response to an Accounting-Interim event from the Accounting Server. Accounting information might not have been properly received by the Accounting Server.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the RADIUS Accounting server is properly configured.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.22. invalid\_accounting\_interim\_server\_response (ID: 03700054)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Received a RADIUS Accounting Interim response with an Identifier mismatch. Ignoring this packet
<b>Explanation</b>	The unit received a response with an invalid Identifier mismatch. This can be the result of a busy network, causing accounting event re-sends. This will be ignored.
<b>Gateway Action</b>	ignore_packet
<b>Recommended Action</b>	None.
<b>Revision</b>	1

Context Parameters      User Authentication

## 2.48.23. `relogin_from_new_srcip` (ID: 03700100)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	User with the same username is logging in from another IP address, logging out current instance
<b>Explanation</b>	A user with the same username as an already authenticated user is logging in. The current instance is logged out.
<b>Gateway Action</b>	<code>logout_current_user</code>
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.24. `already_logged_in` (ID: 03700101)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	This user is already logged in
<b>Explanation</b>	A user with the same username as an already authenticated user tried to logged in, and was rejected .
<b>Gateway Action</b>	<code>disallowed_login</code>
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.25. `user_login` (ID: 03700102)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	User logged in. Idle timeout: <code>&lt;idle_timeout&gt;</code> , Session timeout: <code>&lt;session_timeout&gt;</code>
<b>Explanation</b>	A user logged in and has been granted access, according to the group membership or user name information.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	<code>idle_timeout</code> <code>session_timeout</code> <code>[groups]</code>

Context Parameters      User Authentication

## 2.48.26. bad\_user\_credentials (ID: 03700104)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Unknown user or invalid password
<b>Explanation</b>	A user failed to log in. The entered username or password was invalid.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.27. radius\_auth\_timeout (ID: 03700105)

<b>Default Severity</b>	ALERT
<b>Log Message</b>	Timeout during RADIUS user authentication, contact with RADIUS server not established
<b>Explanation</b>	The unit did not receive a response from the RADIUS Authentication server, and the authentication process failed.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Verify that the RADIUS Authentication server daemon is running on the Authentication Server.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.28. manual\_logout (ID: 03700106)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	User manually logged out
<b>Explanation</b>	A user manually logged out, and is no longer authenticated.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

## 2.48.29. userauthrules\_disallowed (ID: 03700107)

<b>Default Severity</b>	WARNING
<b>Log Message</b>	Denied access according to UserAuthRules rule-set
<b>Explanation</b>	The user is not allowed to authenticate according to the UserAuthRules rule-set.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

### 2.48.30. challenges\_not\_supported (ID: 03700108)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Challenges are not supported for this authentication system
<b>Explanation</b>	The XAuth authentication system does not support the challenge-and-response method.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	Disable the challenge-and-response feature, and use password verification instead.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

### 2.48.31. user\_logout (ID: 03700110)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	User logged out
<b>Explanation</b>	A user logged out, and is no longer authenticated.
<b>Gateway Action</b>	None
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Context Parameters</b>	User Authentication

### 2.48.32. no\_shared\_ciphers (ID: 03700500)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	SSL Handshake: No shared ciphers exists. Closing down SSL connection
<b>Explanation</b>	No shared ciphers were found between the client and the unit, and the

	SSL connection can not be established.
<b>Gateway Action</b>	ssl_close
<b>Recommended Action</b>	Make sure that the client and unit share atleast one cipher.
<b>Revision</b>	1
<b>Parameters</b>	client_ip

### 2.48.33. disallow\_clientkeyexchange (ID: 03700501)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	SSL Handshake: Disallow ClientKeyExchange. Closing down SSL connection
<b>Explanation</b>	The SSL connection will be closed because there are not enough resources to process any ClientKeyExchange messages at the moment. This could be a result of SSL handshake message flooding. This action is triggered by a system that monitors the amount of resources that is spent on key exchanges. This system is controlled by the advanced setting SSL_ProcessingPriority.
<b>Gateway Action</b>	ssl_close
<b>Recommended Action</b>	Investigate the source of this, and try to find out if it is a part of a possible attack, or normal traffic.
<b>Revision</b>	2
<b>Parameters</b>	client_ip

### 2.48.34. bad\_packet\_order (ID: 03700502)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Bad SSL Handshake packet order. Closing down SSL connection
<b>Explanation</b>	Two or more SSL Handshake message were received in the wrong order, and the SSL connection is closed.
<b>Gateway Action</b>	ssl_close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_ip

### 2.48.35. bad\_clienthello\_msg (ID: 03700503)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	SSL Handshake: Bad ClientHello message. Closing down SSL connection

<b>Explanation</b>	The ClientHello message (which is the first part of a SSL handshake) is invalid, and the SSL connection is closed.
<b>Gateway Action</b>	ssl_close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_ip

## 2.48.36. bad\_changecipher\_msg (ID: 03700504)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	SSL Handshake: Bad ChangeCipher message. Closing down SSL connection
<b>Explanation</b>	The ChangeCipher message (which is a part of a SSL handshake) is invalid, and the SSL connection is closed.
<b>Gateway Action</b>	ssl_close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_ip

## 2.48.37. bad\_clientkeyexchange\_msg (ID: 03700505)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	SSL Handshake: Bad ClientKeyExchange message. Closing down SSL connection
<b>Explanation</b>	The ClientKeyExchange message (which is a part of a SSL handshake) is invalid, and the SSL connection is closed.
<b>Gateway Action</b>	ssl_close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_ip

## 2.48.38. bad\_clientfinished\_msg (ID: 03700506)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	SSL Handshake: Bad ClientFinished message. Closing down SSL connection
<b>Explanation</b>	The ClientFinished message (which is a part of a SSL handshake) is invalid, and the SSL connection is closed.

---

<b>Gateway Action</b>	ssl_close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_ip

### 2.48.39. bad\_alert\_msg (ID: 03700507)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Bad Alert message. Closing down SSL connection
<b>Explanation</b>	The Alert message (which can be a part of a SSL handshake) is invalid, and the SSL connection is closed.
<b>Gateway Action</b>	ssl_close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_ip

### 2.48.40. unknown\_ssl\_error (ID: 03700508)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Unknown SSL error. Closing down SSL connection
<b>Explanation</b>	An unknown error occurred in the SSL connection, and the SSL connection is closed.
<b>Gateway Action</b>	ssl_close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_ip

### 2.48.41. negotiated\_cipher\_does\_not\_permit\_the\_chosen\_certificate (ID: 03700509)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	The negotiated cipher does not permit the chosen certificate size. Closing down SSL connection
<b>Explanation</b>	The negotiated cipher was an export cipher, which does not allow the chosen certification size. The certificate can not be sent, and the SSL connection is closed.
<b>Gateway Action</b>	ssl_close

<b>Recommended Action</b>	Change ciphers and/or certificate.
<b>Revision</b>	1
<b>Parameters</b>	client_ip

## 2.48.42. received\_sslalert (ID: 03700510)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Received SSL Alert. Closing down SSL connection
<b>Explanation</b>	A SSL Alert message was received during an established SSL connection, and the SSL connection will be closed.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	client_ip level description

## 2.48.43. sent\_sslalert (ID: 03700511)

<b>Default Severity</b>	ERROR
<b>Log Message</b>	Sent SSL Alert. Closing down SSL connection
<b>Explanation</b>	The unit has sent a SSL Alert message to the client, due to some abnormal event. The connection will be closed down.
<b>Gateway Action</b>	close
<b>Recommended Action</b>	Consult the "description" parameter, which contains the reason for this.
<b>Revision</b>	1
<b>Parameters</b>	client_ip level description

## 2.49. VFS

These log messages refer to the **VFS (VFS file handling events)** category.

### 2.49.1. odm\_execute\_action (ID: 05200002)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Uploaded file (<filename>) was validated as "<description>". Rebooting system.
<b>Explanation</b>	An uploaded file was validated, and executed. The system will now reboot.
<b>Gateway Action</b>	odm_action_taken
<b>Recommended Action</b>	None.
<b>Revision</b>	1
<b>Parameters</b>	filename description

### 2.49.2. odm\_execute\_action (ID: 05200003)

<b>Default Severity</b>	NOTICE
<b>Log Message</b>	Uploaded file (<filename>) was validated as "<description>". Doing system RECONFIGURE .
<b>Explanation</b>	An uploaded file was validated, and executed. The system will now RECONFIGURE.
